INTRODUCTION

We have produced this information to help students, together with their parents, choose the most suitable subjects for Years 11 and 12. This process is one which involves input and discussion before a decision can be reached. On the Subject Selection Evening, Academic Leaders and teachers of various subjects will be available to provide information on choosing subjects. I urge parents to take this opportunity to talk with teachers or to make alternative appointment times if there is a need for further consultation.

Students will be asked to nominate the subjects they would like to study in the following year. Following the initial subject selection, students will be involved in an interview process to discuss the appropriateness of the choices detailed in their SET Plans. From this information, the subject lines will be compiled to provide the maximum fit for stated student choices. It is most important, therefore, that students choose very carefully in their final selection. If insufficient students select a subject, it cannot go ahead, and it will, therefore, not appear on the lines which are presented to students subsequently. This may mean that a late change of mind is not possible.

This information will provide students and parents with a comprehensive list of the subjects offered for study. Students are offered a choice between subjects which will lead them to tertiary study through contribution to an ATAR, and subjects which can provide nationally recognised certification, and which prepare them to enter the workforce. By providing alternative pathways through Years 11 and 12, San Sisto is meeting the needs of students wishing to access a full variety of opportunities on completing their high school studies. Whatever a student's goals, the alternative pathways offered at the college provide for individual needs. It is therefore most important that, before finalising subject choices, students investigate all the pathways to the future.

As well as undertaking her academic work, each girl is urged to take an active part in the life of the college. There are many opportunities in community service groups, sport, drama, music and the arts which are available to help students to make the most of their potential. Involvement in these aspects of school life helps the students to maintain a balance between their intellectual, spiritual, physical and emotional needs. It is important to recognise that we are concerned to educate the whole person and that we encourage students to take the opportunity to assume leadership responsibility in a variety of contexts.

Warren Bath
Principal

CHOOSING SENIOR SUBJECTS

It is important to choose senior subjects carefully. There are a number of guidelines to go by when choosing subjects for Years 11 and 12.

Students should choose subjects:

- which they enjoy
- in which they are likely to achieve their best results
- which will help them reach their chosen tertiary and career goals, especially any prerequisites for particular courses – refer to Year 10 QTAC guide
- which give them valuable skills, knowledge and attributes.

This will involve thought, discussion and research.

To investigate a subject, students should:

- speak to their teachers in their related Year 10 subjects (where applicable)
- speak to their parents
- look at the books and materials used in that subject
- read the provided information about the subject
- listen carefully when teachers talk about the subject in class or during information sessions
- access the QCAA subject syllabus information.

Students should pay attention to the content of the senior subjects and to the assessment which they will be required to do. Students should consider whether they have shown an ability to complete this kind of work in the past. Students should make subject choices without reference to what their friends will be doing. Similarly, students should not make subject choices based on who they think might be teaching that subject the following year.

Consider the workload of all the subjects together. For example, ask such questions as:

- Can I manage the amount of reading and writing which my chosen subject requires?
- Can I expect to do well in subjects which require so much independent research?
- Can I juggle the home commitment with the other things in my life?
- Can I prepare and complete the practical tasks which these subjects require of me?

CAREERS

As part of this year's Career Development and Work Education Program, students have been focusing on discovering and identifying their unique sets of skills, interests and abilities in the lead up to subject selection. Students have also been guided through a series of career assessment tools in order to increase their knowledge about the 'World of Work' and the careers of the future.

It is no secret that some of the careers of today didn't exist 10 years ago and unfortunately for some, jobs of today will not exist in the future. In order to future-proof their careers, today's school students will need to develop their social interactions, their creative problem solving and their resilience to adapt to a constantly changing workplace. They will also need to commit to being life-long learners.

It has been estimated that close to 85% of Year 12 students will participate in tertiary study upon completion of their senior schooling. Therefore, when considering senior subjects, our Year 10 students need to not only consider their strengths, interests and abilities but also the tertiary prerequisites required for entry into specific courses.

Because course requirements may change, it is important to consult up-to-date resources. Students and parents can locate the 2027 tertiary prerequisites for each university and college on the QTAC website. Each university and college has listed the prerequisites required for entry to tertiary courses in the year the students commence their tertiary studies. All Year 10 students have been given access to this guide. Students should check through the course requirements before they make their final selection. As well, students may choose to speak to the Learning and Teaching Leader: Learning Pathways.

By accessing the 2027 tertiary prerequisites through the QTAC website you will become aware of the distinction between:

- **Prerequisite** (ie audition, senior subjects, portfolios you must meet before you are considered for entry. Subject prerequisites are subjects you must complete and achieve a specified result before you are considered for entry).
- **Recommended** (not essential, but which are likely to make future courses easier to follow)
- **Assumed** (assumed knowledge is the minimum level of achievement in Senior studies considered necessary for success – bridging courses may have to be undertaken).

All Year 10 students and their parents will attend a SET-Plan interview in term 3. The Senior Education and Training Plan has been designed, to not only assist students in their subject selection process but also educate, equip and assist them in future proofing their careers. Students need to not only consider the senior subject prerequisites required for specific course entry but also keep in mind that a well-rounded education which focuses on strengths, abilities and interests, will lead them onto a pathway of success.

TYPES OF SUBJECTS

Students are offered a variety of subjects to meet their interests. General subjects are intended for students who hope to go on to further study, Applied subjects are not designed to support transition to a university environment, however, can be used to contribute to ATAR-eligibility.

General Subjects: These subjects are regarded as academically demanding, certainly more demanding than similar subjects at Year 10 level. Students who do not meet the minimum standards outlines on P. 8 in the relevant Year 10 subject will find it difficult to cope with the related General subject in Years 11 and 12.

Many General subjects may be taken up for the first time in Year 11. However other subjects have been written with an assumption that students have already a considerable knowledge of them, for example, foreign languages such as Japanese and Italian, Mathematical Methods and Specialist Mathematics. Without that knowledge as a basis, success is difficult to achieve. As such, prerequisite subjects are indicated in the table on P. 8.

Some subjects are complementary, and as such make valuable companion subjects should students be interested in designing their selection around a core learning area. Appropriate companion subjects have been indicated on P. 8.

Both Specialist Mathematics and Physics require students to also study Mathematical Methods. This is recorded on P. 8 as a mandatory companion subject for both of these subjects.

For reporting purposes, student achievement in General subjects is graded on an A-E scale. Numerical data is forwarded from the QCAA to QTAC at the end of the course for use in ATAR calculation.

Applied subjects: These subjects place a greater emphasis on practical study as opposed to theoretical study. Experience and knowledge are also key elements. Applied subjects may be part of an ATAR-eligible pathway under what is known as a “4 + 1” model.

Student achievement in Applied subjects is reported to parents on an A-E scale.

Vocational Education and Training (VET) Certificates: These are nationally recognised qualifications that students can enrol in as part of their secondary schooling. VET subjects (Cert III and higher) can be part of an ATAR-eligible pathway under a “4 + 1” model.

Achievement in these qualifications is recorded in terms of attainment of nationally endorsed units of competencies. Where a student attains competency in all units they are awarded the full certificate.

Vocational educational and training qualifications at Certificate III or above can be used to determine a student’s ATAR under a “4 + 1” model; alternatively, some institutions will accept student applications on the basis of completed certificate courses (see page 91 for more detail).

Eligibility requirements - ATAR Pathway

In order to be considered eligible for an ATAR a student must have studied at least four General subjects. Students wishing to achieve highly competitive ATARS are advised to enrol in at least five General subjects.

To maximise chances of university entrance, students are strongly advised to follow these steps:

- Select all prerequisite subjects for preferred courses;
- Consider subjects in which they have both an interest and a demonstrated ability;
- Check to ensure that their subject combination is ATAR-eligible;
- Check to ensure that their subject combination is QCE-eligible.

QTAC, who calculate the individual ATARs, has outlined [eligibility requirements](#) students must meet to be awarded an ATAR. Students must have:

- Successful completion of an English subject is a mandatory requirement for the award of an ATAR. Students are required to successfully complete (i.e. be awarded a raw letter grade of “C” or better) in one of the following QCAA English subject offerings:
 - English
 - Literature
 - Essential English
- While successful completion of an English subject is a mandatory requirement for ATAR eligibility, there are no mandatory subject inclusions for the ATAR. This means students can be ATAR eligible with any of the above listed English options.
- Not all English subjects will meet the English prerequisite requirements for universities and courses. You must check each university’s prerequisites.
- While students must satisfactorily complete an English subject to be eligible for an ATAR, the result in English will only be included in the ATAR calculation if it is one of the student’s best five subjects.

Even after following these suggestions students and their parents may be a little confused or uncertain about the combination of subjects chosen. It is wise at this stage to check again with some of the many people around to talk to – teachers, Learning and Teaching Leaders for each subject area, the Learning and Teaching Leader - Learning Pathways, the Learning and Teaching Leader – Learning Enhancement, or the Deputy Principal.

Year 10 students, with their parents, have some very serious decisions to make. There is information not just at school, but from tertiary institutions, employer groups and other groups in the community. Take advantage of whatever sources of information are available to you. Good decision making requires good information-gathering and these resources should be exploited.

CERTIFICATES ISSUED TO STUDENTS ON COMPLETION OF YEAR 12

STATEMENT OF RESULTS

The Queensland Curriculum and Assessment Authority issues the Statement of Results, which will display all learning ***registered in the student's learning account*** at the end of Year 12.

It also lists any competencies achieved that contribute towards certificates in vocational training programs, even if the full certificate has not been achieved.

QUEENSLAND CERTIFICATE OF EDUCATION

This certificate is issued to students who achieve 20 credits or more in their learning account. There are three categories of credit: core, preparatory, and complementary. To meet the requirements students must achieve at least 12 of their 20 credits in completed core subjects. To receive a QCE, students must achieve the set amount of learning, in the set standard, in a set pattern, while meeting literacy and numeracy requirements.

Students who do not achieve 20 credit points will receive a Statement of Results only. The QCE is issued to students who have 20 credits banked at the end of their Year 12, independent of whether they are ATAR eligible or not.

For students to achieve credit from a course of study they must achieve at least a Sound level or be assessed as Competent or achieve a Pass. Failure to meet these standards means that they will receive no credit towards the QCE from that course of study.

Students who successfully complete either an ATAR-eligible or ineligible course should easily fulfil the requirements of the QCE, as they will have passed all of their subjects.

SENIOR SCHOOLING

How is it different from Year 10?

ADJUSTMENT

One of the distinct advantages of the senior school is that you will be given greater personal responsibility. Greater trust will be placed in you in many ways and for some this will require some adjustment.

WORK CONSISTENTLY THROUGHOUT THE YEAR

The amount of work you will be required to cover will increase **substantially**. You will have more reading to do, more note taking; you will need to assimilate a greater body of facts, come to grips with ideas and develop necessary skills. To be successful you will need to work consistently throughout the year. Leaving things to the weeks before the tests and exams is a certain recipe for failure.

ASSUME INCREASING RESPONSIBILITY FOR YOUR OWN PROGRESS

All your teachers are experienced professionals who can assist you by guiding, directing and encouraging you in your learning process. **They cannot learn for you.** You must become convinced that you are the one who must assume an ever-increasing responsibility for your own progress.

DISCIPLINE TO UNDERTAKE APPROXIMATELY 20 HOURS OF HOME STUDY EACH WEEK

As you proceed with further study an increasing amount of work must be done by you in your own time. Because every student approaches study differently it is difficult to make a blanket statement about the amount of time which each student should spend on study. As a rule of thumb, you should be willing and sufficiently self-disciplined to work unsupervised for approximately 20 hours over and above the time spent in formal classes. During the year you will be given some assistance in developing effective study skills.

STUDY HABITS

In Years 11 and 12 you will find less emphasis on constant teacher direction. Dates will be given for tests and assignments in advance via Term Assessment calendars. You will notice that there will be pressure points in each semester. You must keep looking ahead and plan your work well in advance.

In some subjects you will be given regular and required homework. In other subjects you will be constantly working towards a goal. Your night study should then consist of approximately 25-30 minutes for each subject studied that day, comprising of:

- revising the work of the day
- completing required homework
- doing advance reading, research and planning for coming commitments
- preparing for the work of the next day.

ASSESSMENT PROCEDURES

Assessment at San Sisto College is designed to reflect the Principles of Assessment. The College is committed to an educational philosophy that encourages all students to achieve personal excellence by developing their talents and abilities. This assessment policy incorporates the roles, responsibilities, processes, and procedures used by San Sisto College to ensure academic integrity in relation to the submission of work, the development of assessment, and the completion of all assessment items (including exams).

In 2024, a college wide assessment policy was developed and shared with the community. It is available on the college website under policies and is a further resource for assessment policy and practice across the college for teachers and students.

ASSESSING STUDENT LEARNING

Assessing student learning is an integral part of teaching and learning. It improves learning and informs teaching. It is the process through which teachers identify, gather, and interpret information about student achievement and learning to improve, enhance and plan for further learning.

Five key strategies of formative assessment:

1. Clarifying, sharing and understanding through development of **learning intentions and success criteria**.
2. Engineering **effective classroom** discussions, activities and learning tasks that elicit evidence of learning.
3. Providing **feedback** that moves learning forward.
4. Activating learners as the owners of their own learning – **self-assessment**.
5. Activating learners as instructional resources for one another – **peer assessment**.

Assessment of Learning - Formative

Formative assessment encourages students to take responsibility for their own learning requires students to ask questions about their learning involves teachers and students creating learning goals to encourage growth and development provides ways for students to use formal and informal feedback and self-assessment to help them understand the next steps in learning encourages peer assessment, self-assessment and reflection.

Assessment of Learning - Summative

Summative assessment assisting teachers, education leaders, parents, the community, researchers and policy makers to use evidence of student learning to assess student achievement against recognised goals and standards and drive improvements in student outcomes. (Alice Springs (Mparntwe) Declaration, 2019).

Assessment of learning provides information, a judgement or result about the evidence of student learning is based on opportunities for students to demonstrate their knowledge, understanding and skills as it is named in the year and band achievement standards is made clear and visible to students and provides opportunities for analysing and co-constructing what success looks like is used to plan future learning goals and pathways for students is visible and reported, to provide evidence of achievement to the wider community, including parents, educators and students themselves.

ASSESSMENT TECHNIQUES

A range of assessment techniques can be used by teachers to gather the information required to make professional judgements about students' progress and achievement. These techniques focus on students' demonstrations of learning, be comprehensive, valid and reliable, reflect equity principles, consider individual learners, and are an integral part of the learning and teaching process. Evidence gathered includes practices and dispositions when working cooperatively, concentrating and following through on a task; communication skills; manipulative skill development: use or application of techniques related to performance; strengths and areas where further assistance is required. In Years 11 and 12, assessment techniques adhere to QCAA syllabus and AQTF VET requirements.

AARA FOR STUDENTS (LONG AND SHORT-TERM CONDITIONS)

Students with a disability, impairment, medical condition or circumstances may be eligible for access arrangements or adjustments to assessment conditions that are reasonable given their individual situation and context. There are guidelines from QCAA regarding access arrangements and reasonable adjustments including eligibility, available arrangements and adjustments, and supporting documentation.

Eligibility

AARA are provided to minimise, as much as possible, barriers for a student whose disability, impairment, medical condition or other circumstances may affect their ability to read, respond to or participate in assessment. These barriers fall into three categories: Long-term and chronic conditions; Short-term conditions and temporary injuries; Illness and misadventure. The definition of 'disability' used in the Disability Discrimination Act (1992) (DDA) is broad. It includes physical, intellectual, psychiatric, sensory, neurological and learning disabilities. It also includes physical disfigurement, and the presence in the body of disease-causing organisms. The QCAA uses broad disability categories for AARA: cognitive; physical; sensory; social/emotional.

Ineligibility Students are not eligible for AARA on the following grounds: unfamiliarity with the English language; teacher absence or other teacher-related difficulties; matters that the student could have avoided (e.g. misreading an examination timetable, misreading instructions in examinations); timetable clashes; matters of the student's or parent's/carer's own choosing (e.g. family holidays or sporting events).

ACADEMIC INTEGRITY

Academic integrity is an important issue for students and schools – a good understanding of this is even more crucial in the Senior phase of learning.

Academic integrity encompasses issues including:

- Authentication of student authorship.
- Guidelines around scaffolding and drafting.
- Contribution of tutors
- Plagiarism
- Referencing
- Procedures for dealing with late and non-submission of assessment.
- Size of assessment responses (e.g. word limits) and protocols for dealing with submissions that lie beyond these.

More than ever before, schools are bound by QCAA policies around these concerns. So that all parties enter into the Senior phase of learning with a clear understanding of expectations, the relevant QCAA policy and procedure extracts are included on pages 18-20 of this book.

Please note that the QCAA have produced an online student course in academic integrity. We plan to have every student in Year 10 complete this course by the end of the year.

QCAA POLICY AND PROCEDURES (Extracts)

7.8 Illness and misadventure

Illness and misadventure provide for students whose ability to attend, or performance in, summative internal or external assessment was adversely affected by an unexpected event. Illness and misadventure can affect a single student or a group of students.

The following guidelines apply for illness and misadventure:

- A student who has been approved for access arrangements and reasonable adjustments (AARA) is not eligible to apply for illness and misadventure consideration for the same condition, unless it can be demonstrated through evidence that a significant deterioration or complication of the condition occurred which diminished the student's performance in assessment.
- The condition or situation must be unforeseen and beyond the student's control. An adverse effect must be demonstrated.
- The condition or situation cannot be of the student's own choosing or that of their parents/carers, such as a family holiday.

7.8.1 Timelines for illness and misadventure

Typically, students are responsible for initiating an application for illness and misadventure if they believe they have been adversely affected by illness or other emergent circumstances.

Schools should assist students by explaining the application process for illness and misadventure for summative internal or external assessment, as required.

Internal assessment

Principal-reported AARA are implemented by the school until the closing date for AARA applications, as published in the Senior Education Profile (SEP) calendar. All efforts should be made to complete internal assessment.

When summative internal assessment cannot be completed using principal reported AARA by the closing date, schools should complete an application for illness and misadventure via the QCAA Portal. Applications for illness and misadventure close seven days after the closing date for principal reported AARA.

External assessment

The student is responsible for completing the relevant sections of the *Illness and misadventure* form and obtaining the independent documentation to support the application.

A separate application is required for each external assessment for which consideration is being sought. Schools will be asked to supply supplementary information to verify the student's application.

When a subject cohort is affected by circumstances of illness and misadventure, schools submit an application on behalf of the student group.

For external assessment, applications for illness and misadventure are accessed:

- for students, via Student Connect
- for schools, via the QCAA Portal.

Applications for illness and misadventure for external assessment:

- open 14 days before the start of the external assessment schedule
- close seven days after every relevant external assessment.

7.8.2 Applying for illness and misadventure — internal assessment

Illness and misadventure support students who are prevented from completing the requirements of summative internal assessment for Units 3 or 4 due to unforeseen circumstances. Schools implement principal reported AARA when possible before considering an application for illness and misadventure.

The following pre-conditions must be satisfied to warrant an application of illness and misadventure for summative internal assessment:

- An illness and misadventure application cannot be made for the same condition or circumstances for which QCAA-approved AARA have been approved, unless it can be demonstrated through evidence that a significant deterioration or complication of the condition occurred which diminished the student's performance in summative internal assessment.
- The condition or situation is unforeseen and beyond the student's control. An adverse effect can be demonstrated.
- There is no further time to implement principal reported AARA.

Illness or non-attendance during completion of internal assessment

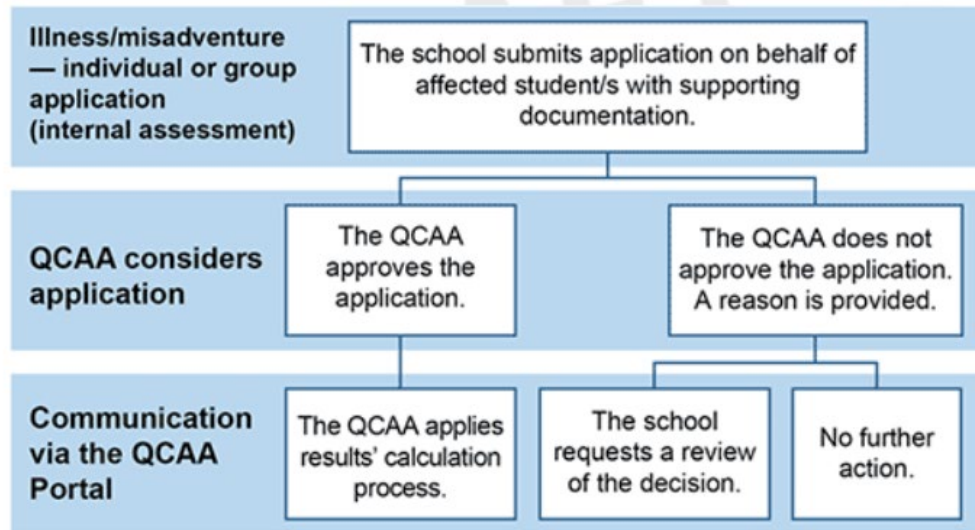

A student who is ill and able to attend summative internal assessment should inform the principal's delegate or assessment supervisor of their condition as soon as practical. This may be before, during or immediately after the assessment session.

Principal-reported AARA should be implemented to provide, when possible, opportunities for the student to complete assessment. Example arrangements such as comparable assessment and extensions may be considered when illness or misadventure is established.

Groups of students

When a student group is affected by an adverse event or circumstances leading up to or during the summative internal assessment schedule, or during an internal assessment session, the school should telephone the QCAA at the first opportunity for advice.

Illness and misadventure: Application process for internal assessment

7.8.3 Applying for illness and misadventure — external assessment

The QCAA advises students to attend every external assessment. However, the QCAA does not expect students to attend an external assessment against specific written medical advice. When students are in doubt about attendance to complete an external assessment, they should contact the school external assessment (SEA) coordinator.

Illness during external assessment

A student who is ill and able to attend the external assessment should inform the external assessment supervisor of their illness as soon as practical. This may be before, during or immediately after the external assessment session.

Non-attendance at external assessment

A student who cannot attend an external assessment must notify the principal's delegate or the SEA coordinator as soon as practical.

More information about non-attendance at external assessment will be included in an updated version of this handbook.

Individual student

Students who believe their performance in an external assessment is affected by an illness or circumstances beyond their control, occurring in the lead up to or during the external assessment schedule, may submit an application for illness and misadventure.

An illness and misadventure application cannot be made for the same condition or circumstances for which QCAA-approved AARA have been approved, unless it can be demonstrated through evidence that a significant deterioration or complication of the condition occurred which diminished the student's performance in external assessment.

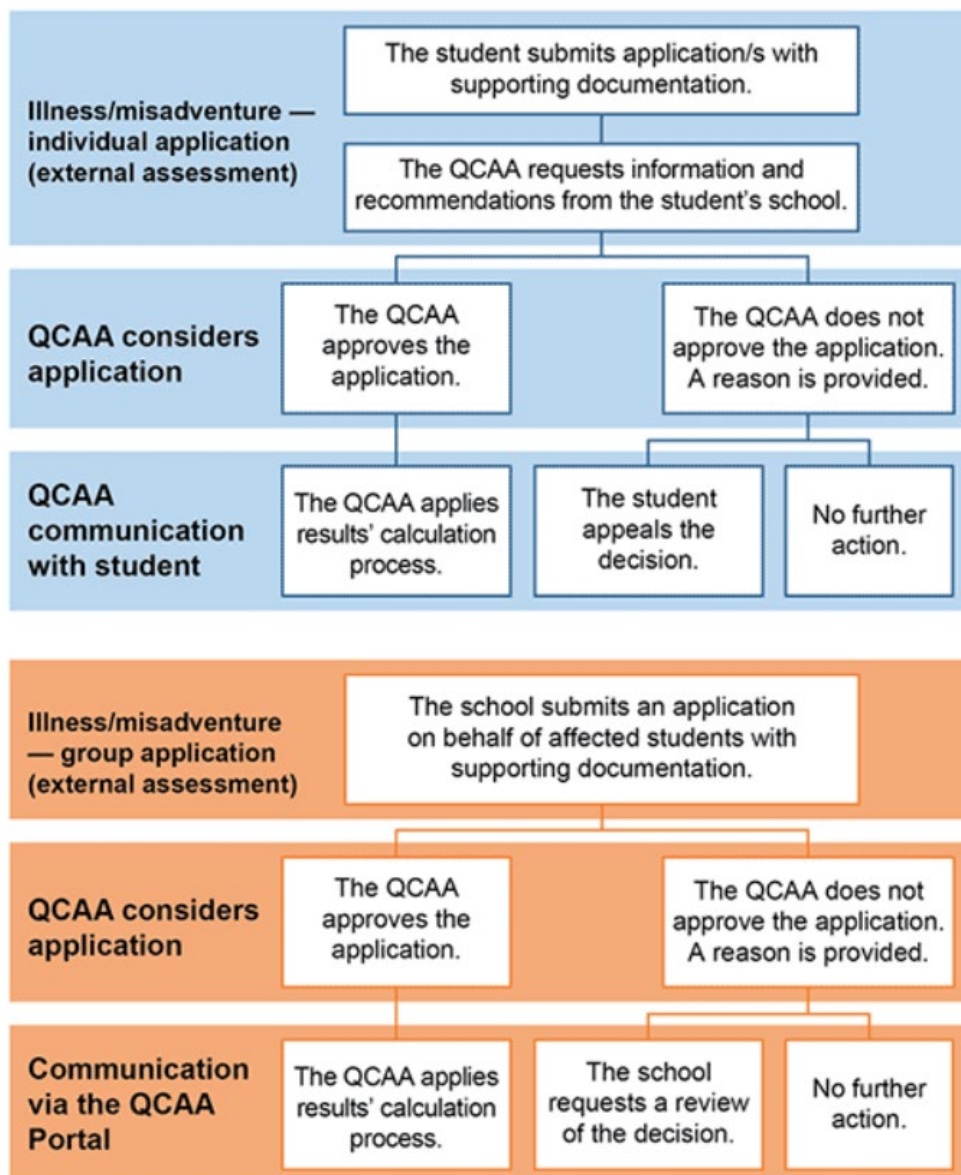

The QCAA will seek background information and a recommendation from the principal or the principal's delegate to verify a student's application for illness and misadventure.

Groups of students

When a group of students is affected by an adverse event or circumstances leading up to or during the external assessment schedule, or during an external assessment session, the school may submit a misadventure application on behalf of the students.

In such circumstances, schools should telephone the QCAA at the first opportunity for advice.

Illness and misadventure: Application process for external assessment

7.8.4 Supporting documentation for illness and misadventure — internal and external assessment

To make an informed decision about an illness and misadventure application, the QCAA requires a report that includes the following details:

- diagnosed illness, condition or event
- date of diagnosis, onset or occurrence
- symptoms, treatment or course of action related to the condition or event
- explanation of the probable effect of the illness, condition or event on the student participating in the assessment
- for non-medical claims, written evidence from a relevant independent professional or other independent third party.

3.1 Understanding academic integrity

The Queensland Curriculum and Assessment Authority (QCAA) promotes academic integrity. Academic integrity is how a person approaches their academic responsibilities in an honest, moral and ethical way. Teachers, parents/carers and others who support students in their learning must adhere to the guidelines for academic integrity.

Schools must communicate information about academic integrity to their school community.

Schools can support academic integrity by:

- developing curriculum and assessment that allows for the identification of individual work
- fostering a learning environment that encourages mutual trust and respect for developing individual work by appropriately acknowledging the ideas, work or interpretation of others
- giving students access to resources that enable students to self-assess their compliance with academic integrity guidelines before submitting responses
- using QCAA-developed online courses [in development] and school-developed programs to help students and teachers understand the importance of academic integrity
- developing processes to manage, resolve and appeal cases of academic misconduct.

The QCAA recognises that schools and their staff act with integrity and uphold high standards of professional conduct in adhering to the procedures and guidelines in this handbook.

3.2.1 Late and non-submission of assessment

Some key points

Internal assessment

Schools are responsible for managing the late submission and non-submission of student responses to formative and summative internal assessment instruments in General and Applied subjects for Units 1–4. These guidelines do not apply to situations when a student's reasons for late submission

or non-submission relate to specific educational needs and meet eligibility for Access Arrangements and Reasonable Adjustments (AARA).

Late submission of a student response

When a student submits a response to an assessment instrument after the due date set by the school, a result should be allocated using evidence available on or before the due date, e.g. class work, drafts, rehearsal notes, photographs of student work, teacher observations.

Non-submission of a student response

When a student does not submit a response to an assessment instrument, a result can only be allocated when evidence has been demonstrated.

3.2.2 Drafts and providing feedback on draft student responses

Drafts

A draft is a preliminary version of a student's response to an assessment instrument. The quality of a draft may vary from a brief outline to a response that is nearing completion. Drafts can also be used to authenticate student work.

Providing feedback on draft student responses

A teacher should provide feedback on a maximum of one draft of each student's response.

The purpose of viewing a draft is to provide a student with feedback so that they can improve their response. Providing feedback on a draft is a consultative process, not a marking process. Teachers should not allocate a notional result for draft student responses.

Feedback should encourage a student to reflect on strategies they might use to refine their response. Feedback on a draft must not compromise the authenticity of student work. Teachers should not introduce new ideas, language or research to improve the quality of student responses.

In providing feedback on a draft, teachers indicate aspects of the response that need to be improved or developed to meet the requirements of the assessment instrument, ISMG, instrument-specific standards or syllabus standards. Students may be advised to:

- consider other aspects of the text, report, performance or activity they are creating or responding to
- develop their response to show more awareness of the audience
- give priority to the most important points by rearranging the sequence and structure of ideas
- conduct further research or substantiate points ensuring adherence to referencing style.

Teachers may:

- indicate some textual errors and that the draft requires more careful editing — teachers should not correct or edit all the textual errors in a draft. Editing and proofreading for spelling, grammar and punctuation is not a part of the draft feedback process
- provide feedback only on a draft submitted by the draft due date
- provide a summary of their feedback and advice to the whole class.

3.2.3 Scaffolding

Scaffolding is a structured, interactive and collaborative process that occurs between teachers and students to construct knowledge and skills as part of teaching, learning and assessment. It is an intentional instructional strategy in which teachers support students to become independent in completing a task or responding to an assessment instrument.

Teachers gradually release support and responsibility to students over a course of study so that they may complete a task or assessment instrument independently.

3.2.4 Managing the length of student responses

Each syllabus indicates the required length of a student response for an assessment instrument. This information is provided to:

- indicate the depth of response required
- encourage conciseness of student responses
- ensure equity of conditions for all students.

Responsibilities for managing the length of student responses

Schools:

- develop school-based policies and procedures that encourage students to respond to assessment instruments within the required length.

Teachers:

- provide students with feedback if a draft response exceeds or is significantly under the required length
- implement strategies for when a student submits a response that exceeds the required length, such as not reading/viewing the response after they have judged that it has reached the required length, i.e.
 - teachers annotate on the student's response where they have stopped reading/viewing and annotate on the assessment task sheet that the student's response has exceeded the required length
 - teachers mark the student's response using information up to the required length.

Students:

- develop responses that do not exceed or are significantly under the required length
- document the length of their response using a word count, page count or time.

Accounting

Accounting provides opportunities for students to develop an understanding of the essential role of organising, analysing and communicating financial data and information in the successful performance of any organisation.

Students learn fundamental accounting concepts in order to understand accrual accounting and managerial and accounting controls, preparing internal financial reports, ratio analysis and interpretation of internal and external financial reports. They synthesise financial data and other information, evaluate accounting practices, solve authentic accounting problems, make decisions and communicate recommendations.

Students develop numerical, literacy, technical, financial, critical thinking, decision-making and problem-solving skills. They develop an understanding of the ethical attitudes and values required to participate effectively and responsibly in a changing business environment.

Pathways

A course of study in Accounting can establish a basis for further education and employment in the fields of accounting, business, management, banking, finance, entrepreneurship law, economics and commerce.

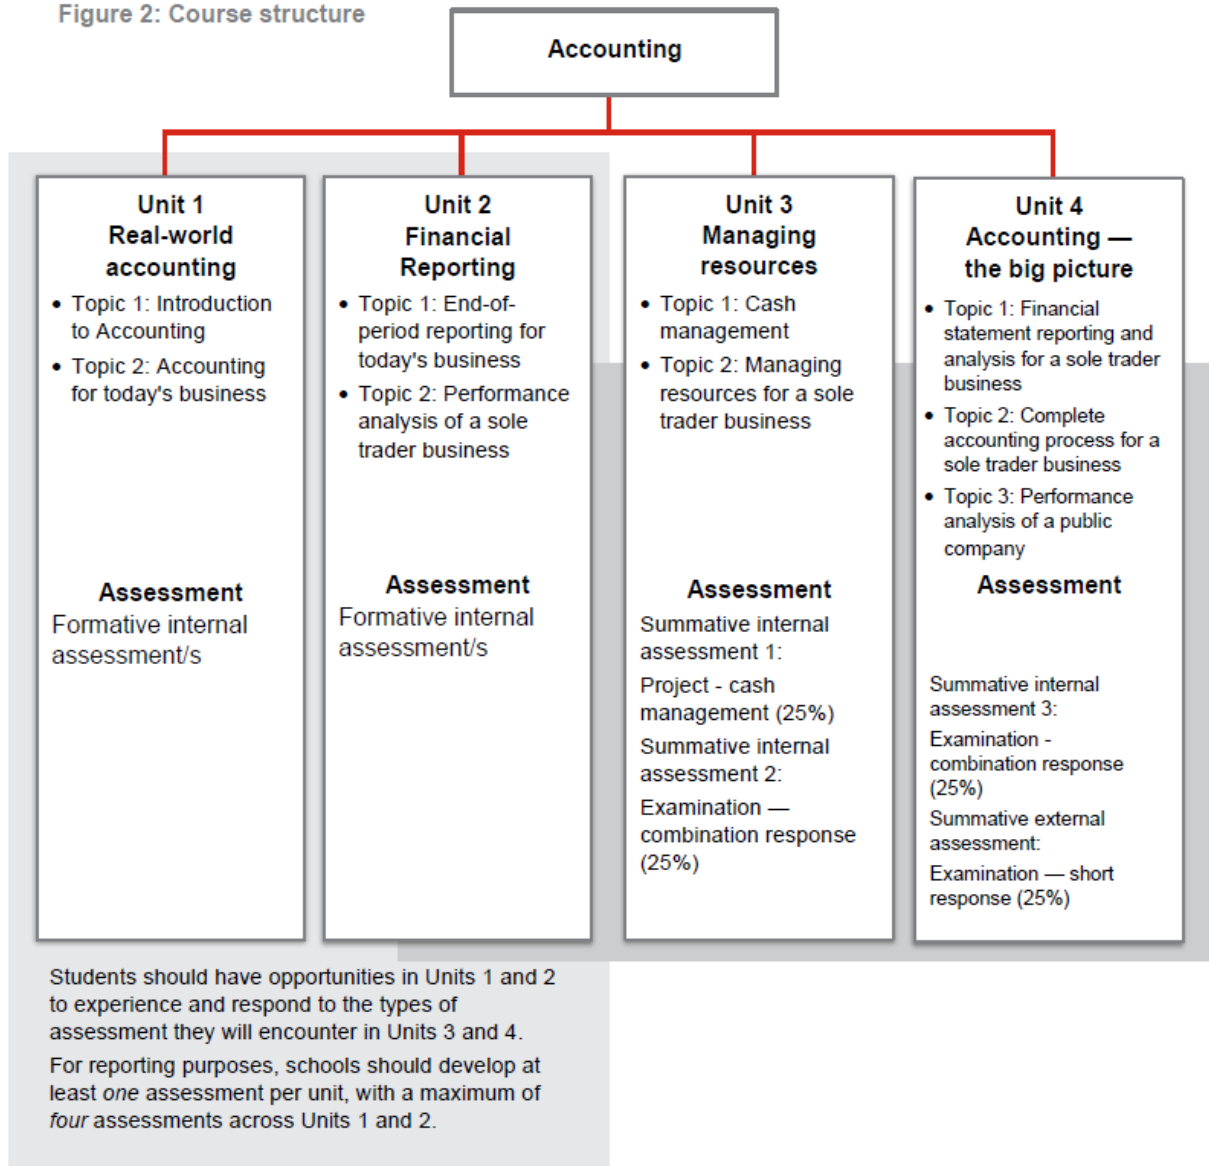

Objectives

By the conclusion of the course of study, students will:

- comprehend accounting concepts, principles and processes
- synthesise accounting principles and processes
- analyse and interpret financial data and information
- evaluate practices of financial management to make decisions and propose recommendations
- create responses that communicate meaning.

Overview - Accounting Syllabus

Figure 2: Course structure

Ancient History

Ancient History provides opportunities for students to study people, societies and civilisations of the past, from the development of the earliest human communities to the end of the Middle Ages. Students explore the interaction of societies, and the impact of individuals and groups on ancient events and ways of life and study the development of some features of modern society, such as social organisation, systems of law, governance and religion.

Students analyse and interpret archaeological and written evidence. They develop increasingly sophisticated skills and understandings of historical issues and problems by interrogating the surviving evidence of ancient sites, societies, individuals and significant historical periods. They investigate the problematic nature of evidence, pose increasingly complex questions about the past and formulate reasoned responses.

Students gain multi-disciplinary skills in analysing textual and visual sources, constructing arguments, challenging assumptions, and thinking both creatively and critically.

Pathways

A course of study in Ancient History can establish a basis for further education and employment in the fields of archaeology, history, education, psychology, sociology, law, business, economics, politics, journalism, the media, health and social sciences, writing, academia and research.

[Overview - Ancient History Syllabus](#)

Objectives

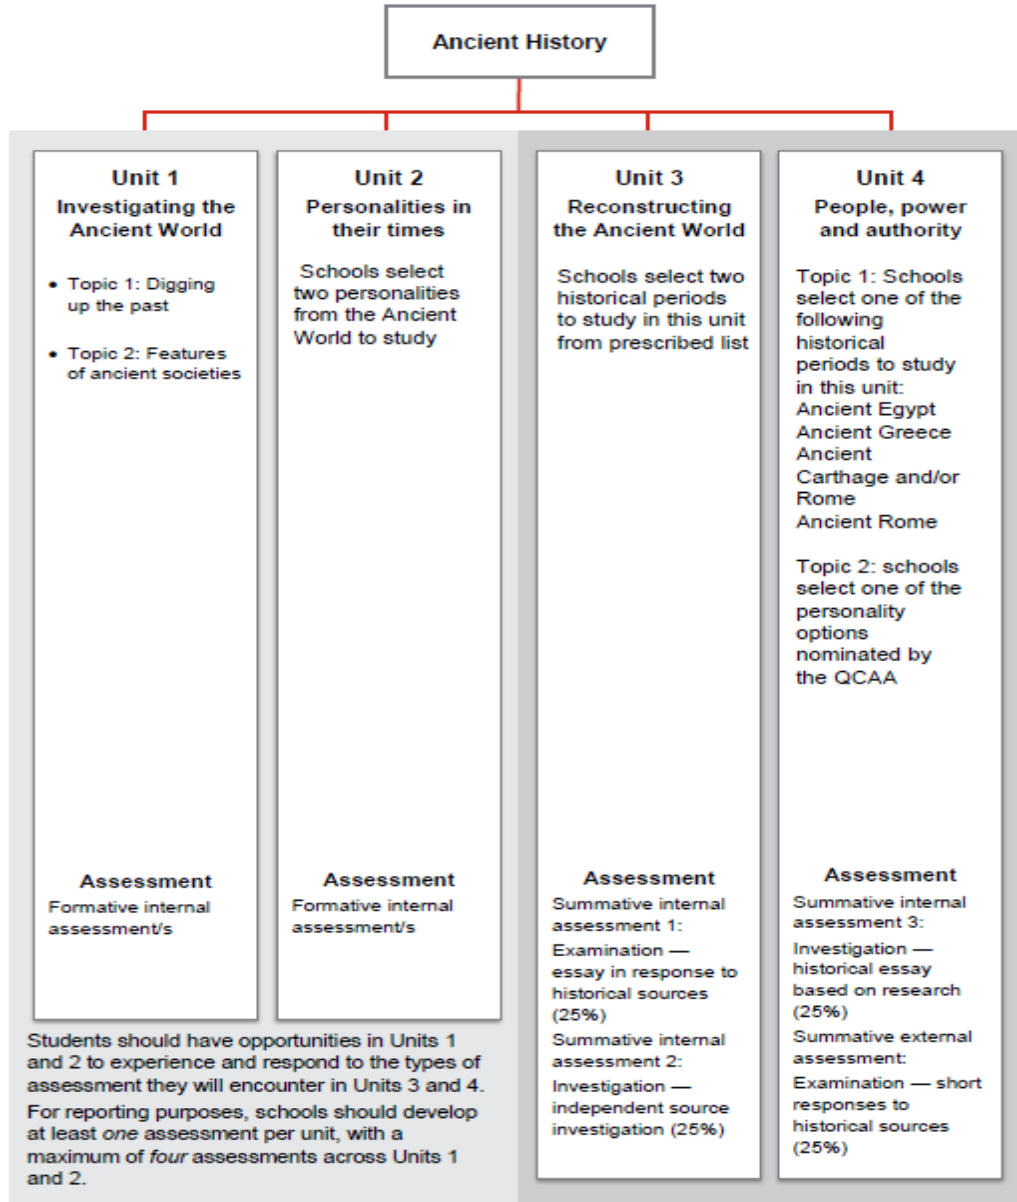

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse evidence from historical sources
- synthesise evidence from historical sources
- evaluate historical interpretations
- communicate to suite purpose.

Note

This course is offered through FisherOne as an Online course.

Figure 2: Course structure

Biology

Biology provides opportunities for students to engage with living systems.

Students develop their understanding of cells and multicellular organisms. They engage with the concept of maintaining the internal environment. They study biodiversity and the interconnectedness of life. This knowledge is linked with the concepts of heredity and the continuity of life.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society. They develop their sense of wonder and curiosity about life; respect for all living things and the environment; understanding of biological systems, concepts, theories and models; appreciation of how biological knowledge has developed over time and continues to develop; a sense of how biological knowledge influences society.

Students plan and carry out fieldwork, laboratory and other research investigations; interpret evidence; use sound, evidence-based arguments creatively and analytically when evaluating claims and applying biological knowledge; and communicate biological understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Pathways

A course of study in Biology can establish a basis for further education and employment in the fields of medicine, forensics, veterinary, food and marine sciences, agriculture, biotechnology, environmental rehabilitation, biosecurity, quarantine, conservation and sustainability.

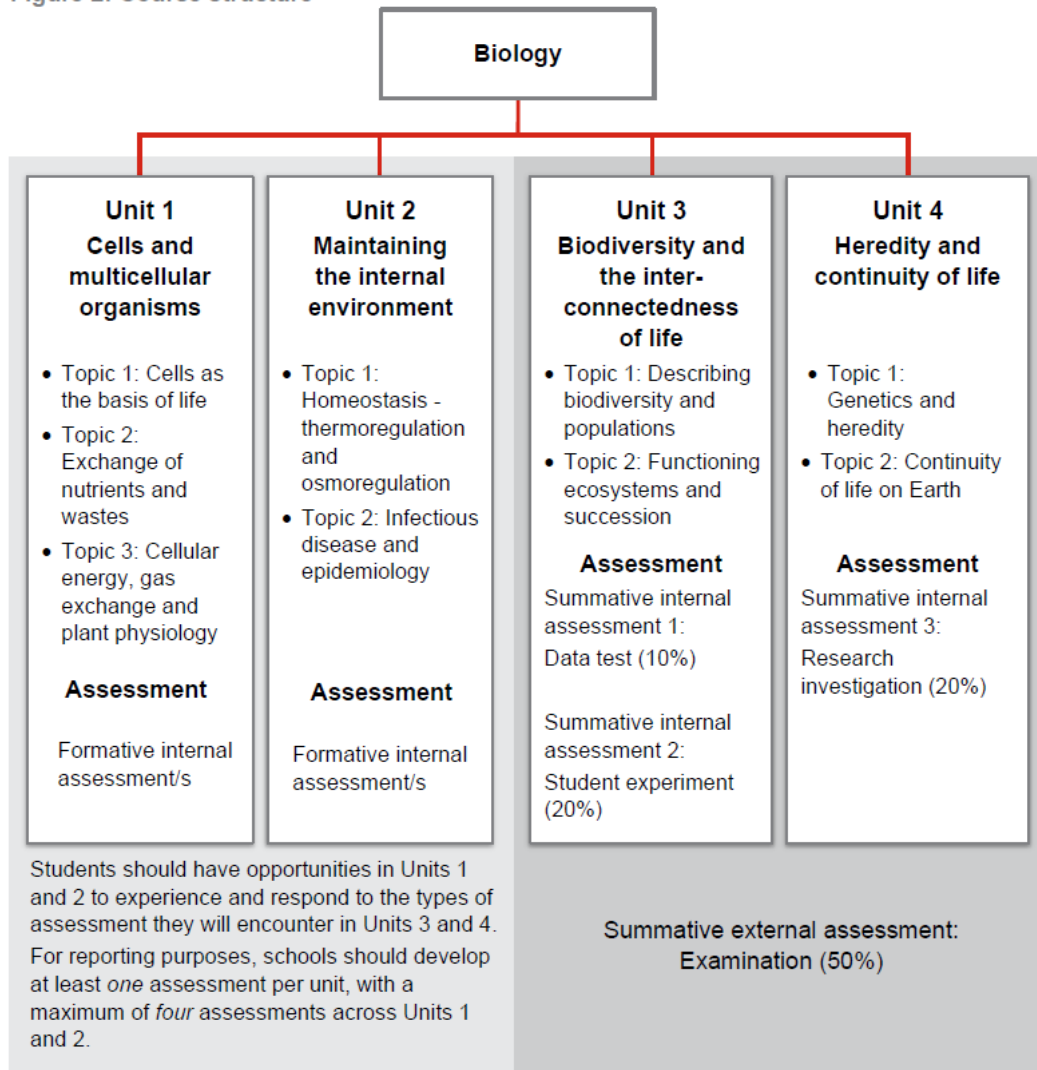

[Overview - Biology Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- describe ideas and findings
- apply understanding
- analyse data
- interpret evidence
- evaluate conclusions, claims and processes
- investigate phenomena

Figure 2: Course structure

Business

Business is a contemporary discipline with representation in every aspect of society including individuals, community and government.

Students investigate the business life cycle from the seed to post-maturity stage and develop skills in examining business data and information.

Students learn business concepts, theories and strategies relevant to leadership, management and entrepreneurship. A range of business environments and situations is explored.

Through this exploration, students investigate the influence of and implications for strategic development in the functional areas of finance, human resources, marketing and operations.

Learning in Business integrates an inquiry approach with authentic case studies. Students become critical observers of business practices by applying an inquiry process in undertaking investigations of business situations. They use a variety of technological, communication and analytical tools to comprehend, analyse and interpret business data and information. Students evaluate strategies using business criteria that are flexible, adaptable and underpinned by communication, leadership, creativity and sophistication of thought.

Pathways

A course of study in Business can establish a basis for further education and employment in the fields of business, economics, finance, management, leadership, international business, marketing and communications

Objectives

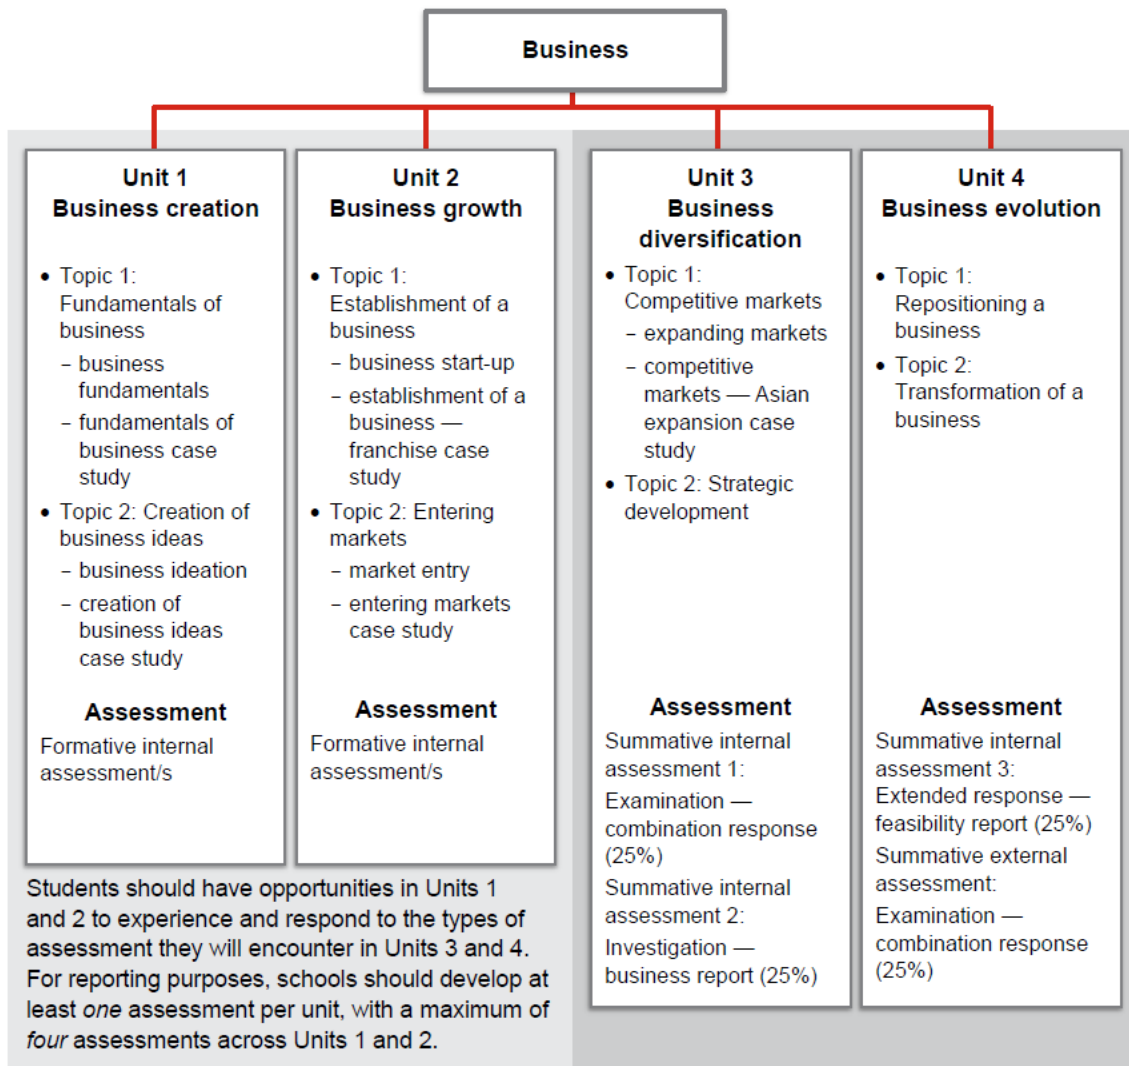

By the conclusion of the course of study, students will:

- describe business situations and environments.
- Explain business concepts and strategies
- analyse and interpret business situations
- evaluate business strategies
- create responses that communicate meaning to suit audience, context and purpose

Note

This course is being offered new at San Sisto College in 2025.

Overview - Business Syllabus

Chemistry

Chemistry is the study of materials and their properties and structure.

Students study atomic theory, chemical bonding, and the structure and properties of elements and compounds. They explore intermolecular forces, gases, aqueous solutions, acidity and rates of reaction. They study equilibrium processes and redox reactions. They explore organic chemistry, synthesis and design to examine the characteristic chemical properties and chemical reactions displayed by different classes of organic compounds.

Students develop their appreciation of chemistry and its usefulness; understanding of chemical theories, models and chemical systems; expertise in conducting scientific investigations. They critically evaluate and debate scientific arguments and claims in order to solve problems and generate informed, responsible and ethical conclusions, and communicate chemical understanding and findings through the use of appropriate representations, language and nomenclature.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Chemistry can establish a basis for further education and employment in the fields of forensic science, environmental science, engineering, medicine, pharmacy and sports science.

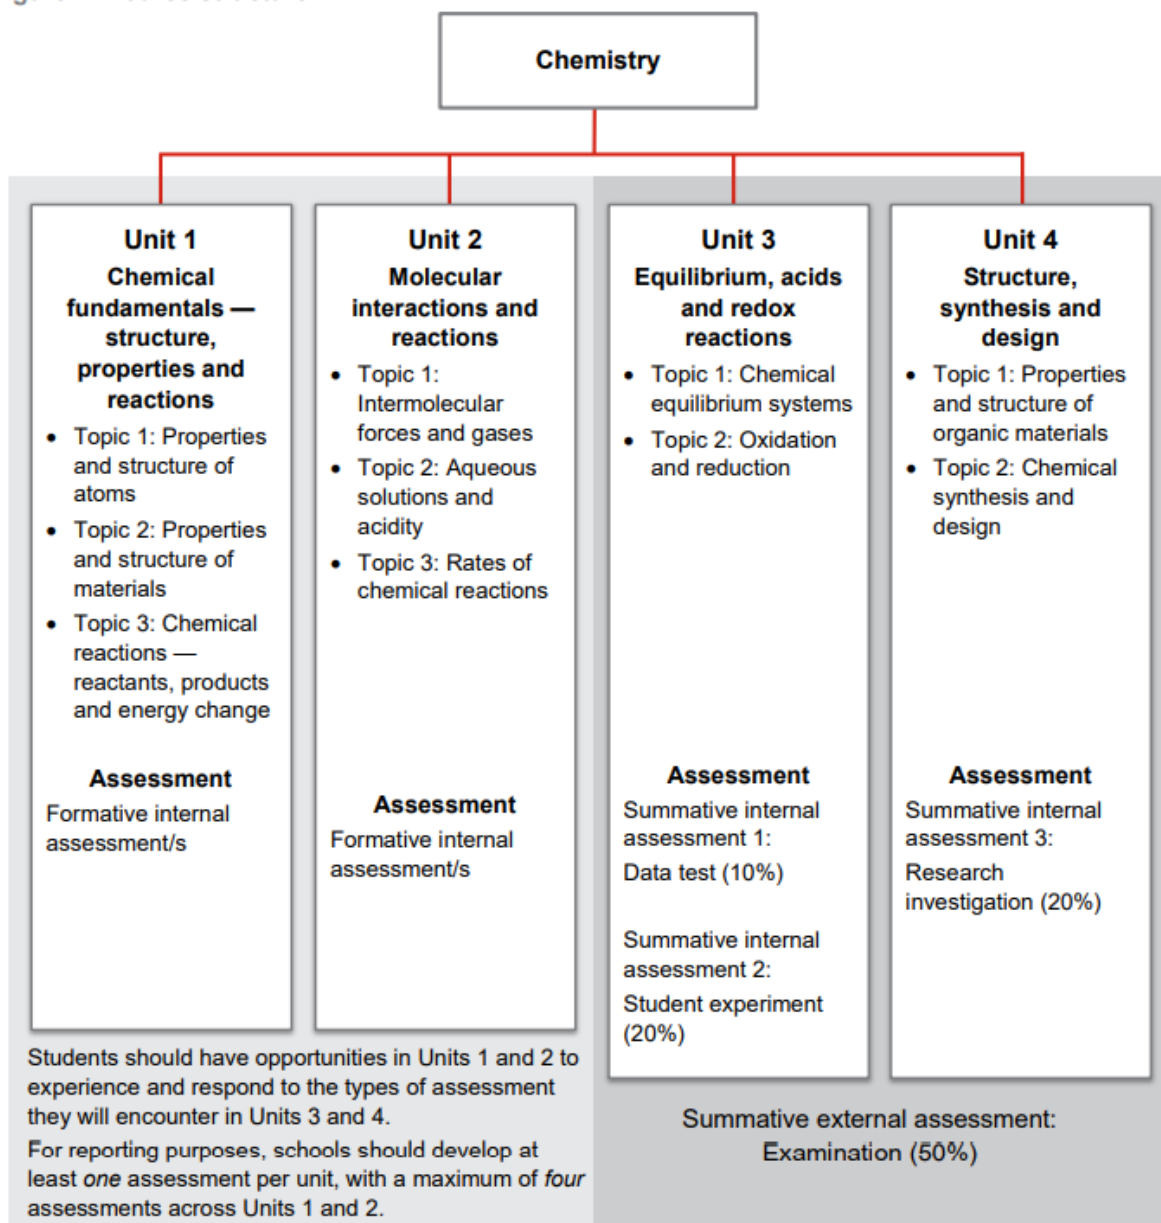

[Overview - Chemistry Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- describe ideas and findings
- apply understanding
- analyse data
- interpret evidence
- evaluate conclusions, claims and processes
- investigate phenomena

Figure 2: Course structure

Design

The Design subject focuses on the application of design thinking to envisage creative products, services and environments in response to human needs, wants and opportunities. Designing is a complex and sophisticated form of problem-solving that uses divergent and convergent thinking strategies that can be practised and improved. Designers are separated from the constraints of production processes to allow them to appreciate and exploit innovative ideas.

Students will learn how design has influenced the economic, social and cultural environment in which they live. They understand the agency of humans in conceiving and imagining possible futures through design.

Collaboration, teamwork and communication are crucial skills needed to work in design teams and liaise with stakeholders. They learn the value of creativity and build resilience as they experience iterative design processes, where the best ideas may be the result of trial and error and a willingness to take risks and experiment with alternatives.

Students learn about and experience design through exploring needs, wants and opportunities; developing ideas and design concepts; using drawing and low fidelity prototyping skills; and evaluating ideas and design concepts. They communicate design proposals to suit different audiences.

Pathways

A course of study in Design can establish a basis for further education and employment in the fields of architecture, digital media design, fashion design, graphic design, industrial design, interior design and landscape architecture.

Objectives

By the conclusion of the course of study, students will:

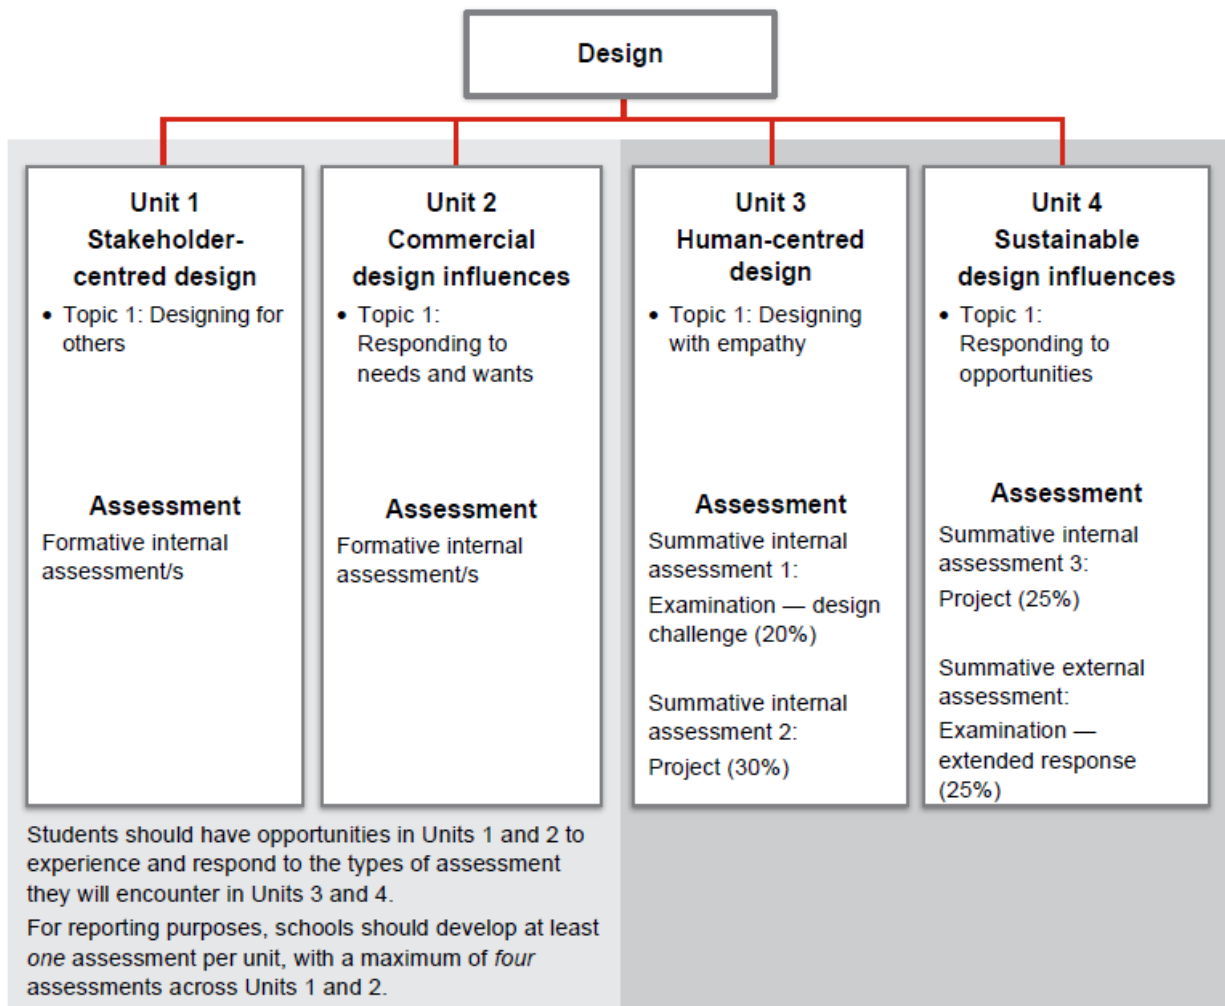

- describe design problems and design criteria
- represent ideas, design concepts and design information using visual representation skills
- analyse needs, wants and opportunities using data
- devise ideas in response to design problems
- propose design concepts in response to design problems
- evaluate ideas to make refinements
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Note

This course is offered through FisherOne as an Online course.

[Overview - Design Syllabus](#)

Figure 2: Course structure

Digital Solutions

Digital Solutions enables students to learn about algorithms, computer languages and user interfaces through generating digital solutions to problems. Students engage with data, information and applications to create digital solutions that filter and present data in timely and efficient ways while understanding the need to encrypt and protect data. They understand computing's personal, local and global impact, and the issues associated with the ethical integration of technology into our daily lives.

Students use problem-based learning to write computer programs to create digital solutions that: use data; require interactions with users and within systems; and affect people, the economy and environments. They develop solutions using combinations of readily available hardware and software development environments, code libraries or specific instructions provided through programming.

Students create, construct and repurpose solutions that are relevant in a world where data and digital realms are transforming entertainment, education, business, manufacturing and many other industries.

Pathways

A course of study in Digital Solutions can establish a basis for further education and employment in the fields of science, technologies, engineering and mathematics.

Overview - Digital Solutions

Objectives

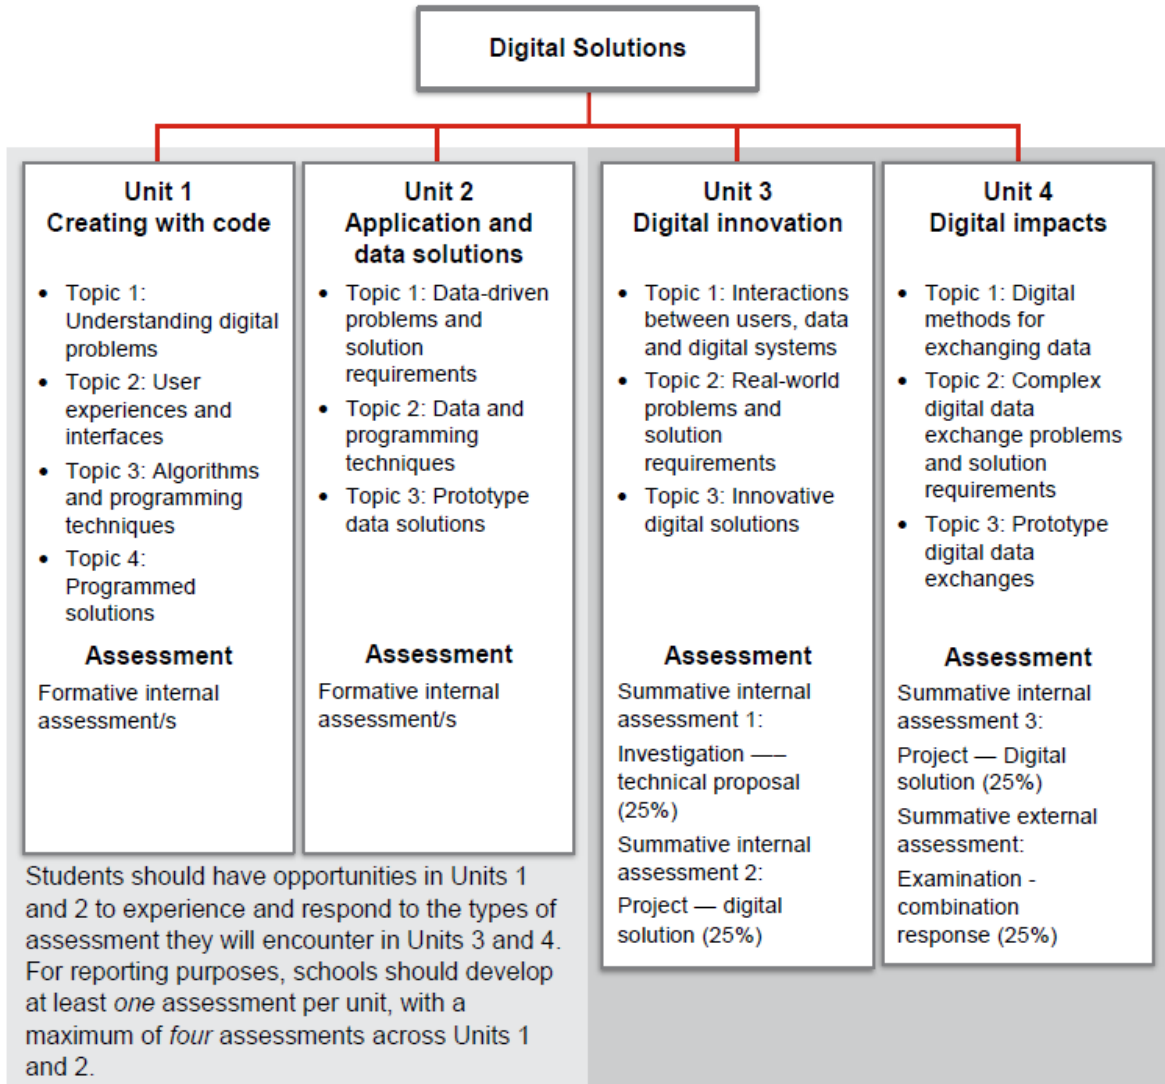

By the conclusion of the course of study, students will:

- recognise and describe elements, components, principles and processes
- symbolise and explain information, ideas and interrelationships
- analyse problems and information
- determine solution requirements and criteria
- synthesise information and ideas to determine possible digital solutions
- generate components of the digital solution
- evaluate impacts, components and solutions against criteria to make refinements and justified recommendations
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Note

This course is offered through FisherOne as an Online course.

Figure 2: Course structure

Drama

Drama fosters creative and expressive communication. It interrogates the human experience by investigating, communicating and embodying stories, experiences, emotions and ideas that reflect the human experience. It engages students in imaginative meaning-making processes and involves them using a range of artistic skills as they make and respond to dramatic works.

Students experience, reflect on, understand, communicate, collaborate and appreciate different perspectives of themselves, others and the world in which they live. They learn about the dramatic languages and how these contribute to the creation, interpretation and critique of dramatic action and meaning for a range of purposes. They study a range of forms, styles and their conventions in a variety of inherited traditions, current practice and emerging trends, including those from different cultures and contexts.

Students learn how to engage with dramatic works as both artists and audience through the use of critical literacies. The study of drama develops students' knowledge, skills and understanding in the making of and responding to dramatic works to help them realise their creative and expressive potential as individuals. Students learn to pose and solve problems and work independently and collaboratively.

Pathways

A course of study in Drama can establish a basis for further education and employment in the field of drama, and to broader areas in creative industries and cultural institutions, including arts administration and management, communication, education, public relations, research and science and technology.

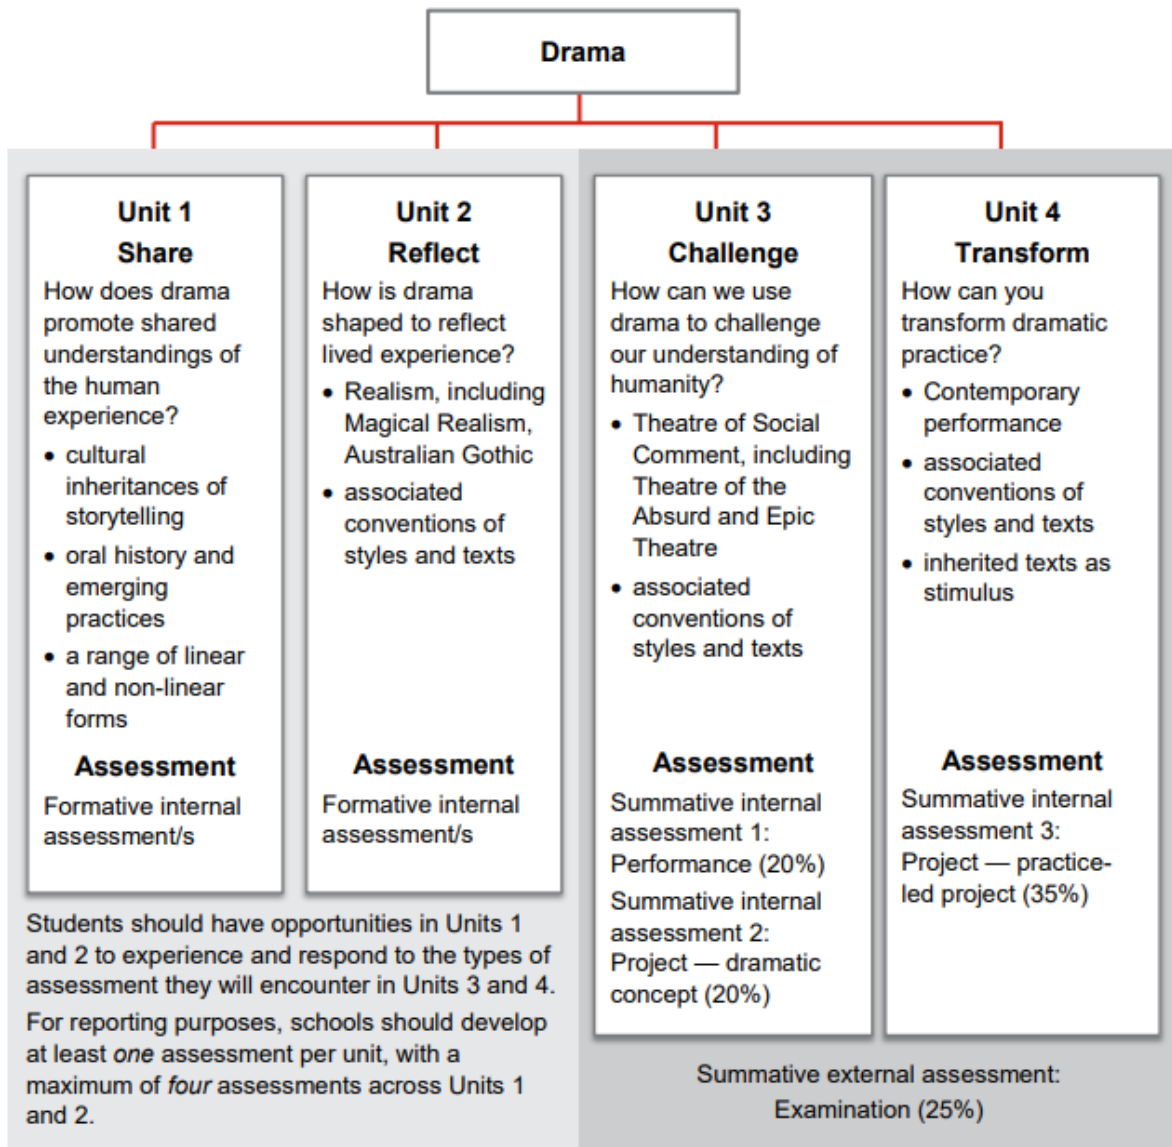

[Overview - Drama Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- demonstrate an understanding of dramatic languages
- apply literacy skills
- apply and structure dramatic languages
- interpret purpose, context and text to communicate dramatic meaning
- manipulate dramatic languages to create dramatic action and meaning
- analyse how dramatic languages are used to create dramatic action and meaning
- evaluate and justify the use of dramatic languages to communicate dramatic meaning
- synthesise and argue a position about dramatic action and meaning

Figure 2: Course structure

Economics

Economics encourages students to think deeply about the global challenges facing individuals, business and government, including how to allocate and distribute scarce resources to maximise well-being.

Students develop knowledge and cognitive skills to comprehend, apply analytical processes and use economic knowledge. They examine data and information to determine validity and consider economic policies from various perspectives. They use economic models and analytical tools to investigate and evaluate outcomes to draw conclusions.

Students study opportunity costs, economic models and the market forces of demand and supply. They dissect and interpret the complex nature of international economic relationships and the dynamics of Australia's place in the global economy. They develop intellectual flexibility, digital literacy and economic thinking skills.

Pathways

A course of study in Economics can establish a basis for further education and employment in the fields of economics, econometrics, management, data analytics, business, accounting, finance, actuarial science, law and political science.

Economics is an excellent complement for students who want to solve real-world science or environmental problems and participate in government policy debates. It provides a competitive advantage for career options where students are aiming for management roles and developing their entrepreneurial skills to create business opportunities as agents of innovation.

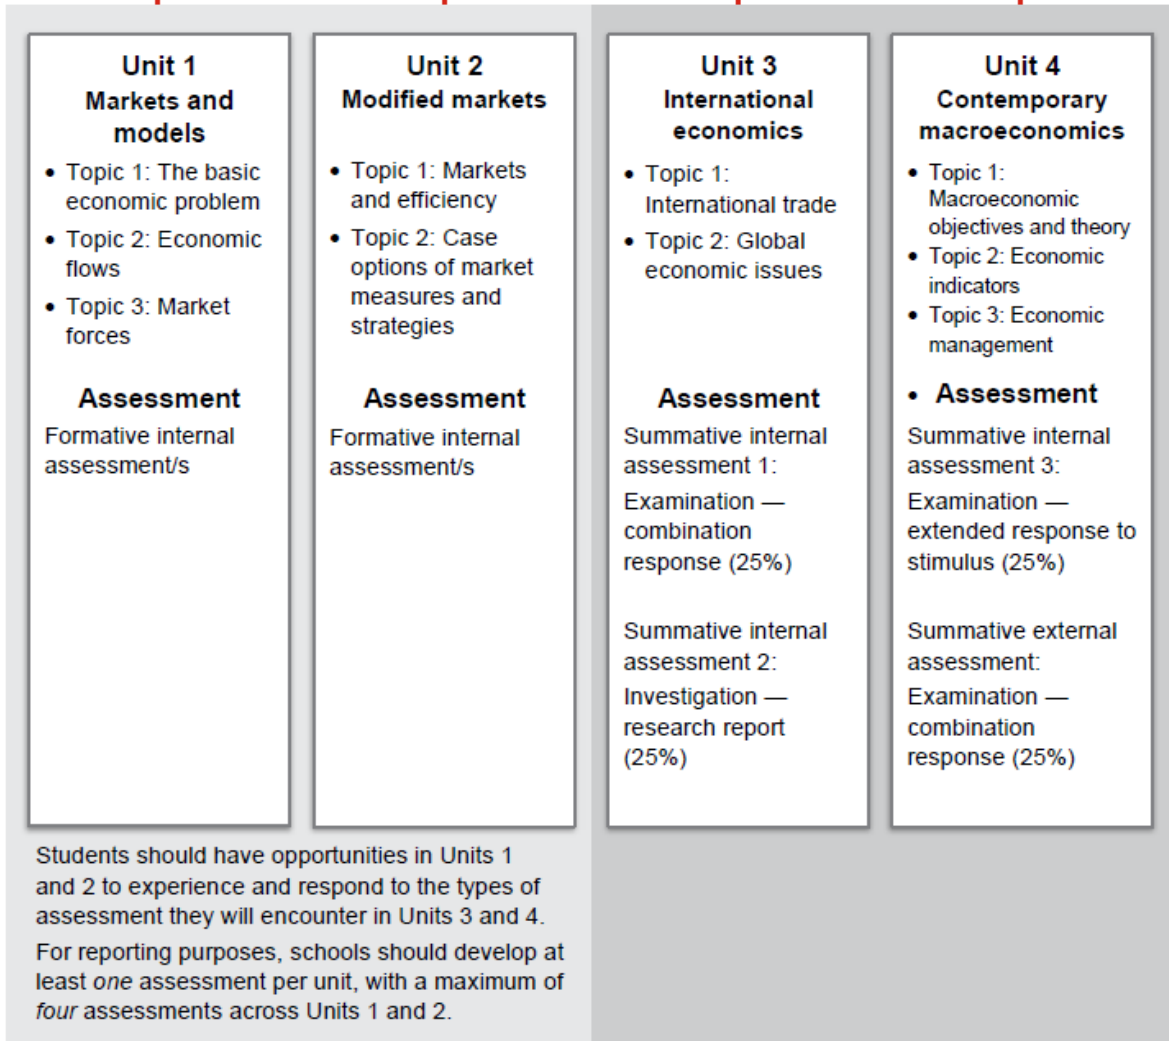

Objectives

By the conclusion of the course of study, students will:

- comprehend economic concepts, principles and models
- select data and economic information from sources
- analyse economic issues
- evaluate economic outcomes
- create responses that communicate economic meaning.

Overview - Economics Syllabus

Economics

English focuses on the study of both literary texts and non-literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied texts.

Students are offered opportunities to interpret and create texts for personal, cultural, social and aesthetic purposes. They learn how language varies according to context, purpose and audience, content, modes and mediums, and how to use it appropriately and effectively for a variety of purposes. Students have opportunities to engage with diverse texts to help them develop a sense of themselves, their world and their place in it.

Students communicate effectively in Standard Australian English for the purposes of responding to and creating texts. They make choices about generic structures, language, textual features and technologies for participating actively in literary analysis and the creation of texts in a range of modes, mediums and forms, for a variety of purposes and audiences. They explore how literary and non-literary texts shape perceptions of the world and consider ways in which texts may reflect or challenge social and cultural ways of thinking and influence audiences.

Pathways

A course of study in English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

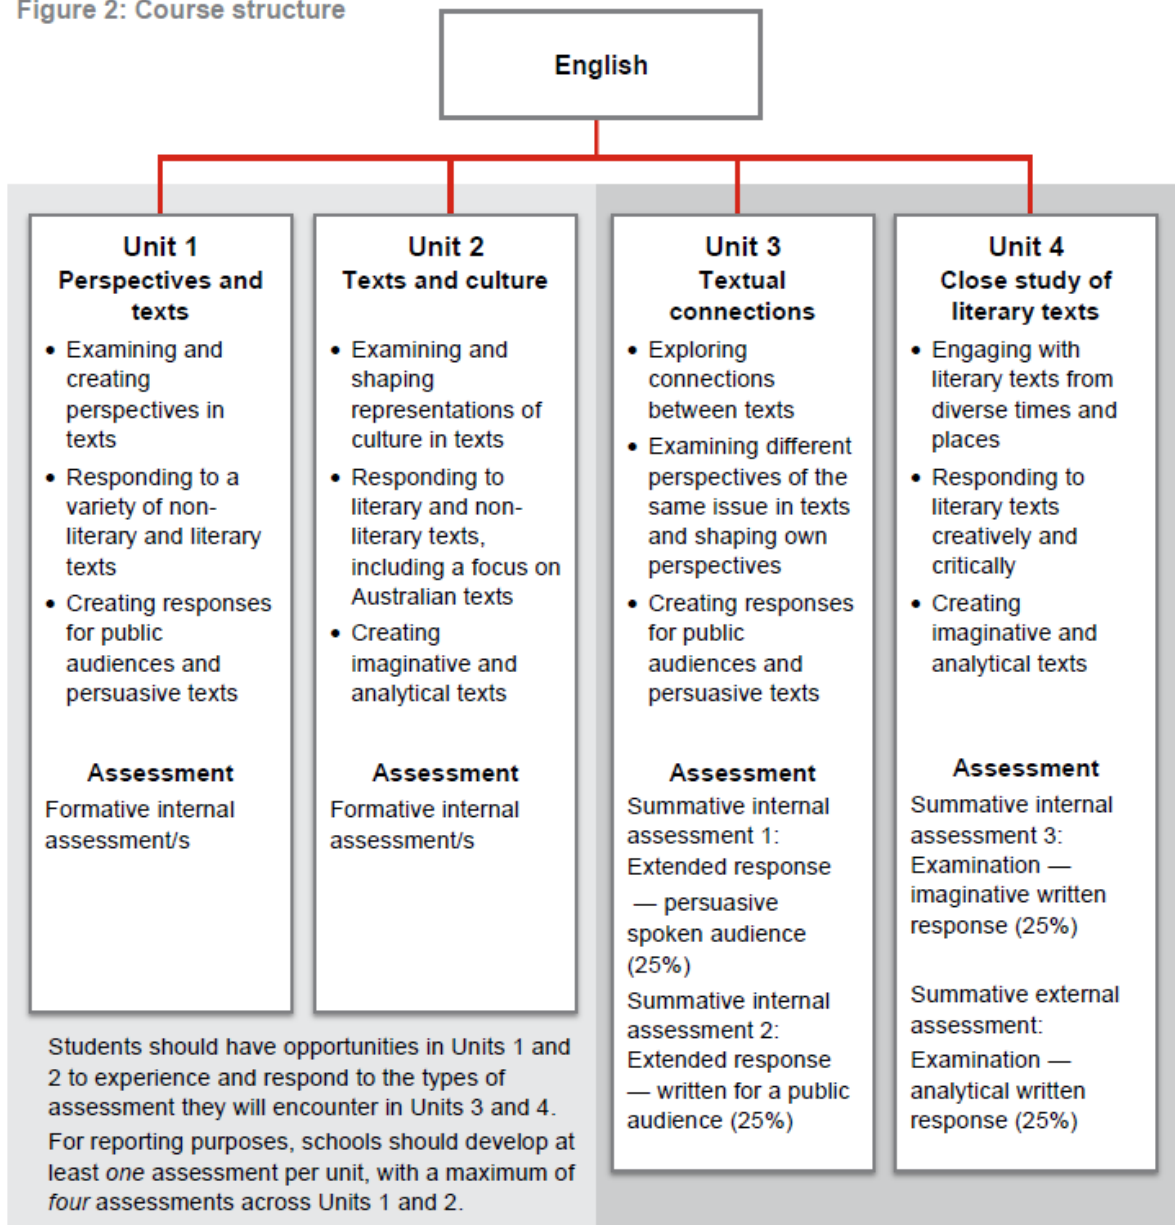

[Overview - English Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

Figure 2: Course structure

Food & Nutrition

Food & Nutrition is the study of food in the context of food science, nutrition and food technologies, considering overarching concepts of waste management, sustainability and food protection.

Students explore the chemical and functional properties of nutrients to create food solutions that maintain the beneficial nutritive values. This knowledge is fundamental for continued development of a safe and sustainable food system that can produce high quality, nutritious solutions with an extended shelf life. Their studies of the food system include the sectors of production, processing, distribution, consumption, research and development.

Students actively engage in a food and nutrition problem-solving process to create food solutions that contribute positively to preferred personal, social, ethical, economic, environmental, legal, sustainable and technological futures.

Pathways

A course of study in Food & Nutrition can establish a basis for further education and employment in the fields of science, technology, engineering and health.

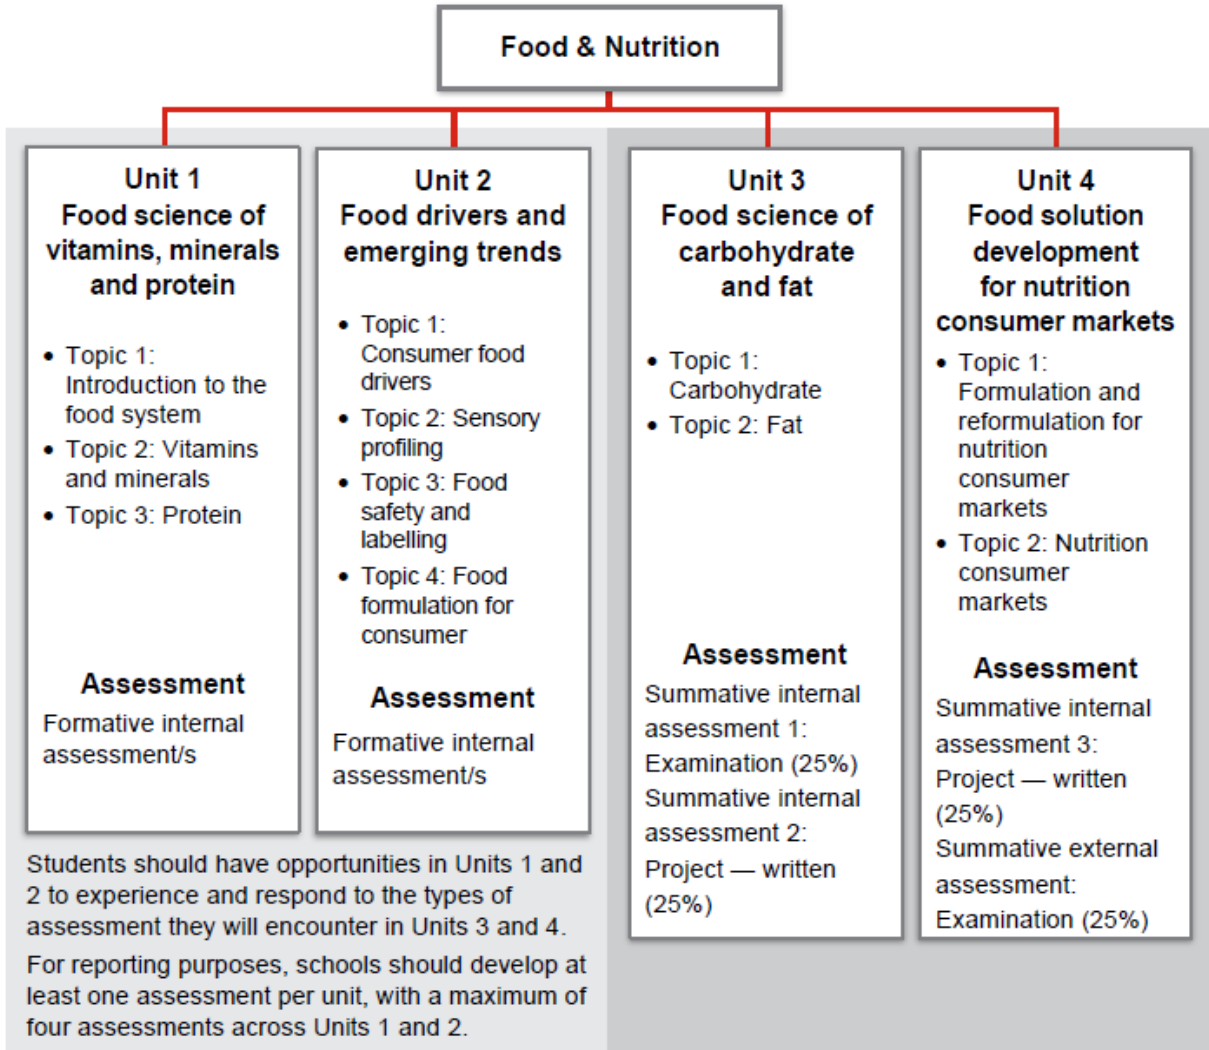

Overview - Food & Nutrition Syllabus

Objectives

By the conclusion of the course of study, students will:

- recognise and describe food and nutrition facts and principles
- explain food and nutrition ideas and problems
- analyse problems, information and data
- determine solution requirements and criteria
- synthesise information and data
- generate solutions to provide data to determine the feasibility of the solution
- evaluate and refine ideas and solutions to make justified recommendations for enhancement
- make decisions about and use mode-appropriate features, language and conventions for particular purposes and contexts.

Figure 2: Course structure

Geography

Geography focuses on the significance of 'place' and 'space' in understanding our world. Students engage in a range of learning experiences that develop their geographical skills and thinking through the exploration of geographical challenges and their effects on people, places and the environment.

Students investigate places in Australia and across the globe to observe and measure spatial, environmental, economic, political, social and cultural factors. They interpret global concerns and challenges including responding to risk in hazard zones, planning sustainable places, managing land cover transformations and planning for population change. They develop an understanding of the complexities involved in sustainable planning and management practices.

Students observe, gather, organise, analyse and present data and information across a range of scales. They engage in real-world applications of geographical skills and thinking, including the collection and representation of data.

Pathways

A course of study in Geography can establish a basis for further education and employment in the fields of urban and environmental design, planning and management; biological and environmental science; conservation and land management; emergency response and hazard management; oceanography, surveying, global security, economics, business, law, engineering, architecture, information technology, and science.

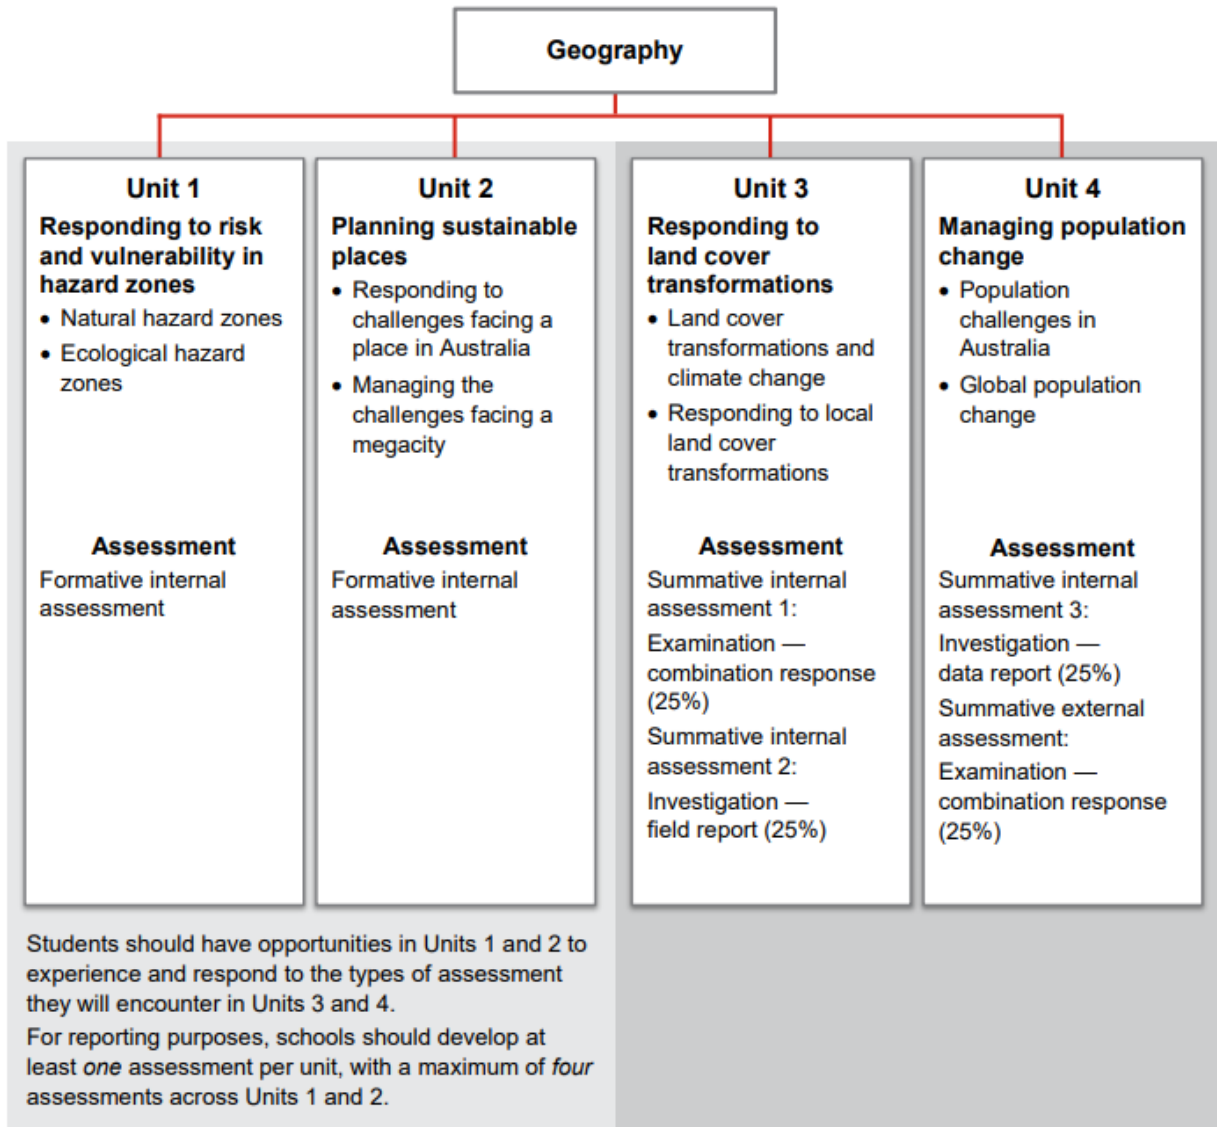

[Overview - Geography Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- explain geographical processes
- comprehend geographic patterns
- analyse geographical data and information
- apply geographical understanding
- synthesise information from the analysis to propose action
- communicate geographical understanding.

Figure 2: Course structure

Health

The Health syllabus provides students with a contextualised strengths-based inquiry of the various determinants that create and promote lifelong health, learning and active citizenship. Drawing from the health, behavioural, social and physical sciences, the Health syllabus offers students an action, advocacy and evaluation-oriented curriculum. Embedded in Health is the Health inquiry model that provides the conceptual framework for this syllabus.

The Health syllabus is developmental and becomes increasingly more complex across the four units through the use of overarching approaches, frameworks and resources. This syllabus is underpinned by a salutogenic (strengths-based) approach, which focuses on how health resources are accessed and enhanced. Resilience as a personal health resource in Unit 1, establishes key teaching and learning concepts, which build capacity for the depth of understanding over the course of study. Unit 2 focuses on the role and influence of peers and family as resources through one topic selected from two choices: Elective topic 1: Alcohol, or Elective topic 2: Body image. Unit 3 explores the role of the community in shaping resources through one topic selected from three choices: Elective topic 1: Homelessness, Elective topic 2: Road safety, or Elective topic 3: Anxiety. The culminating unit challenges students to investigate and evaluate innovations that influence respectful relationships to help them navigate the post-schooling life-course transition.

Health uses an inquiry approach informed by the critical analysis of health information to investigate sustainable health change at personal, peer, family and community levels. Students define and understand broad health topics, which they reframe into specific contextualised health issues for further investigation. Students plan, implement, evaluate and reflect on action strategies that mediate, enable and advocate change through health promotion.

Overview - Health Syllabus

Pathways

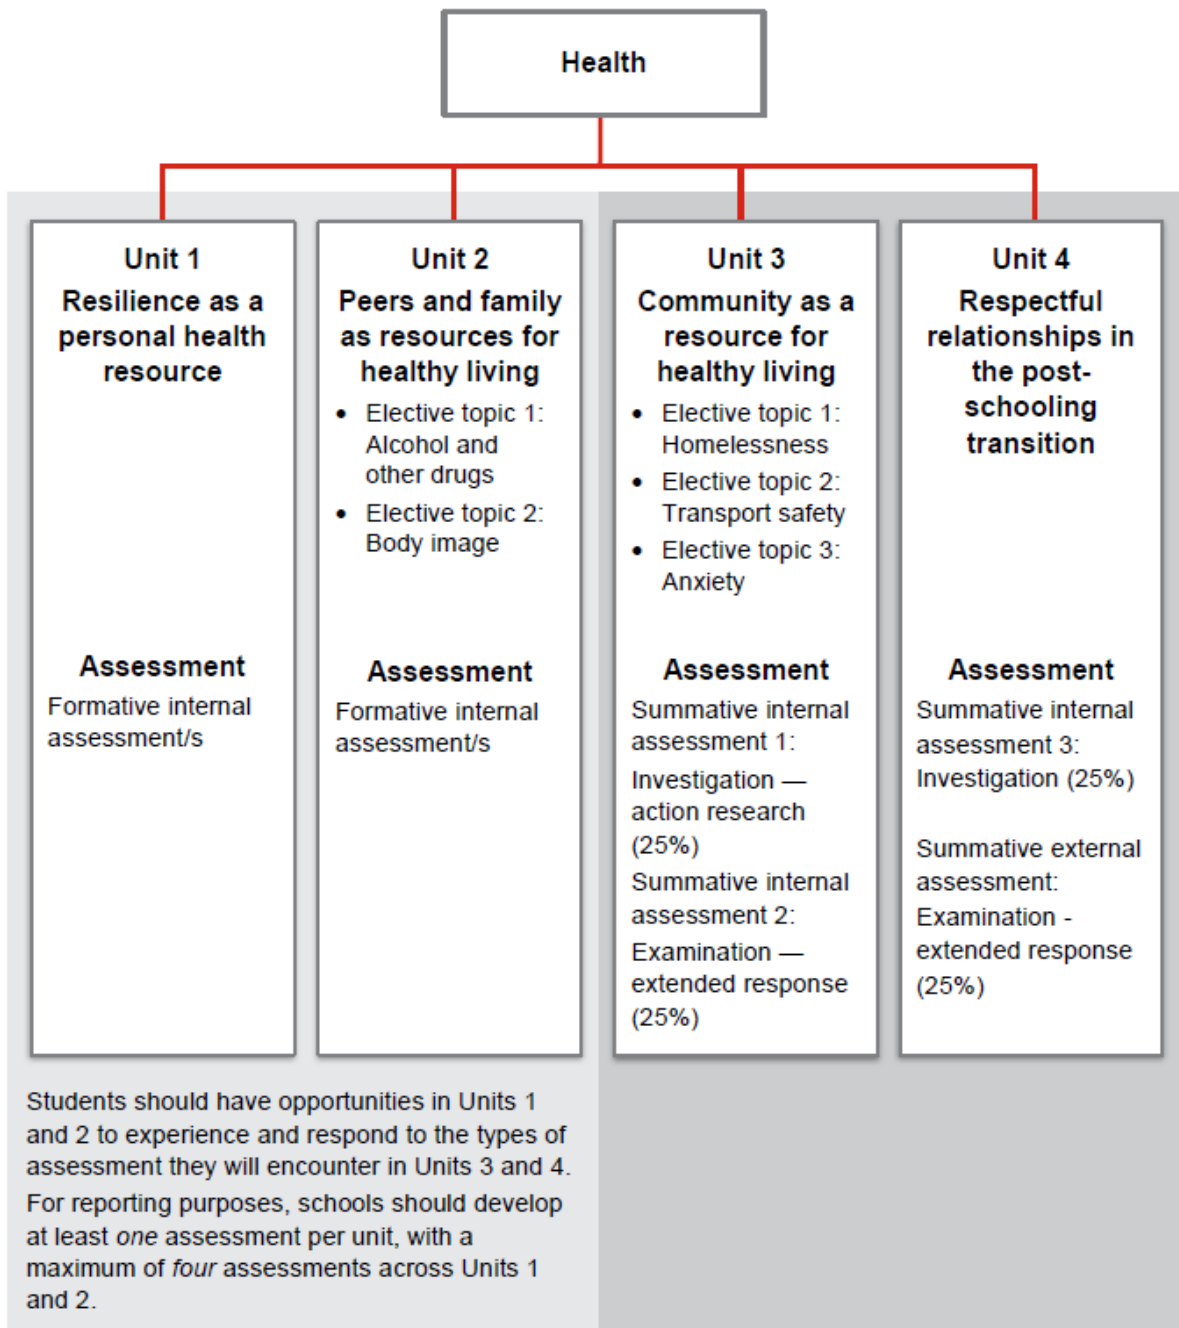

Health is a General subject suited to students who are interested in pathways beyond school that lead to tertiary studies, vocational education or work. A course of study in Health can establish a basis for further education and employment in the fields of health science, public health, health education, allied health, nursing and medical professions.

Objectives

By the conclusion of the course of study, students will:

- recognise and describe information about health-related topics and issues
- comprehend and use the Health inquiry model
- analyse and interpret information to draw conclusions about health-related topics and issues
- investigate and synthesise information to develop action strategies
- evaluate and reflect on implemented action strategies to justify recommendations that mediate, advocate and enable health promotion
- organise information for particular purposes
- make decisions about the use mode-appropriate features, language and conventions for particular purposes and contexts.

Figure 2: Course structure

Italian

Italian provides students with the opportunity to reflect on their understanding of the Italian language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students participate in a range of interactions in which they exchange meaning, develop intercultural understanding and become active participants in understanding and constructing written, spoken and visual texts.

Students communicate with people from Italian-speaking communities to understand the purpose and nature of language and to gain understanding of linguistic structures. They acquire language in social and cultural settings and communicate across a range of contexts for a variety of purposes.

Students experience and evaluate a range of different text types; reorganise their thinking to accommodate other linguistic and intercultural knowledge and textual conventions; and create texts for a range of contexts, purposes and audiences.

Pathways

A course of study in Italian can establish a basis for further education and employment in many professions and industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

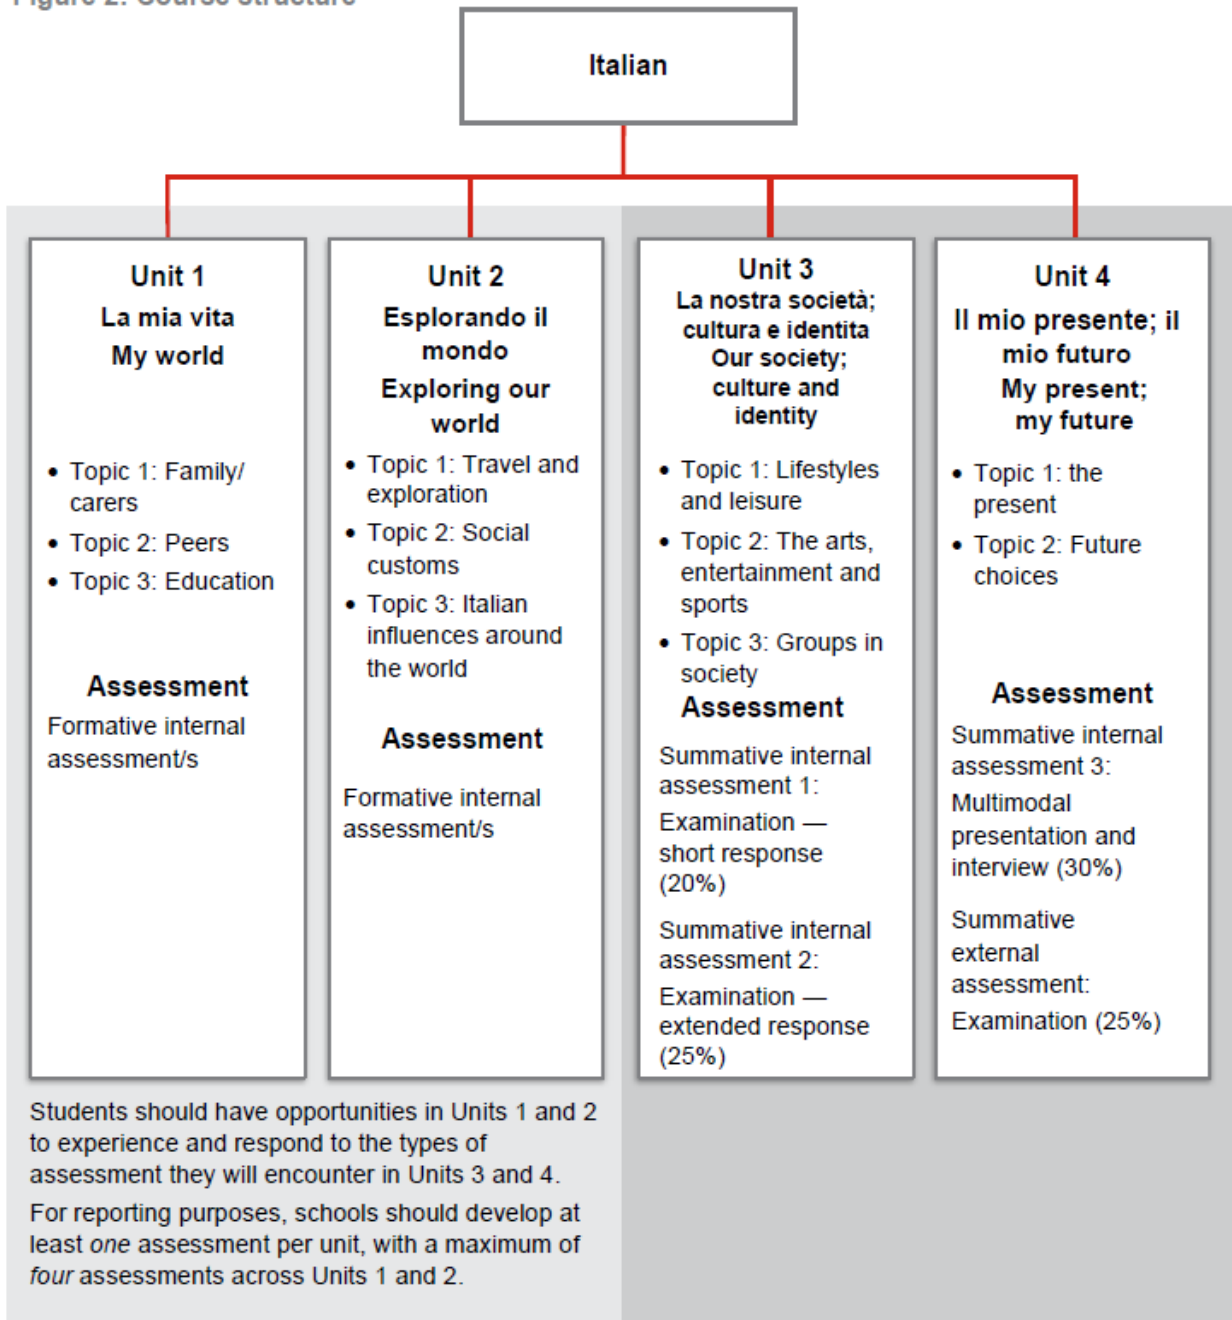

Objectives

By the conclusion of the course of study, students will:

- comprehend Italian to understand information, ideas, opinions and experiences
- identify tone, purpose, context and audience to infer meaning
- analyse and evaluate information and ideas to draw conclusions
- apply knowledge of language elements of Italian to construct meaning
- structure, sequence and synthesise information to justify opinions and perspectives
- communicate using contextually appropriate Italian

[Overview - Italian Syllabus](#)

Figure 2: Course structure

Japanese

Japanese provides students with the opportunity to reflect on their understanding of the Japanese language and the communities that use it, while also assisting in the effective negotiation of experiences and meaning across cultures and languages. Students participate in a range of interactions in which they exchange meaning, develop intercultural understanding and become active participants in understanding and constructing written, spoken and visual texts.

Students communicate with people from Japanese-speaking communities to understand the purpose and nature of language and to gain understanding of linguistic structures. They acquire language in social and cultural settings and communicate across a range of contexts for a variety of purposes.

Students experience and evaluate a range of different text types; reorganise their thinking to accommodate other linguistic and intercultural knowledge and textual conventions; and create texts for a range of contexts, purposes and audiences.

Pathways

A course of study in Japanese can establish a basis for further education and employment in many professions and industries, particularly those where the knowledge of an additional language and the intercultural understanding it encompasses could be of value, such as business, hospitality, law, science, technology, sociology and education.

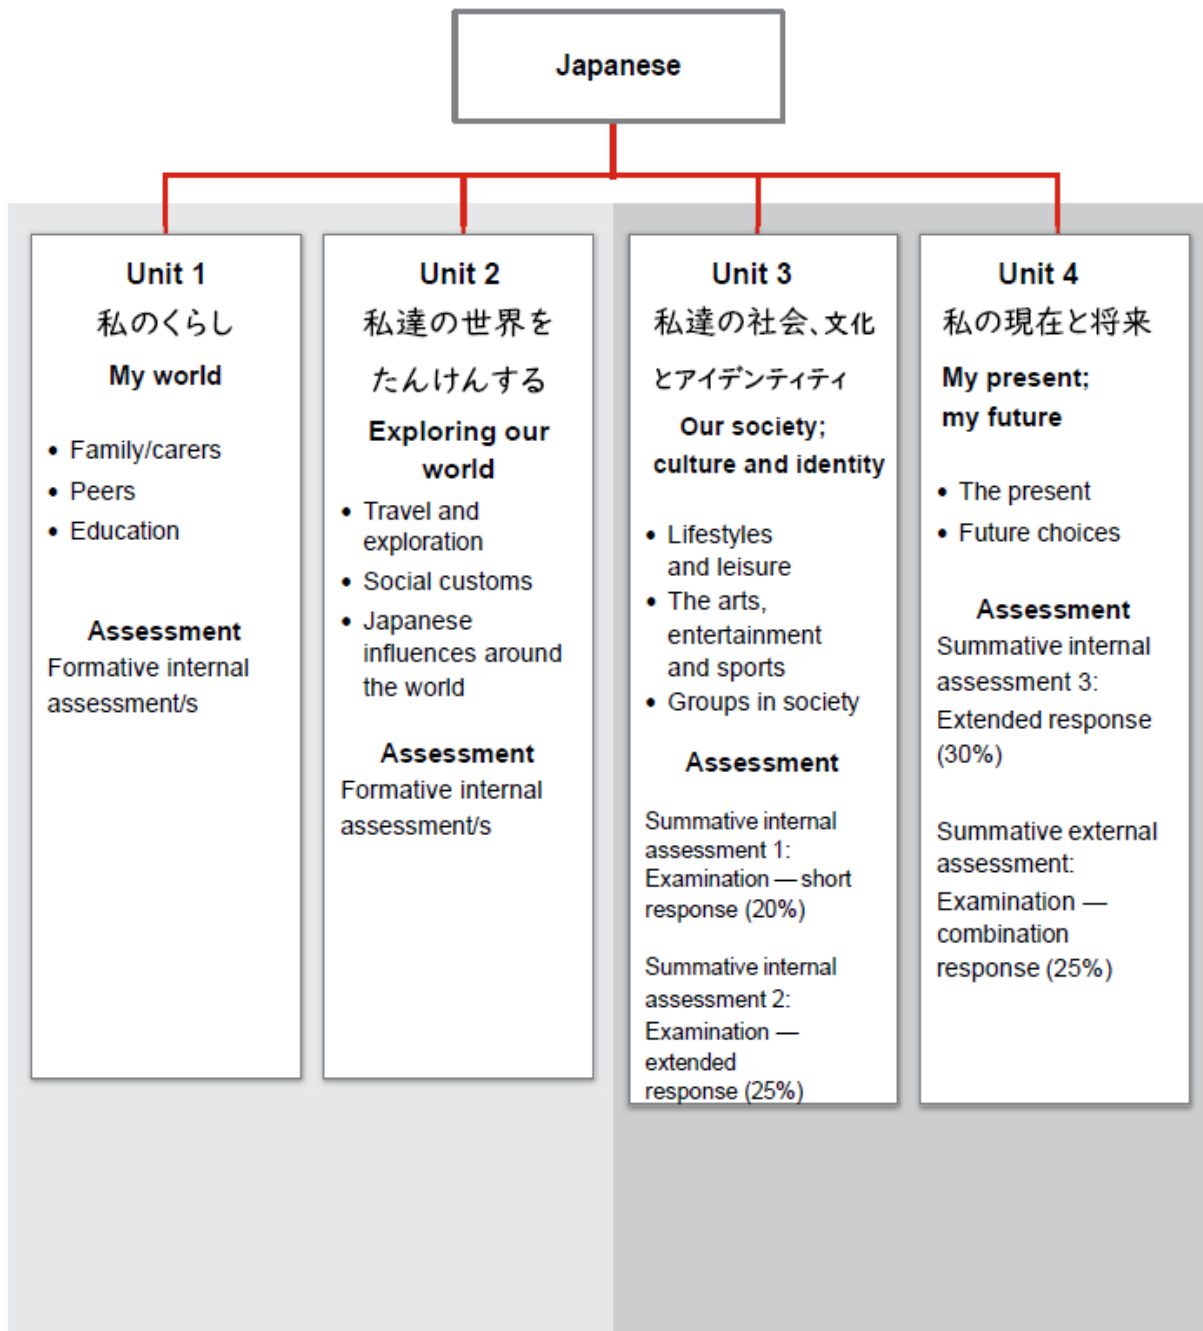

Objectives

By the conclusion of the course of study, students will:

- comprehend Japanese to understand information, ideas, opinions and experiences
- identify tone, purpose, context and audience to infer meaning, values and attitudes
- analyse and evaluate information and ideas to draw conclusions
- apply knowledge of Japanese language elements, structures and textual conventions to convey meaning appropriate to context, purpose, audience and cultural conventions
- structure, sequence and synthesise information to justify opinions, ideas and perspectives
- communicate using contextually appropriate Japanese

Overview - Japanese Syllabus

Figure 2: Course structure

Legal Studies

Legal Studies focuses on the interaction between society and the discipline of law and explores the role and development of law in response to current issues. Students study the legal system and how it regulates activities and aims to protect the rights of individuals, while balancing these with obligations and responsibilities.

Students study the foundations of law, the criminal justice process and the civil justice system. They critically examine issues of governance, explore contemporary issues of law reform and change, and consider Australian and international human rights issues.

Students develop skills of inquiry, critical thinking, problem-solving and reasoning to make informed and ethical decisions and recommendations. They identify and describe legal issues, explore information and data, analyse, evaluate to make decisions or propose recommendations, and create responses that convey legal meaning. They question, explore and discuss tensions between changing social values, justice and equitable outcomes.

Pathways

A course of study in Legal Studies can establish a basis for further education and employment in the fields of law, law enforcement, criminology, justice studies and politics. The knowledge, skills and attitudes students gain are transferable to all discipline areas and post-schooling tertiary pathways. The research and analytical skills this course develops are universally valued in business, health, science and engineering industries.

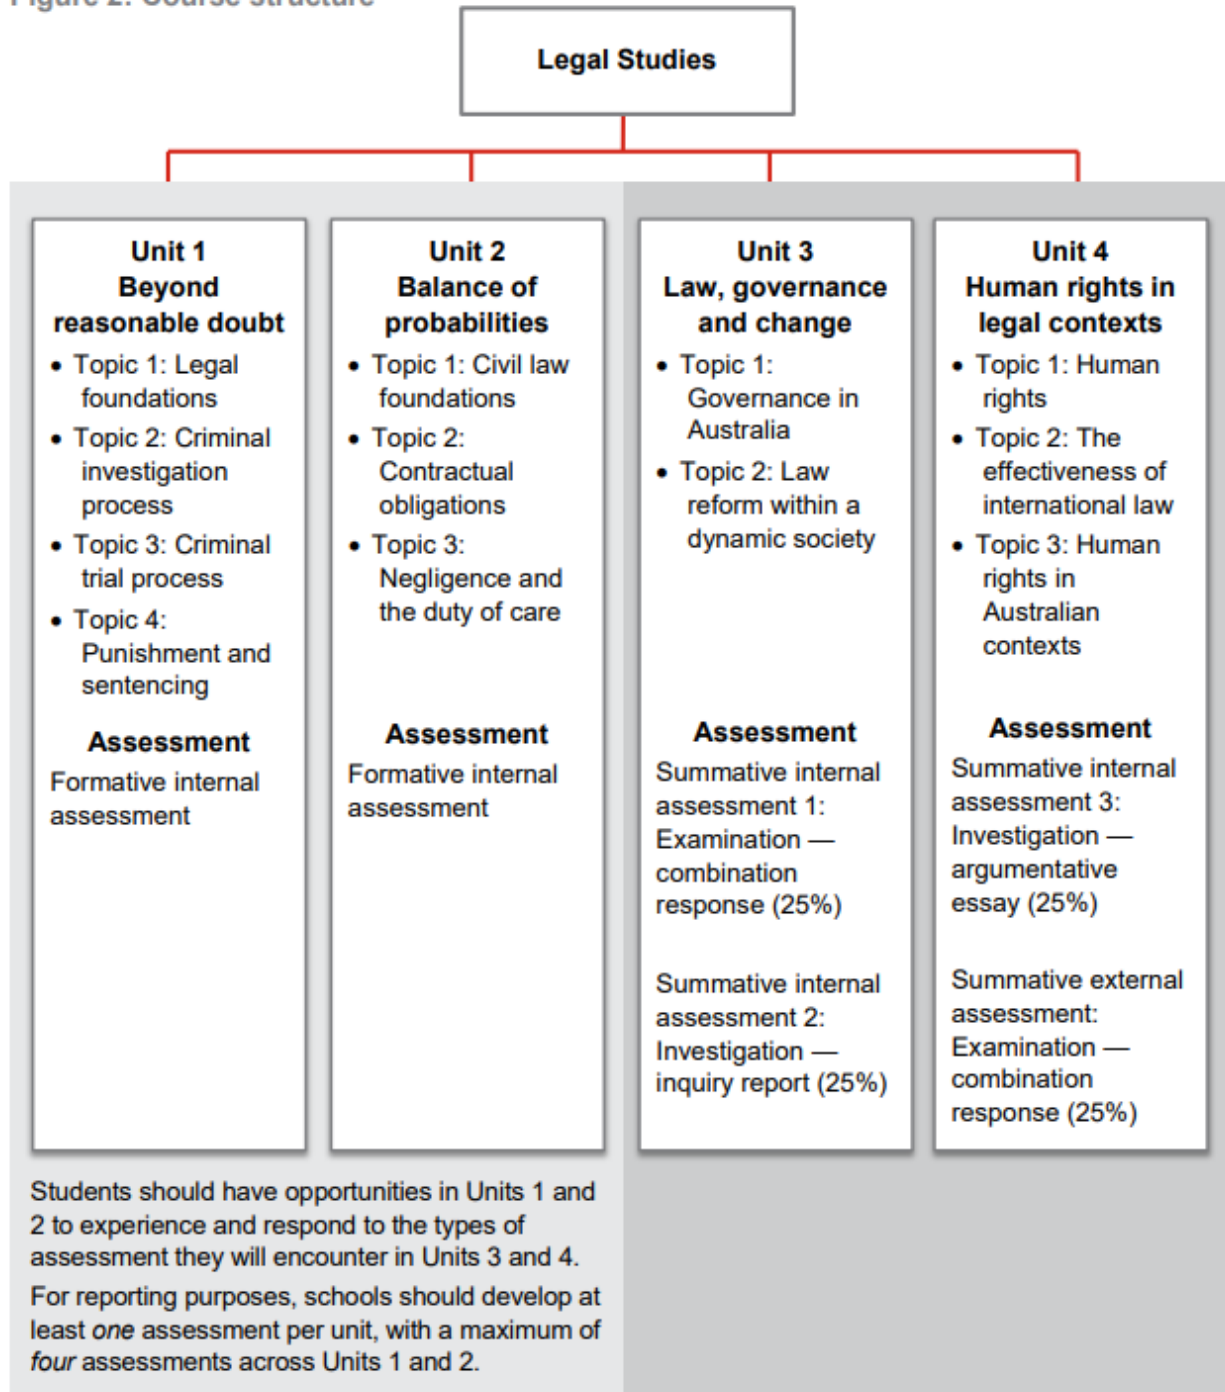

Objectives

By the conclusion of the course of study, students will:

- comprehend legal concepts, principles and processes
- select legal information from sources
- analyse legal issues
- evaluate legal situations
- create responses that communicate meaning.

Overview - Legal Studies Syllabus

Figure 2: Course structure

Literature

Literature focuses on the study of literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied literary texts.

Students engage with language and texts through a range of teaching and learning experiences to foster the skills to communicate effectively. They make choices about generic structures, language, textual features and technologies to participate actively in the dialogue and detail of literary analysis and the creation of imaginative and analytical texts in a range of modes, mediums and forms.

Students explore how literary texts shape perceptions of the world and enable us to enter the worlds of others. They explore ways in which literary texts may reflect or challenge social and cultural ways of thinking and influence audiences.

Pathways

A course of study in Literature promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

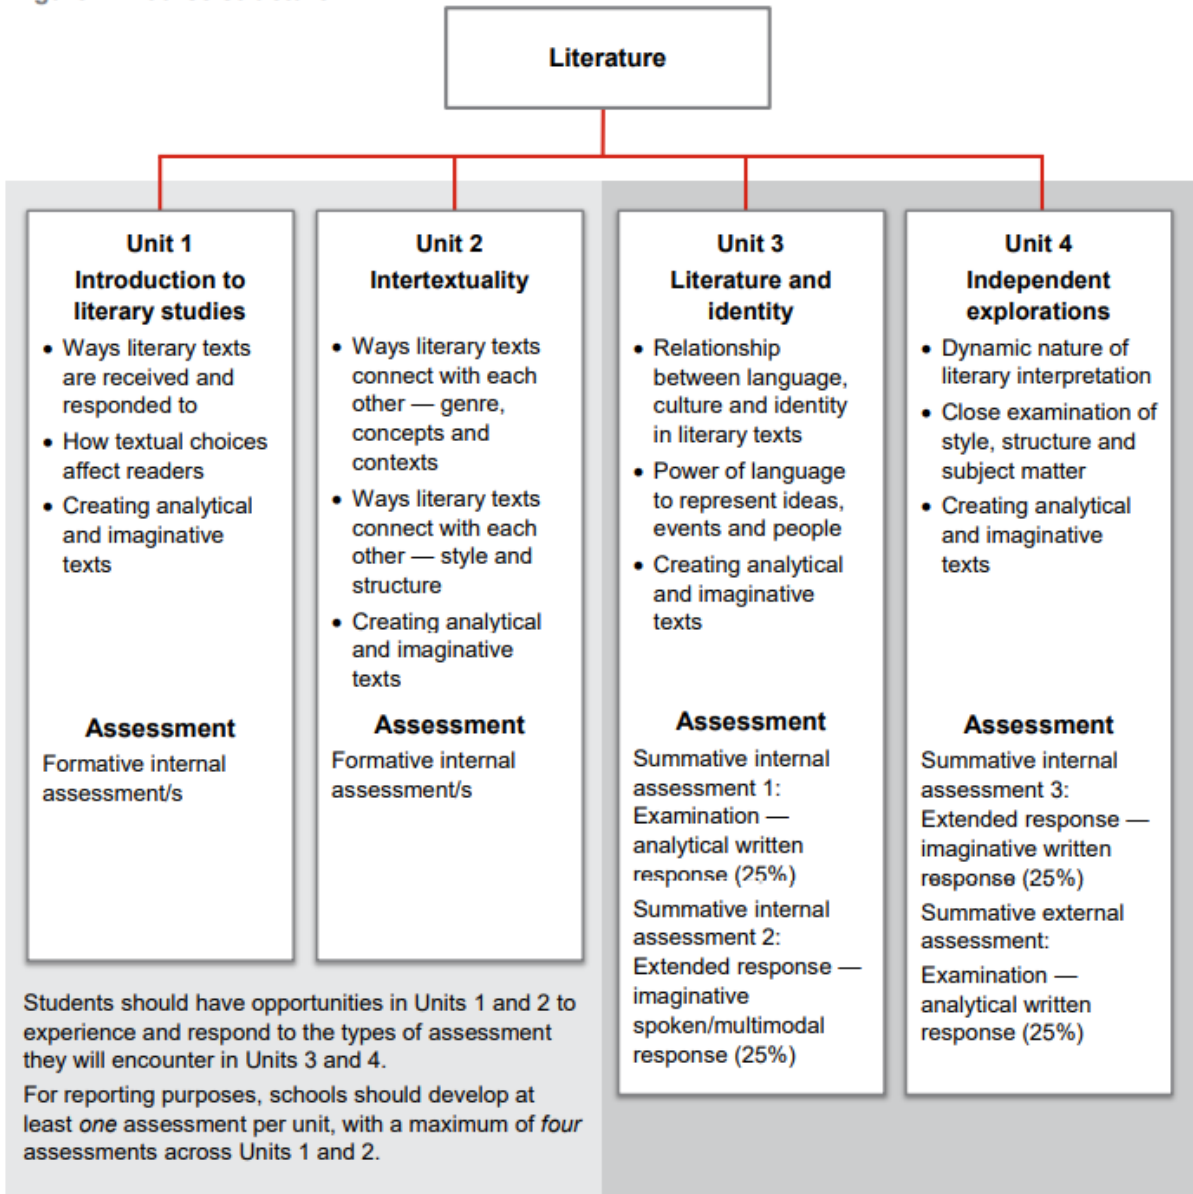

[Overview - Literature Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- establish and maintain roles of the writer/speaker/signer/designer and relationships with audiences
- create and analyse perspectives and representations of concepts, identities, times and places
- make use of and analyse the ways cultural assumptions, attitudes, values and beliefs underpin texts and invite audiences to take up positions
- use aesthetic features and stylistic devices to achieve purposes and analyse their effects in texts
- select and synthesise subject matter to support perspectives
- organise and sequence subject matter to achieve particular purposes
- use cohesive devices to emphasise ideas and connect parts of texts
- make language choices for particular purposes and contexts
- use grammar and language structures for particular purposes
- use mode-appropriate features to achieve particular purposes.

Figure 2: Course structure

General Mathematics

General Mathematics' major domains are Number and algebra, Measurement and geometry, Statistics, and Networks and matrices, building on the content of the P–10 Australian Curriculum.

General Mathematics is designed for students who want to extend their mathematical skills beyond Year 10 but whose future studies or employment pathways do not require calculus.

Students build on and develop key mathematical ideas, including rates and percentages, concepts from financial mathematics, linear and non-linear expressions, sequences, the use of matrices and networks to model and solve authentic problems, the use of trigonometry to find solutions to practical problems, and the exploration of real-world phenomena in statistics.

Students engage in a practical approach that equips learners for their needs as future citizens. They learn to ask appropriate questions, map out pathways, reason about complex solutions, set up models and communicate in different forms. They experience the relevance of mathematics to their daily lives, communities and cultural backgrounds. They develop the ability to understand, analyse and take action regarding social issues in their world.

Pathways

A course of study in General Mathematics can establish a basis for further education and employment in the fields of business, commerce, education, finance, IT, social science and the arts.

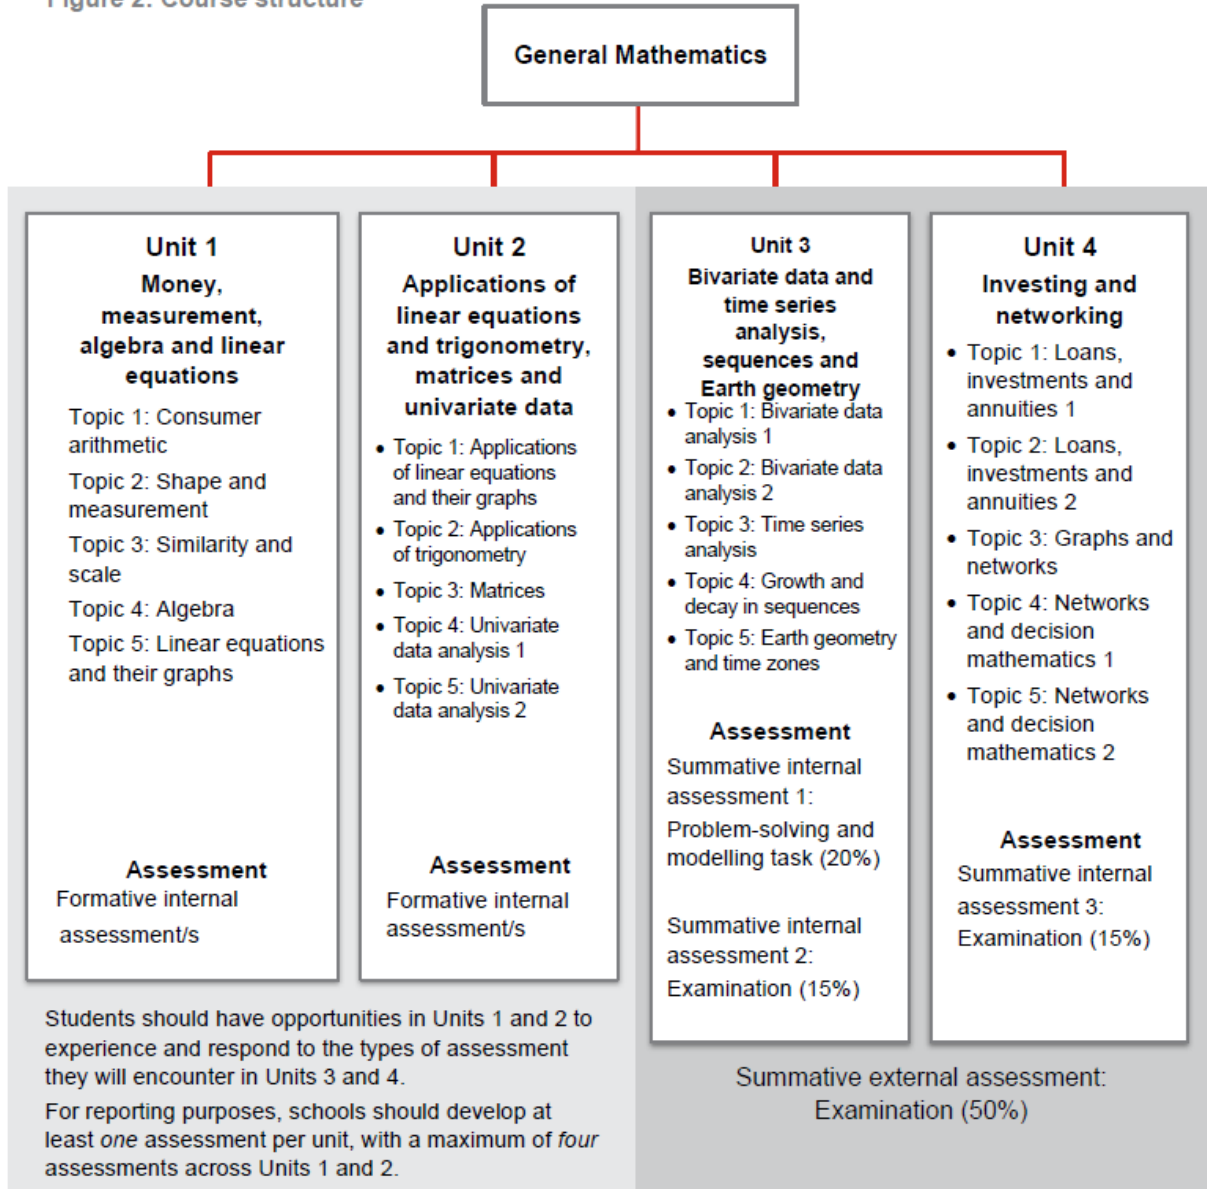

Overview - General Mathematics Syllabus

Objectives

By the conclusion of the course of study, students will:

- recall mathematical knowledge recognizing concepts, rules, definitions, techniques and algorithms drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- use mathematical knowledge, putting into effect concepts, rules, definitions, techniques and algorithms drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Number and algebra, Measurement and geometry, Statistics, and Networks and matrices, developing mathematical models where appropriate.

Figure 2: Course structure

Mathematical Methods

Mathematical Methods' major domains are Algebra, Functions, relations and their graphs, Calculus and Statistics.

Mathematical Methods enables students to see the connections between mathematics and other areas of the curriculum and apply their mathematical skills to real-world problems, becoming critical thinkers, innovators and problem-solvers.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, and build on algebra, functions and their graphs, and probability from the P–10 Australian Curriculum. Calculus is essential for developing an understanding of the physical world. The domain Statistics is used to describe and analyse phenomena involving uncertainty and variation. Both are the basis for developing effective models of the world and solving complex and abstract mathematical problems.

Students develop the ability to translate written, numerical, algebraic, symbolic and graphical information from one representation to another. They make complex use of factual knowledge to successfully formulate, represent and solve mathematical problems.

Pathways

A course of study in Mathematical Methods can establish a basis for further education and employment in the fields of natural and physical sciences (especially physics and chemistry), mathematics and science education, medical and health sciences (including human biology, biomedical science, nanoscience and forensics), engineering (including chemical, civil, electrical and mechanical engineering, avionics, communications and mining), computer science (including electronics and software design), psychology and business.

Overview - Mathematical Methods

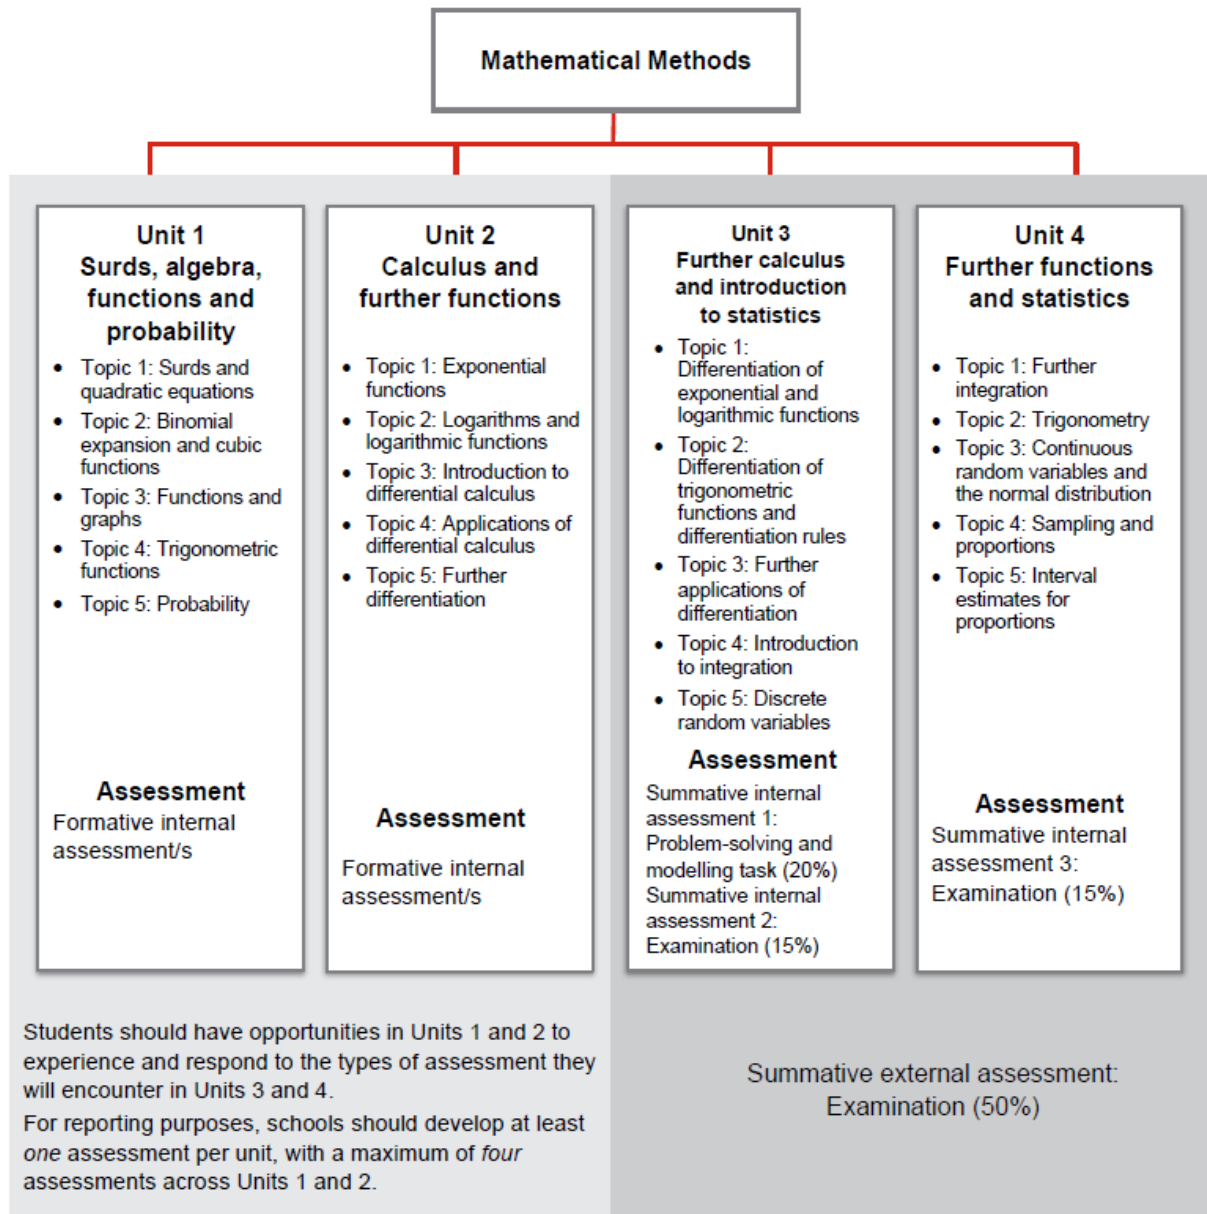

Syllabus

Objectives

By the conclusion of the course of study, students will:

- recall mathematical knowledge and recognize concepts, rules, definitions, techniques and algorithms drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- use mathematical knowledge putting into effect concepts, rules, definitions, techniques and algorithms drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts and techniques drawn from Algebra, Functions, relations and their graphs, Calculus and Statistics. Make decisions about technology usage and develop, refine and use mathematical models as appropriate.

Figure 2: Course structure

Specialist Mathematics

Specialist Mathematics' major domains are Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus.

Specialist Mathematics is designed for students who develop confidence in their mathematical knowledge and ability, and gain a positive view of themselves as mathematics learners. They will gain an appreciation of the true nature of mathematics, its beauty and its power.

Students learn topics that are developed systematically, with increasing levels of sophistication, complexity and connection, building on functions, calculus, statistics from Mathematical Methods, while vectors, complex numbers and matrices are introduced. Functions and calculus are essential for creating models of the physical world. Statistics are used to describe and analyse phenomena involving probability, uncertainty and variation. Matrices, complex numbers and vectors are essential tools for explaining abstract or complex relationships that occur in scientific and technological endeavours.

Student learning experiences range from practising essential mathematical routines to developing procedural fluency, through to investigating scenarios, modelling the real world, solving problems and explaining reasoning.

Pathways

A course of study in Specialist Mathematics can establish a basis for further education and employment in the fields of science, all branches of mathematics and statistics, computer science, medicine, engineering, finance and economics.

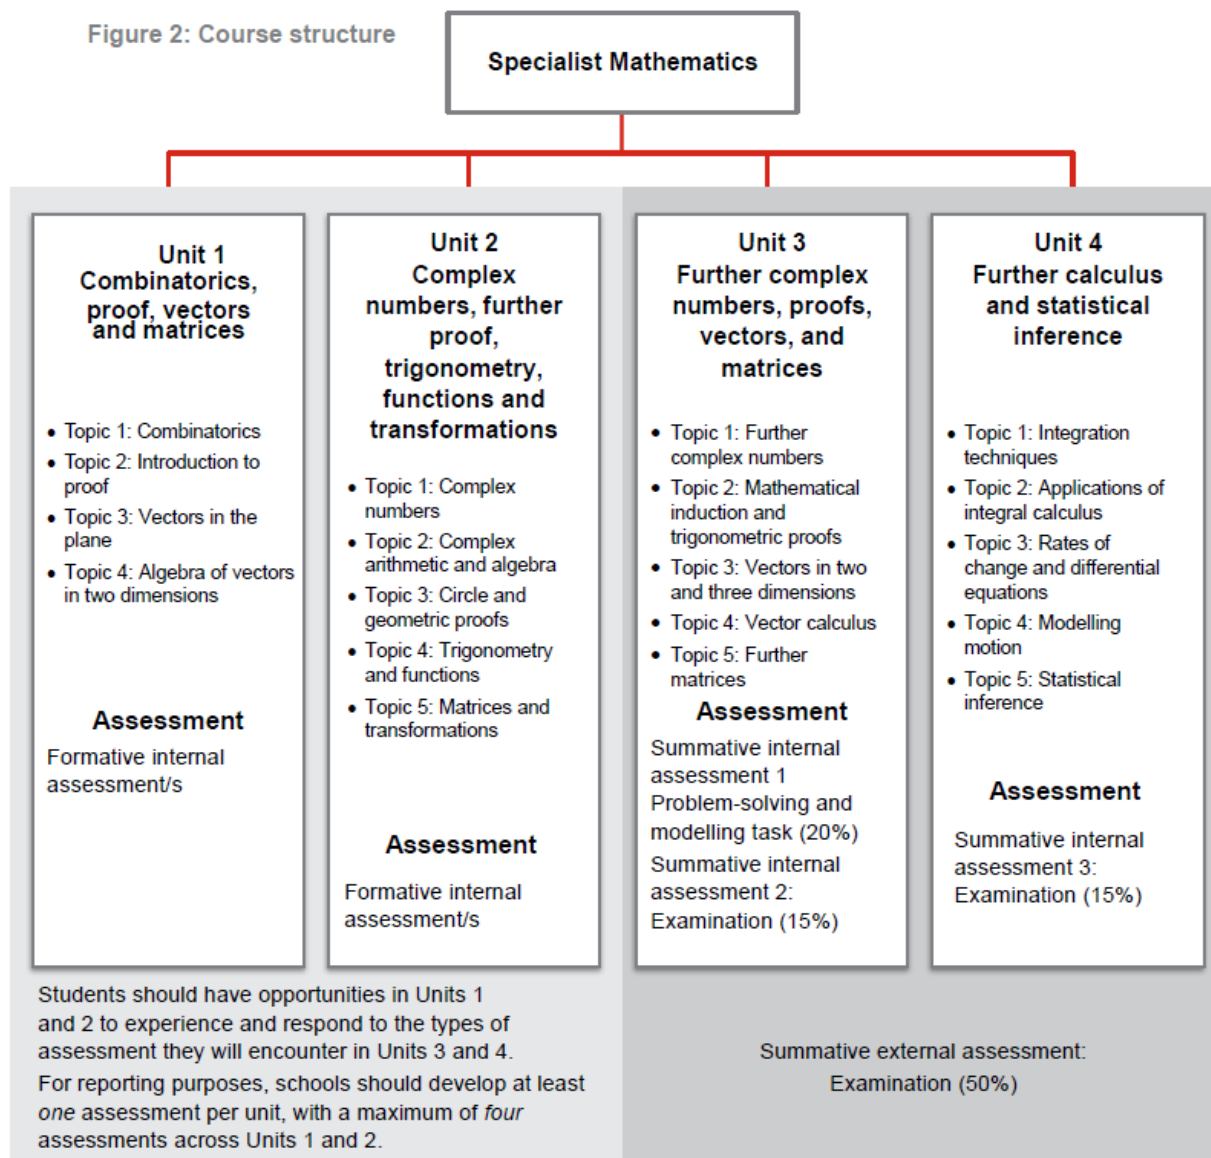

Overview - Specialist Mathematics Syllabus

Objectives

By the conclusion of the course of study, students will:

- recall mathematical knowledge recognizing concepts, rules, definitions, techniques and algorithms from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus
- use mathematical knowledge putting into effect relevant concepts, rules, definitions, techniques and algorithms; performing calculations with and without technology
- communicate mathematical knowledge using mathematical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions, and prove propositions by explaining mathematical reasoning
- solve mathematical problems by applying mathematical concepts and techniques drawn from Vectors and matrices, Real and complex numbers, Trigonometry, Statistics and Calculus with and without technology. They develop, refine and use mathematical models where appropriate.

Figure 2: Course structure

Modern History

Modern History provides opportunities for students to gain historical knowledge and understanding about some of the main forces that have contributed to the development of the Modern World and to think historically and form a historical consciousness in relation to these same forces.

Modern History enables students to empathise with others and make meaningful connections between the past, present and possible futures.

Students learn that the past is contestable and tentative. Through inquiry into ideas, movements, national experiences and international experiences they discover how the past consists of various perspectives and interpretations.

Students gain a range of transferable skills that will help them become empathetic and critically-literate citizens who are equipped to embrace a multicultural, pluralistic, inclusive, democratic, compassionate and sustainable future.

Pathways

A course of study in Modern History can establish a basis for further education and employment in the fields of history, education, psychology, sociology, law, business, economics, politics, journalism, the media, writing, academia and strategic analysis.

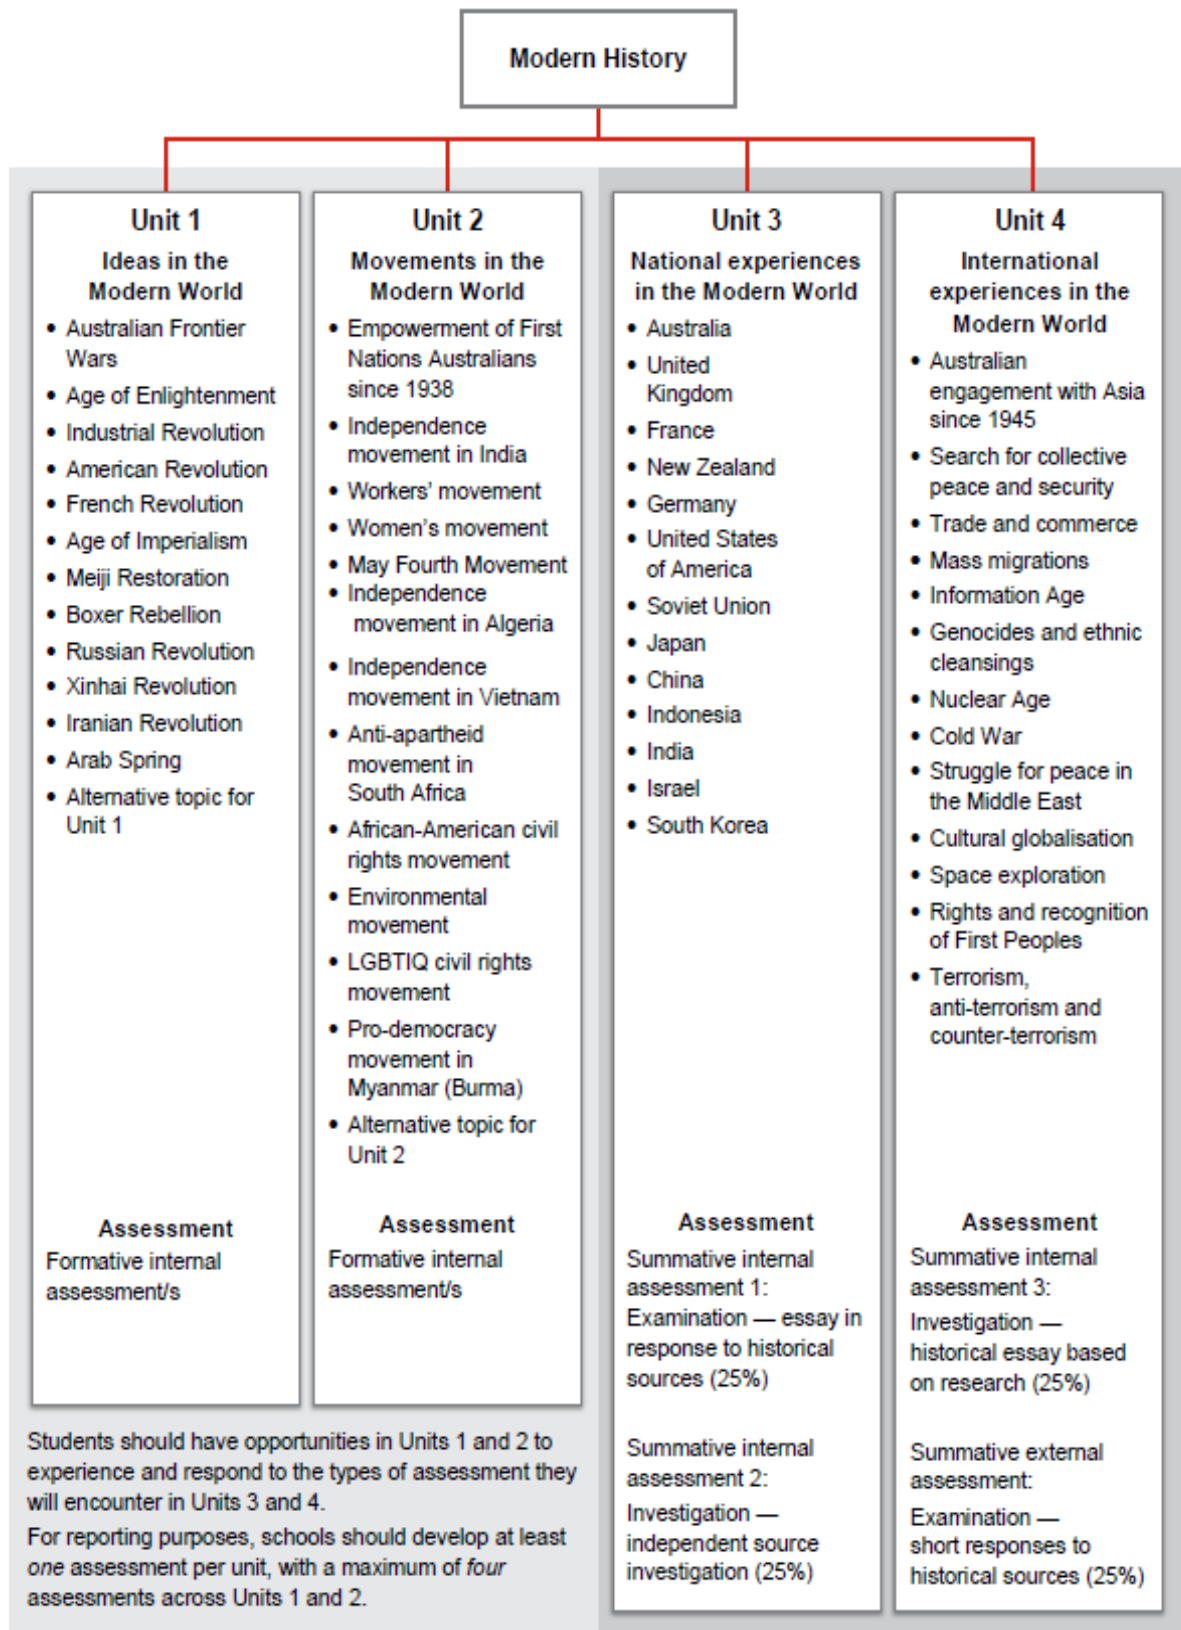

[Overview - Modern History Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- comprehend terms, issues and concepts
- devise historical questions and conduct research
- analyse evidence from historical sources
- synthesise evidence from historical sources
- evaluate evidence from historical sources
- communicate to suit purpose.

Figure 2: Course structure

Music

Music fosters creative and expressive communication. It allows students to develop musicianship through making (composition and performance) and responding (musicology).

Through composition, performance and musicology, students use and apply music elements and concepts. They apply their knowledge and understanding to convey meaning and/or emotion to an audience.

Students use essential literacy skills to engage in a multimodal world. They demonstrate practical music skills and analyse and evaluate music in a variety of contexts, styles and genres.

Pathways

A course of study in Music can establish a basis for further education and employment in the fields of arts administration, communication, education, creative industries, public relations and science and technology.

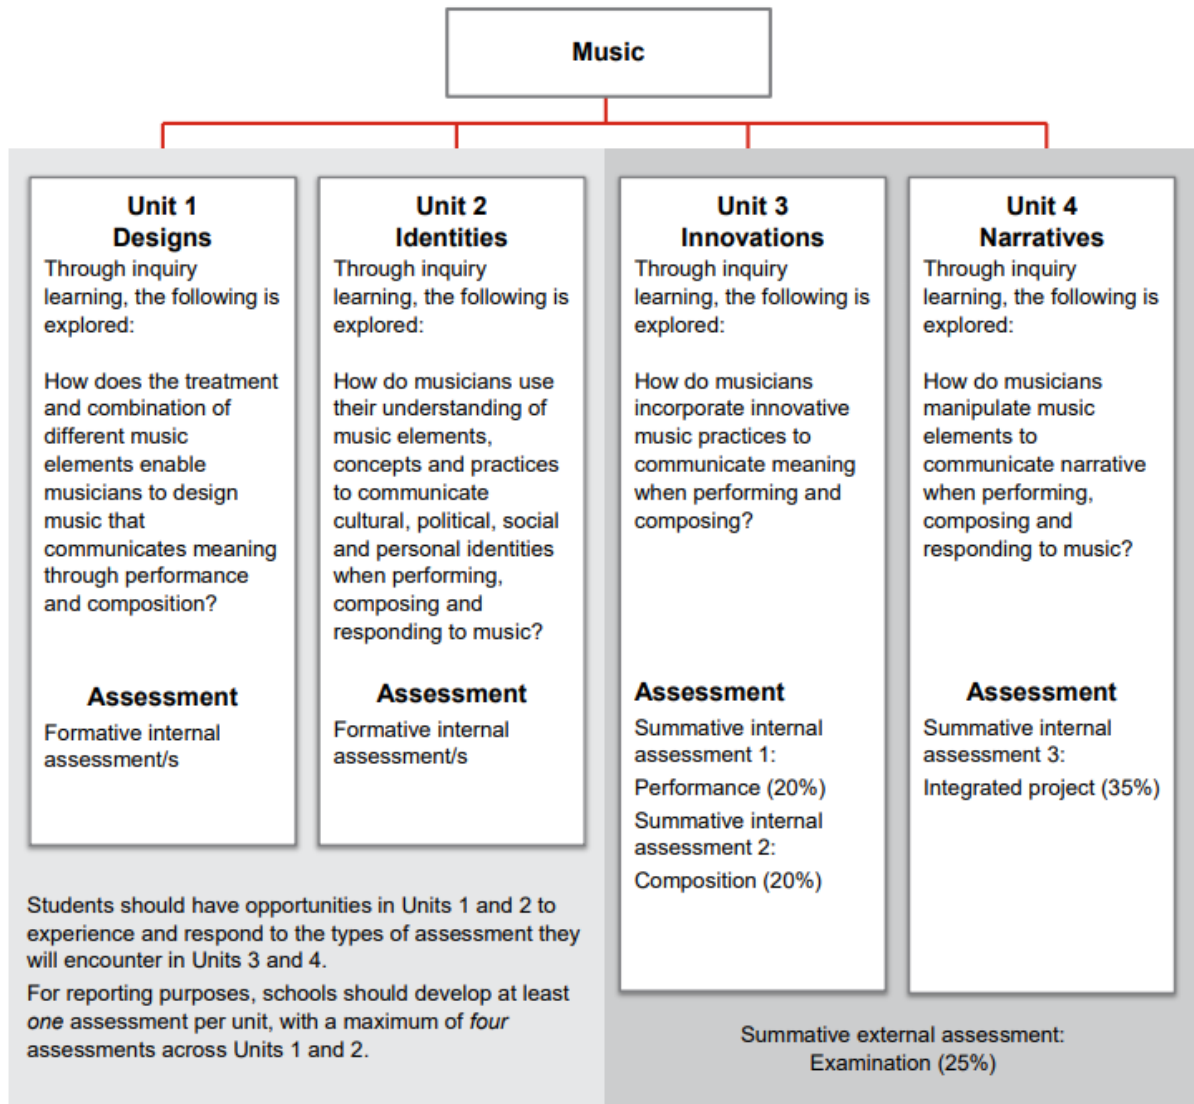

Objectives

By the conclusion of the course of study, students will:

- demonstrate technical skills
- use music elements and concepts
- analyse music
- apply compositional devices
- apply literacy skills
- interpret music elements and concepts
- evaluate music
- realise music ideas
- resolve music ideas.

[Overview - Music Syllabus](#)

Figure 2: Course structure

Physical Education

Physical Education provides students with knowledge, understanding and skills to explore and enhance their own and others' health and physical activity in diverse and changing contexts.

Physical Education provides a philosophical and educative framework to promote deep learning in three dimensions: about, through and in physical activity contexts. Students optimise their engagement and performance in physical activity as they develop an understanding and appreciation of the interconnectedness of these dimensions.

Students learn how body and movement concepts and the scientific bases of biophysical, sociocultural and psychological concepts and principles are relevant to their engagement and performance in physical activity. They engage in a range of activities to develop movement sequences and movement strategies.

Through their purposeful engagement in physical activities, students gather data to analyse, synthesise and devise strategies to optimise engagement and performance. They engage in reflective decision-making as they evaluate and justify strategies to achieve a particular outcome.

Pathways

A course of study in Physical Education can establish a basis for further education and employment in the fields of exercise science, biomechanics, the allied health professions, psychology, teaching, sport journalism, sport marketing and management, sport promotion, sport development and coaching.

Overview - Physical Education

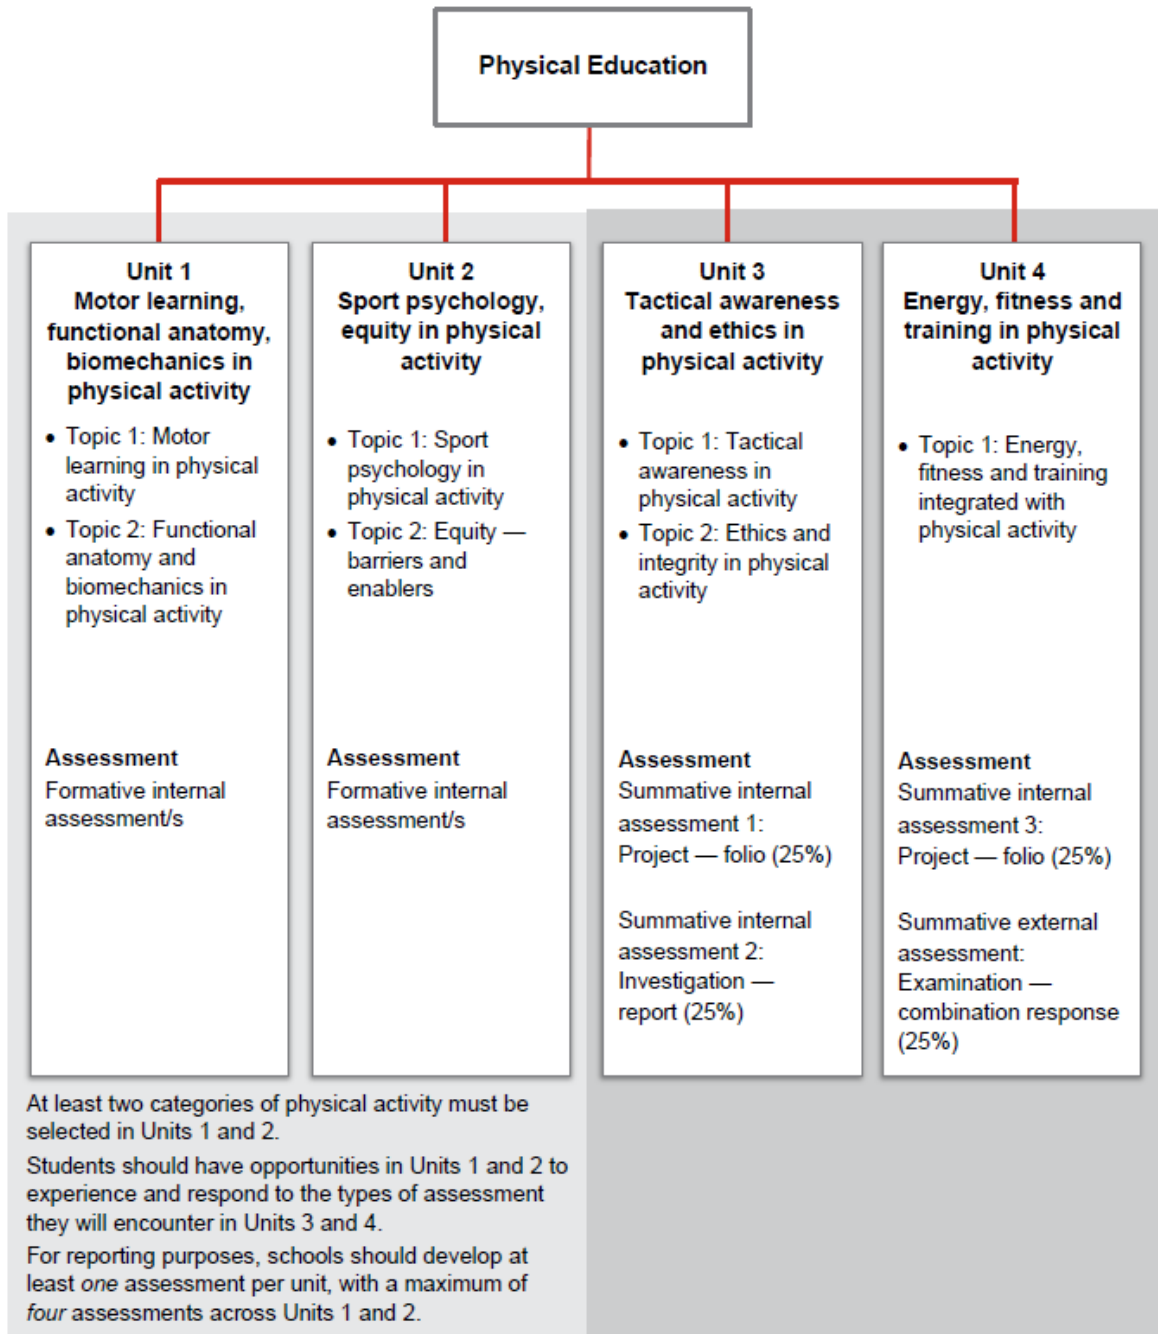

Syllabus

Objectives

By the conclusion of the course of study, students will:

- recognise and explain concepts and principles about movement
- demonstrate specialised movement sequences and movement strategies
- apply concepts to specialised movement sequences and movement strategies
- analyse and synthesise data to devise strategies about movement
- evaluate strategies about and in movement
- justify strategies about and in movement
- make decisions about and use language, conventions and mode-appropriate features for particular purposes and contexts.

Figure 2: Course structure

Physics

Physics provides opportunities for students to engage with classical and modern understandings of the universe.

Students develop appreciation of the contribution physics makes to society: understanding that diverse natural phenomena may be explained, analysed and predicted using concepts, models and theories that provide a reliable basis for action; and that matter and energy interact in physical systems across a range of scales. They understand how models and theories are refined, and new ones developed in physics; investigate phenomena and solve problems; collect and analyse data; and interpret evidence. Students use accurate and precise measurement, valid and reliable evidence, and scepticism and intellectual rigour to evaluate claims; and communicate physics understanding, findings, arguments and conclusions using appropriate representations, modes and genres.

Students learn and apply aspects of the knowledge and skills of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Physics can establish a basis for further education and employment in the fields of science, engineering, medicine and technology.

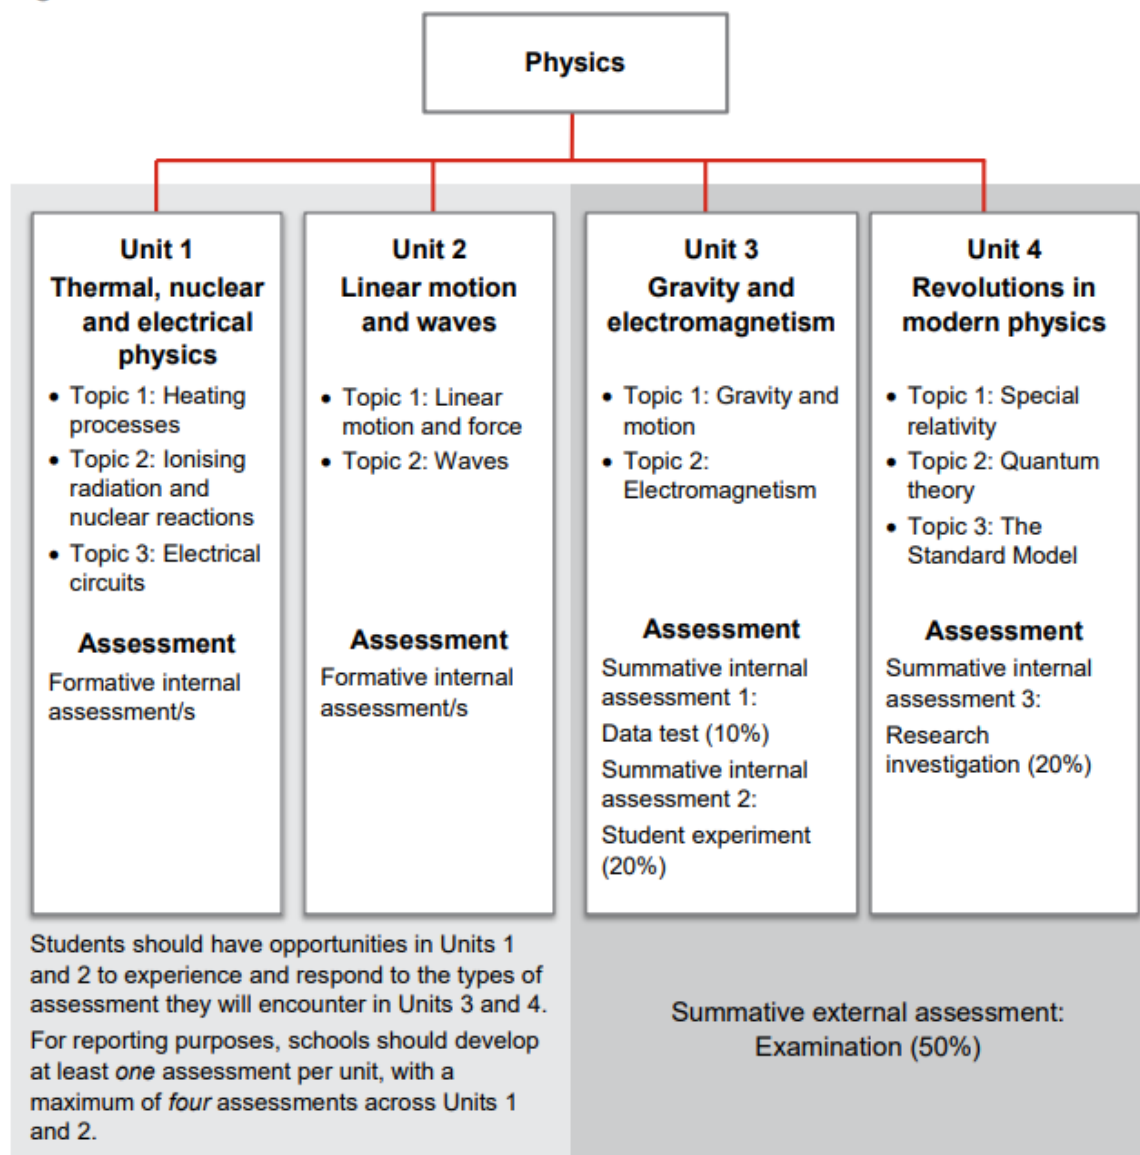

[Overview - Physics Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- describe ideas and findings
- apply understanding
- analyse data
- interpret evidence
- evaluate conclusions, claims and processes
- investigate phenomena

Figure 2: Course structure

Psychology

Psychology provides opportunities for students to engage with concepts that explain behaviours and underlying cognitions.

Students examine individual development in the form of the role of the brain, cognitive development, human consciousness and sleep. They investigate the concept of intelligence; the process of diagnosis and how to classify psychological disorder and determine an effective treatment; and the contribution of emotion and motivation on individual behaviour. They examine individual thinking and how it is determined by the brain, including perception, memory, and learning. They consider the influence of others by examining theories of social psychology, interpersonal processes, attitudes and cross-cultural psychology.

Students learn and apply aspects of the knowledge and skill of the discipline (thinking, experimentation, problem-solving and research skills), understand how it works and how it may impact society.

Pathways

A course of study in Psychology can establish a basis for further education and employment in the fields of psychology, sales, human resourcing, training, social work, health, law, business, marketing and education.

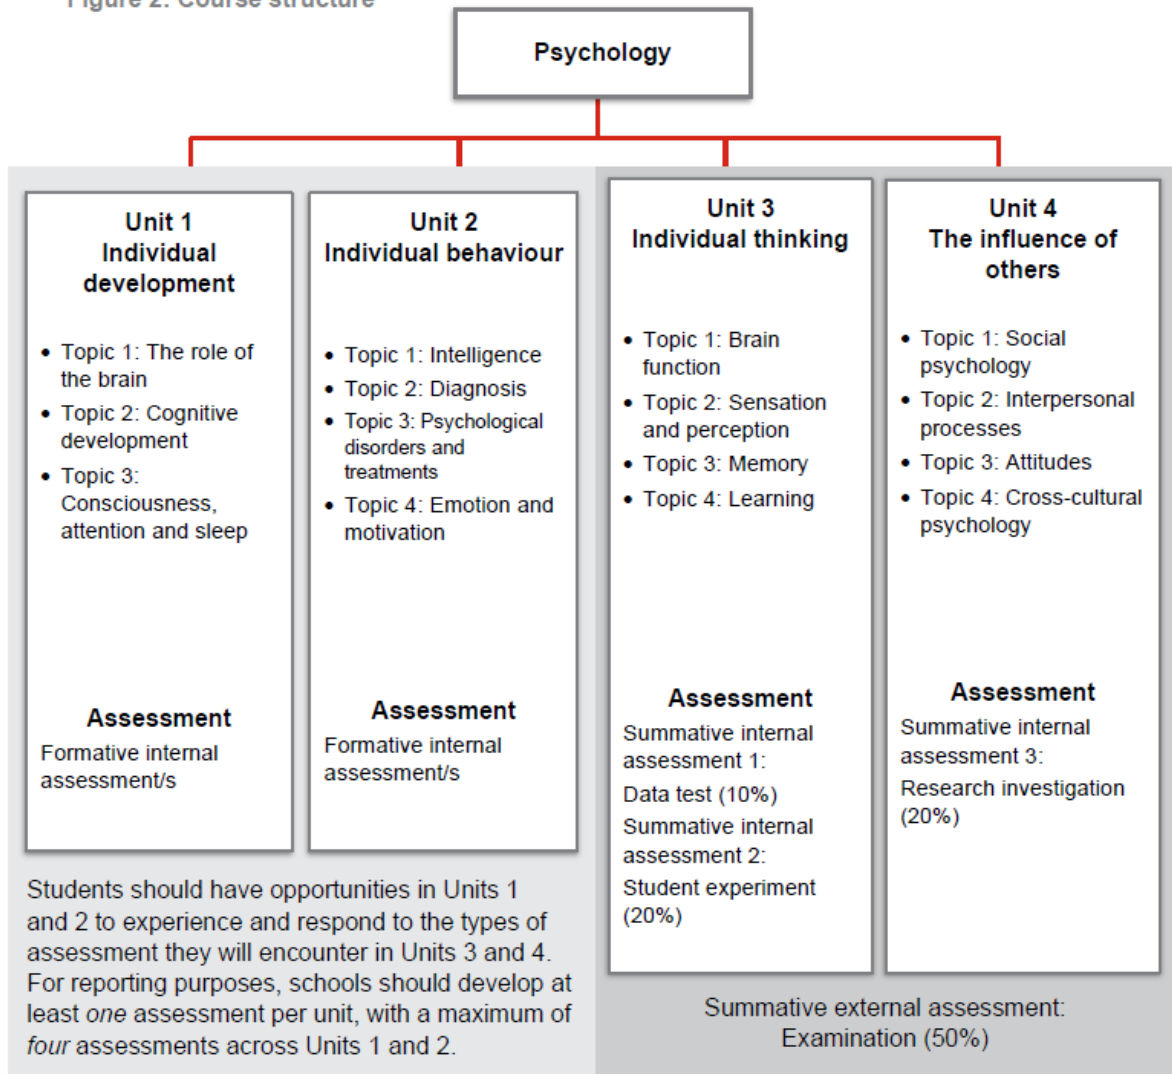

[Overview - Psychology Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- describe ideas and findings
- apply understanding
- analyse data
- interpret evidence
- evaluate conclusions, claims and processes
- investigate phenomena

Figure 2: Course structure

Study of Religion

Study of Religion investigates religious traditions and how religion has influenced, and continues to influence, people's lives. Students become aware of their own religious beliefs, the religious beliefs of others, and how people holding such beliefs are able to co-exist in a pluralist society.

Students study the five major world religions of Judaism, Christianity, Islam, Hinduism and Buddhism; and Australian Aboriginal spiritualities and Torres Strait Islander religion and their influence on people, society and culture. These are explored through sacred texts and religious writings that offer insights into life, and through the rituals that mark significant moments and events in the religion itself and the lives of adherents.

Students develop a logical and critical approach to understanding the influence of religion, with judgments supported through valid and reasoned argument. They develop critical thinking skills, including those of analysis, reasoning and evaluation, as well as communication skills that support further study and post-school participation in a wide range of fields.

Pathways

A course of study in Study of Religion can establish a basis for further education and employment in such fields as anthropology, the arts, education, journalism, politics, psychology, religious studies, sociology and social work.

Overview - Study of Religion

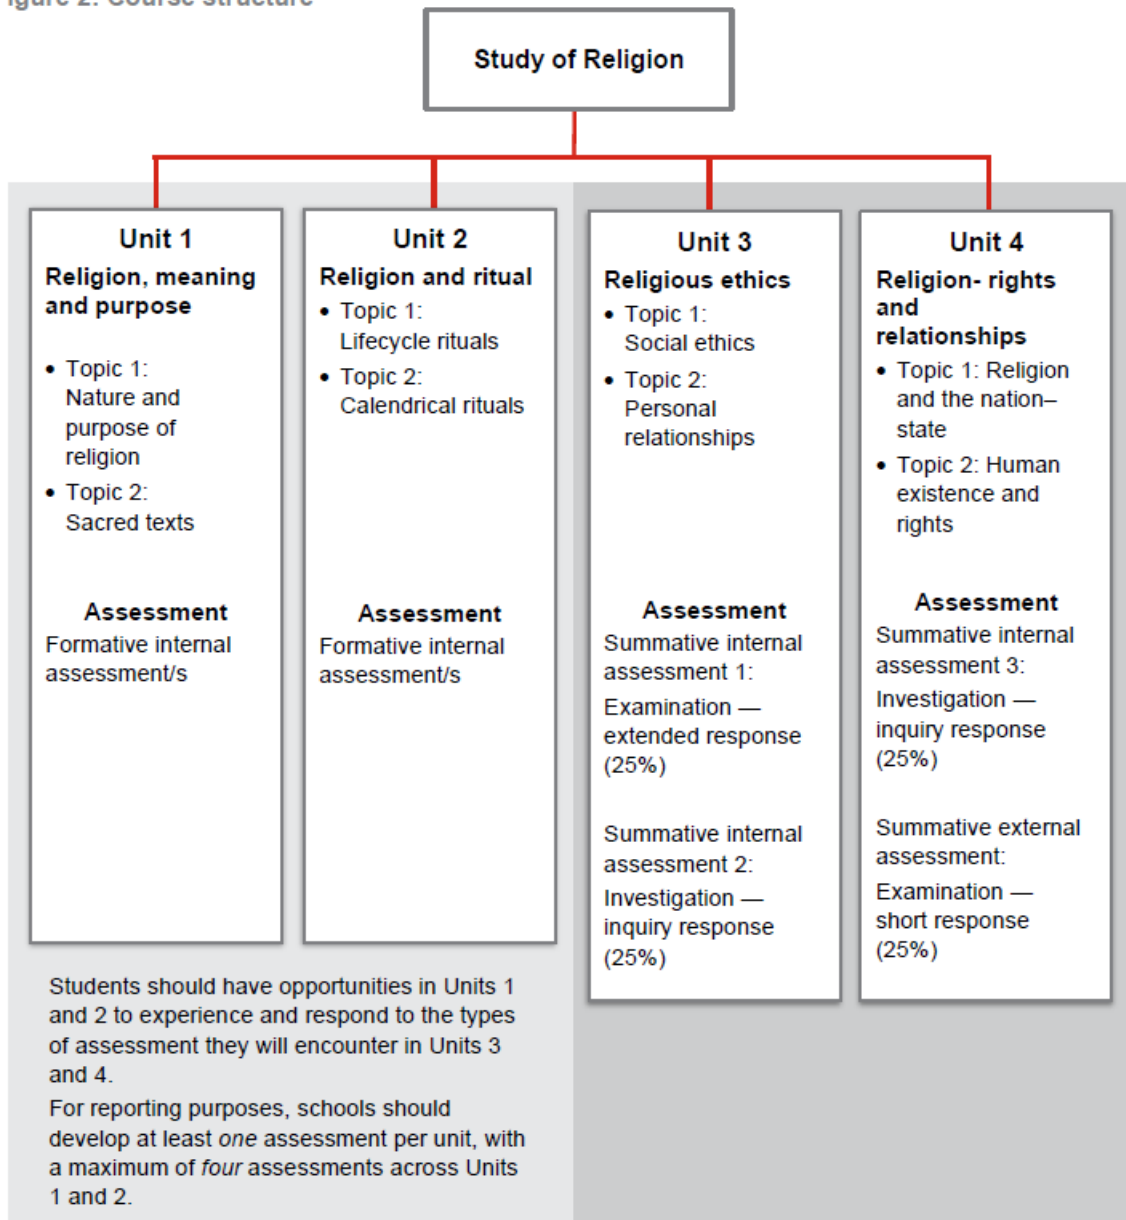

Syllabus

Objectives

By the conclusion of the course of study, students will:

- explain features and expressions of religious traditions
- analyse perspectives about religious expressions
- evaluate the significance and influence of religion
- communicate to suit purpose.

Figure 2: Course structure

Visual Art

Visual Art provides students with opportunities to understand and appreciate the role of visual art in past and present traditions and cultures, as well as the contributions of contemporary visual artists and their aesthetic, historical and cultural influences. Students interact with artists, artworks, institutions and communities to enrich their experiences and understandings of their own and others' art practices.

Students have opportunities to construct knowledge and communicate personal interpretations by working as both artist and audience. They use their imagination and creativity to innovatively solve problems and experiment with visual language and expression.

Through an inquiry learning model, students develop critical and creative thinking skills. They create individualised responses and meaning by applying diverse materials, techniques, technologies and art processes.

In responding to artworks, students employ essential literacy skills to investigate artistic expression and critically analyse artworks in diverse contexts. They consider meaning, purposes and theoretical approaches when ascribing aesthetic value and challenging ideas.

Pathways

A course of study in Visual Art can establish a basis for further education and employment in the fields of arts practice, design, craft, and information technologies; broader areas in creative industries and cultural institutions; and diverse fields that use skills inherent in the subject, including advertising, arts administration and management, communication, design, education, galleries and museums, film and television, public relations, and science and technology.

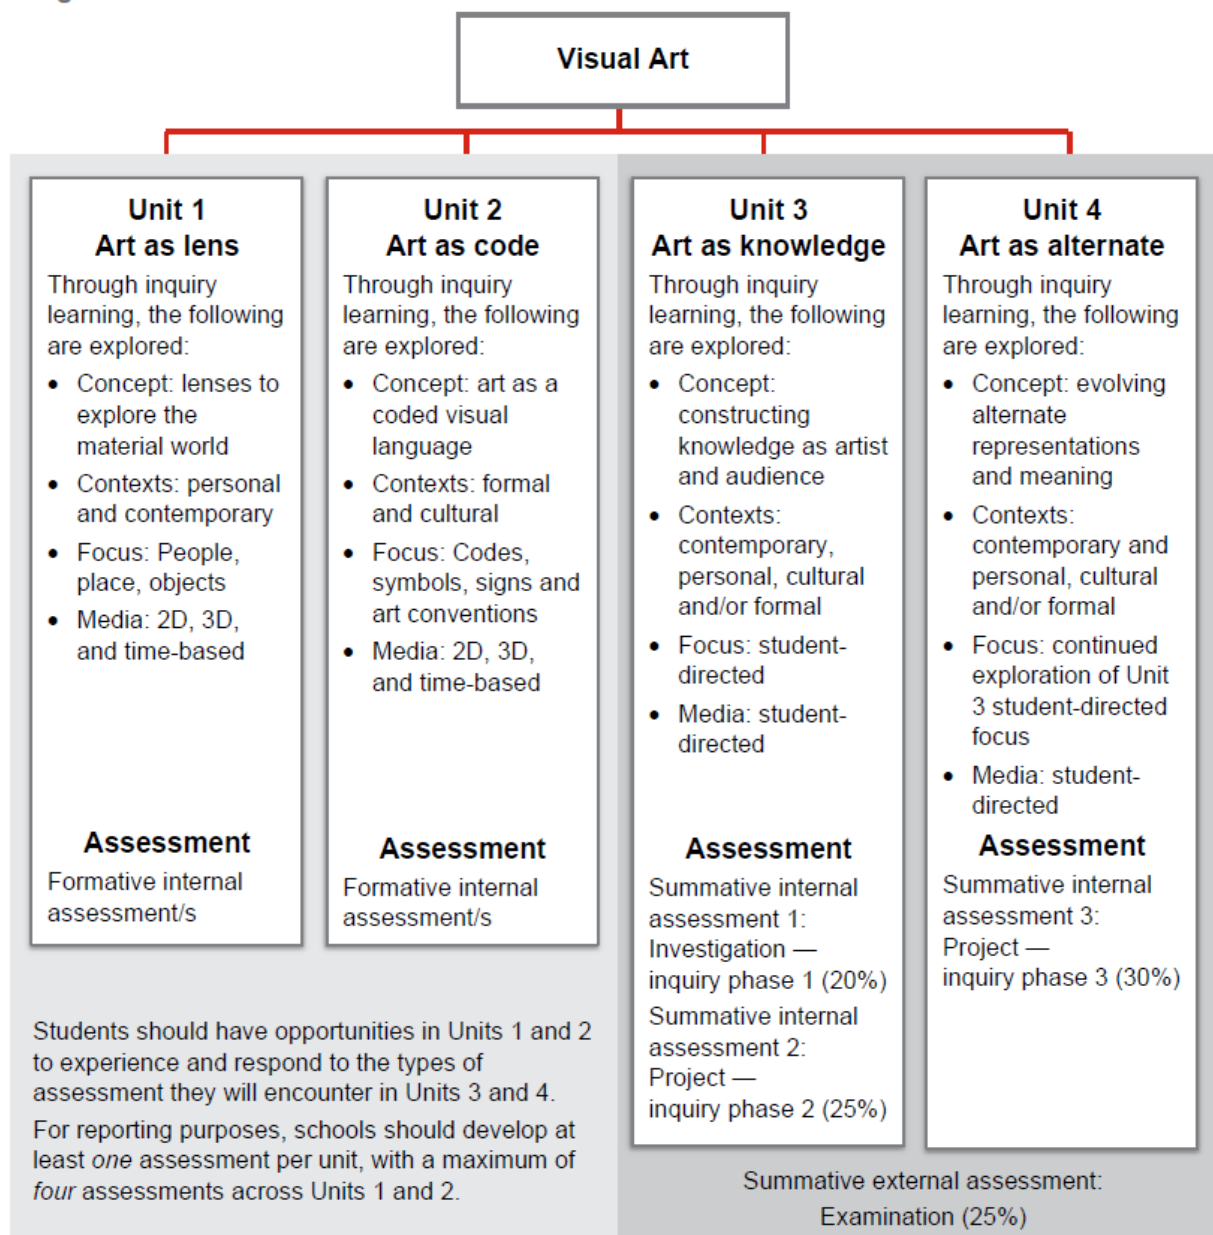

[Overview - Visual Art Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- implement ideas and representations
- apply literacy skills
- analyse and interpret visual language, expression and meaning in artworks and practices
- evaluate influences
- justify viewpoints
- experiment in response to stimulus
- create visual responses using knowledge and understanding of art media
- realise responses to communicate meaning.

Applied Subjects and Vocational Education Certificates at San Sisto College

Applied Subjects

Mathematics

Essential Mathematics

English

Essential English

Humanities

Religion and Ethics

Technologies

Fashion
Hospitality Practices

The Arts

Media Arts in Practice
Visual Arts in Practice

Vocational Education Qualifications

VET Subjects

Diploma of Business
Certificate IV in School Based Education Support
Certificate IV in Justice Studies
Certificate III in Business
Certificate III in Health Services Assistance/Cert II in Health Support Services
Certificate III in Fitness/Cert II in Sports Coaching
Certificate II in Active Volunteering
Certificate I in Employment Pathways

Essential English

Essential English develops and refines students' understanding of language, literature and literacy to enable them to interact confidently and effectively with others in everyday, community and social contexts. Students recognise language and texts as relevant in their lives now and in the future and learn to understand, accept or challenge the values and attitudes in these texts.

Students engage with language and texts to foster skills to communicate confidently and effectively in Standard Australian English in a variety of contemporary contexts and social situations, including everyday, social, community, further education and work-related contexts. They choose generic structures, language, language features and technologies to best convey meaning. They develop skills to read for meaning and purpose, and to use, critique and appreciate a range of contemporary literary and non-literary texts.

Students use language effectively to produce texts for a variety of purposes and audiences and engage creative and imaginative thinking to explore their own world and the worlds of others. They actively and critically interact with a range of texts, developing an awareness of how the language they engage with positions them and others.

Pathways

A course of study in Essential English promotes open-mindedness, imagination, critical awareness and intellectual flexibility — skills that prepare students for local and global citizenship, and for lifelong learning across a wide range of contexts.

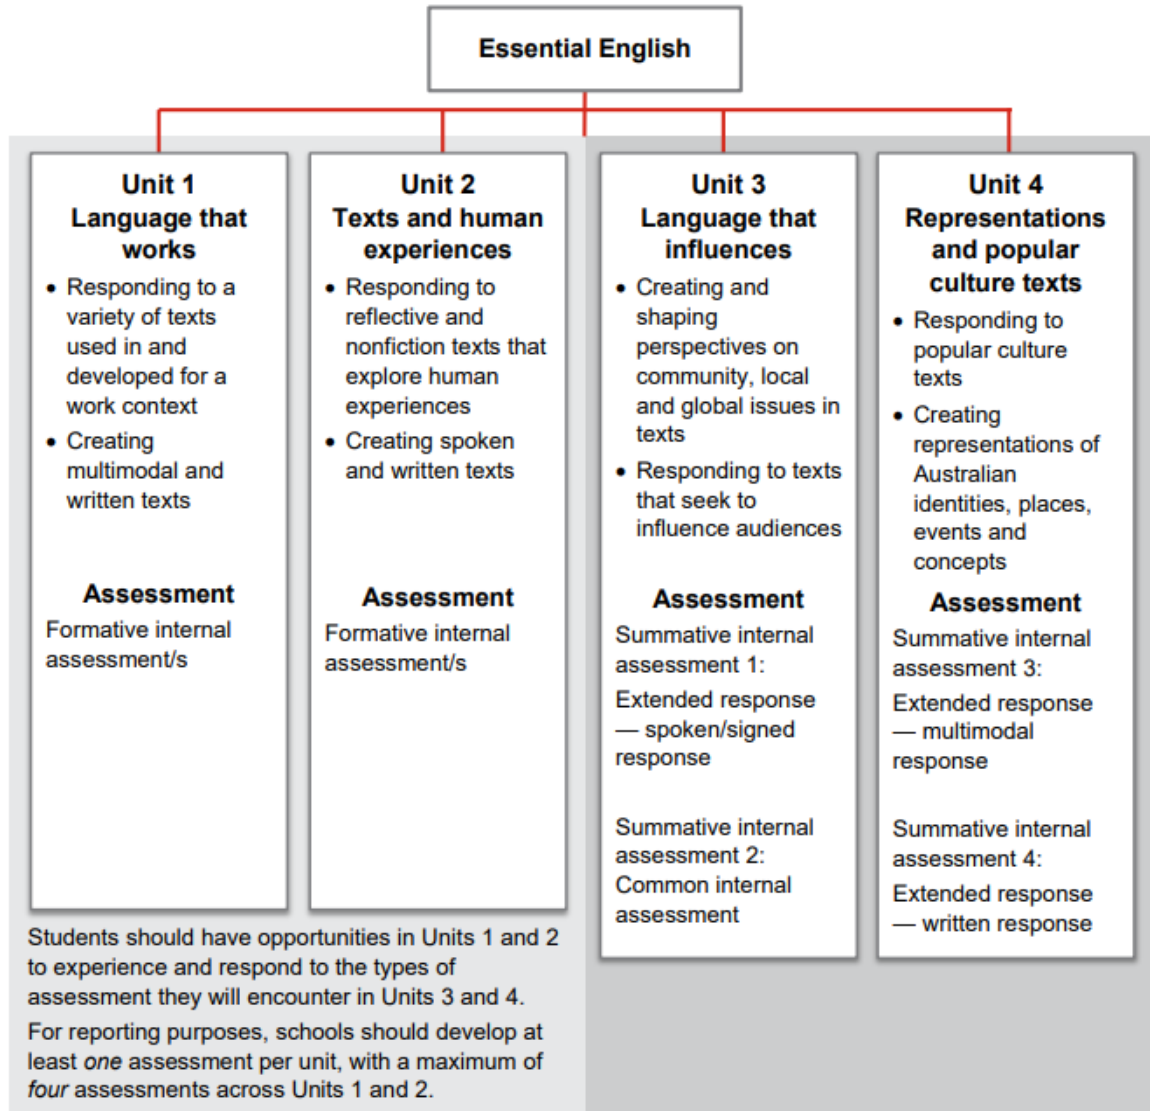

[Overview - Essential English Syllabus](#)

Objectives

By the conclusion of the course of study, students will:

- use patterns and conventions of genres to achieve particular purposes in cultural contexts and social situations
- use appropriate roles and relationships with audiences
- construct and explain representations of identities, places, events and concepts
- make use of and explain the ways cultural assumptions, attitudes, values and beliefs underpin texts and influence meaning
- explain how language features and text structures shape meaning and invite particular responses
- select and use subject matter to support perspectives
- sequence subject matter and use mode-appropriate cohesive devices to construct coherent texts
- make mode-appropriate language choices according to register informed by purpose, audience and context
- use language features to achieve particular purposes across modes.

Figure 2: Course structure

Essential Mathematics

Essential Mathematics' major domains are Number, Data, Location and time, Measurement and Finance.

Essential Mathematics benefits students because they develop skills that go beyond the traditional ideas of numeracy.

Students develop their conceptual understanding when they undertake tasks that require them to connect mathematical concepts, operations and relations. They learn to recognise definitions, rules and facts from everyday mathematics and data, and to calculate using appropriate mathematical processes.

Students interpret and use mathematics to make informed predictions and decisions about personal and financial priorities. This is achieved through an emphasis on estimation, problem-solving and reasoning, which develops students into thinking citizens.

Pathways

A course of study in Essential Mathematics can establish a basis for further education and employment in the fields of trade, industry, business and community services. Students learn within a practical context related to general employment and successful participation in society, drawing on the mathematics used by various professional and industry groups.

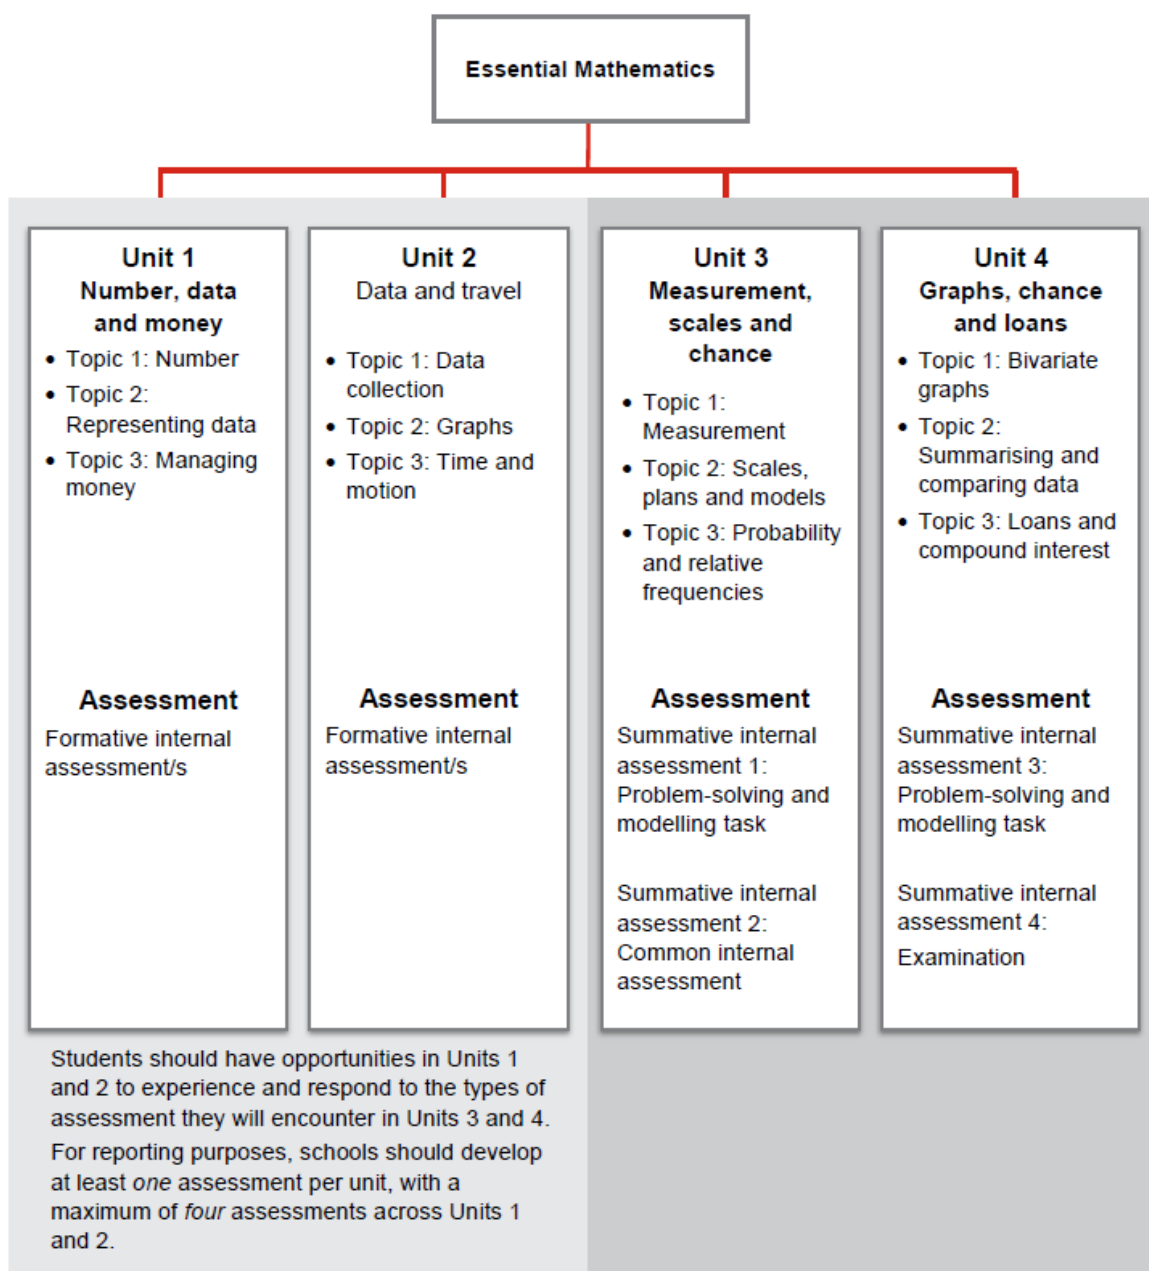

Overview - Essential Mathematics Syllabus

Objectives

By the conclusion of the course of study, students will:

- recall mathematical knowledge recognising concepts, rules, definitions, techniques and algorithms drawn from Number, Data, Location and time, Measurement and Finance
- use mathematical knowledge, putting into effect concepts, rules, definitions, techniques and algorithms with and without technology; drawn from Number, Data, Location and time, Measurement and Finance
- communicate using mathematical, statistical and everyday language and conventions
- evaluate the reasonableness of solutions
- justify procedures and decisions by explaining mathematical reasoning
- solve problems by applying mathematical concepts, techniques and technology drawn from Number, Data, Location and time, Measurement and Finance.

Figure 2: Course structure

Fashion

Fashion explores what underpins fashion culture, technology and design. Students use their imaginations to create, innovate and express themselves and their ideas, and to design and produce design solutions in a range of fashion contexts.

Students learn to appreciate the design aesthetics of others while developing their own personal style and aesthetic. They explore contemporary and historical fashion culture; learn to identify, understand and interpret fashion trends; and examine how the needs of different markets are met.

Students engage in a design process to plan, generate and produce fashion items. They investigate textiles and materials and their characteristics and how these qualities impact on their end use. They experiment with combining textiles and materials and how to make and justify aesthetic choices. They investigate fashion merchandising and marketing, the visual literacies of fashion and become discerning consumers of fashion while appraising and critiquing fashion items and trends as well as their own products.

Pathways

A course of study in Fashion can establish a basis for further education and employment in the fields of design, personal styling, costume design, production manufacture, merchandising, and retail.

Objectives

By the conclusion of the course of study, students should:

- Demonstrate practices, skills and processes
- Interpret briefs
- Select practices, skills and procedures
- Sequence processes
- Evaluate skills, procedures and products
- Adapt production plans, techniques and procedures

[Overview - Fashion Syllabus](#)

Structure

The Fashion course contains six unit options from which the schools decided which 4 units they will deliver (must allocate the options below into Units 1 – 4).

Unit Option A	Unit Option B	Unit Option C	Unit Option D	Unit Option E	Unit Option F
Fashion designers	Historical fashion influences	Slow fashion	Collections	Industry trends	Adornment

Assessment

For Fashion, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments from whichever unit options are allocated to Units 3 & 4.

Unit Option A	Unit Option B	Unit Option C	Unit Option D	Unit Option E	Unit Option F
Project Response requirements: <ul style="list-style-type: none"> • Fashion garments inspired by a designer • Planning and evaluation: multimodal 	Practical demonstration Response requirements: <ul style="list-style-type: none"> • Fashion drawings inspired by historical fashion influences • Planning and evaluation: multimodal 	Project Response requirements: <ul style="list-style-type: none"> • Fashion garments upcycled from preloved garments • Planning and evaluation: multimodal 	Practical demonstration Response requirements: <ul style="list-style-type: none"> • Fashion collection • Planning and evaluation: multimodal 	Project Response requirements: <ul style="list-style-type: none"> • Fashion garments in response to an emerging fashion trend • Planning and evaluation: multimodal 	Project Response requirements: <ul style="list-style-type: none"> • Adornment items for a specific client • Planning and evaluation: multimodal
Practical demonstration Response requirements: <ul style="list-style-type: none"> • Outfit design inspired by the environment • Planning and evaluation: multimodal 	Project Response requirements: <ul style="list-style-type: none"> • Fashion garments inspired by historical influences • Planning and evaluation: multimodal 	Practical demonstration Response requirements: <ul style="list-style-type: none"> • Awareness campaign promoting sustainable fashion practices • Planning and evaluation: multimodal 	Project Response requirements: <ul style="list-style-type: none"> • Fashion garments that are part of a fashion collection • Planning and evaluation: multimodal 	Practical demonstration Response requirements: <ul style="list-style-type: none"> • Marketing campaign for specific fashion products • Planning and evaluation: multimodal 	Practical demonstration Response requirements: <ul style="list-style-type: none"> • Fashion drawings for an adornment extension line of items • Planning and evaluation: multimodal

Hospitality Practices

Hospitality Practices develops knowledge, understanding and skills about the hospitality industry and emphasises the food and beverage sector, which includes food and beverage production and service.

Students develop an understanding of hospitality and the structure, scope and operation of related activities in the food and beverage sector and examine and evaluate industry practices from the food and beverage sector.

Students develop skills in food and beverage production and service. They work as individuals and as part of teams to plan and implement events in a hospitality context. Events provide opportunities for students to participate in and produce food and beverage products and perform service for customers in real-world hospitality contexts.

Pathways

A course of study in Hospitality Practices can establish a basis for further education and employment in the hospitality sectors of food and beverage, catering, accommodation and entertainment. Students could pursue further studies in hospitality, hotel, event and tourism or business management, which allows for specialisation.

[Overview - Hospitality Practices Syllabus](#)

Objectives

By the conclusion of the course of study, students should:

- Demonstrate practices, skills and processes
- Interpret briefs
- Select practices, skills and procedures
- Sequence processes
- Evaluate skills, procedures and products
- Adapt production plans, techniques and procedures

Structure

The Hospitality Practices course contains six unit options from which the schools decided which 4 units they will deliver (must allocate the options below into Units 1 – 4).

Unit Option A	Unit Option B	Unit Option C	Unit Option D	Unit Option E	Unit Option F
Culinary trends	Bar and barista basics	In-house dining	Casual dining	Formal dining	Guest services

Assessment

For Hospitality Practices, assessment from Units 3 and 4 is used to determine the student’s exit result, and consists of four instruments from whichever unit options are allocated to Units 3 & 4.

Unit Options A, B, C, D and E	Unit Option F
<p>Practical Demonstration</p> <p>Response requirements:</p> <ul style="list-style-type: none"> • Practical demonstration: menu item • Planning and evaluation: multimodal 	<p>Investigation</p> <p>Response requirements:</p> <ul style="list-style-type: none"> • One of the following: <ul style="list-style-type: none"> – Multimodal – Written (up to 1000 words)
<p>Project</p> <p>Response requirements:</p> <ul style="list-style-type: none"> • Practical demonstration: delivery of event • Planning and evaluation: multimodal 	<p>Project</p> <p>Response requirements:</p> <ul style="list-style-type: none"> • Practical demonstration: delivery of event <ul style="list-style-type: none"> – Planning and evaluation: multimodal

Media Arts in Practice

Media Arts in Practice focuses on the role media arts plays in the community in reflecting and shaping society's values, attitudes and beliefs. It provides opportunities for students to create and share media artworks that convey meaning and express insight.

Students learn how to apply media technologies in real-world contexts to solve technical and/or creative problems. When engaging with school and/or local community activities, they gain an appreciation of how media communications connect ideas and purposes with audiences. They use their knowledge and understanding of design elements and principles to develop their own works and to evaluate and reflect on their own and others' art-making processes and aesthetic choices.

Students learn to be ethical and responsible users of and advocates for digital technologies, and aware of the social, environmental and legal impacts of their actions and practices.

Pathways

A course of study in Media Arts in Practice can establish a basis for further education and employment in a dynamic, creative and global industry that is constantly adapting to new technologies.

[Overview - Media Arts in Practice Syllabus](#)

Objectives

By the conclusion of the course of study, students should:

- use media arts practices
- plan media artworks
- communicate ideas
- evaluate media artworks

Structure

The Media Arts in Practice course contains four units from which the schools decided which order to deliver (must allocate the options below into Units 1 – 4).

Unit Option A	Unit Option B	Unit Option C	Unit Option D
Personal viewpoints	Representations	Community	Persuasion

Assessment

For Media Arts in Practice, assessment from Units 3 and 4 is used to determine the student’s exit result, and consists of four instruments from whichever unit options are allocated to Units 3 & 4.

Unit Option A	Unit Option B	Unit Option C	Unit Option D
<p>Project Response requirements:</p> <ul style="list-style-type: none"> design products <ul style="list-style-type: none"> variable depending on selected pre-production format and length or requirements of media artwork Planning and evaluation <p>One of the following:</p> <ul style="list-style-type: none"> Multimodal Written (up to 600 words) Spoken (up to 4 mins) 	<p>Project Response requirements:</p> <ul style="list-style-type: none"> design products <ul style="list-style-type: none"> variable depending on selected pre-production format and length or requirements of media artwork Planning and evaluation <p>One of the following:</p> <ul style="list-style-type: none"> Multimodal Written (up to 600 words) Spoken (up to 4 mins) 	<p>Project Response requirements:</p> <ul style="list-style-type: none"> design products <ul style="list-style-type: none"> variable depending on selected pre-production format and length or requirements of media artwork Planning and evaluation <p>One of the following:</p> <ul style="list-style-type: none"> Multimodal Written (up to 600 words) Spoken (up to 4 mins) 	<p>Project Response requirements:</p> <ul style="list-style-type: none"> Design pitch <p>One of the following:</p> <ul style="list-style-type: none"> Multimodal Written (up to 400 words) Spoken (up to 3 mins) <ul style="list-style-type: none"> Evaluation of pitch <p>One of the following:</p> <ul style="list-style-type: none"> Multimodal Written (up to 200 words) Spoken (up to 1.5 mins)

Religion & Ethics

Religion & Ethics focuses on the personal, relational and spiritual perspectives of human experience. Students investigate and critically reflect on the role and function of religion and ethics in society.

Students investigate topics such as the meaning of life, spirituality, purpose and destiny, life choices, moral and ethical issues and justice and explore how these are dealt with in various religious, spiritual and ethical traditions. They examine how personal beliefs, values and spiritual identity are shaped and influenced by factors such as family, culture, gender, race, class and economic issues.

Students gain knowledge and understanding and develop the ability to think critically and communicate concepts relevant to their lives and the world in which they live.

Pathways

A course of study in Religion & Ethics can establish a basis for further education and employment in any field. Students gain skills and attitudes that contribute to lifelong learning and the basis for engaging with others in diverse settings.

Overview - Religion and Ethics

Syllabus

Objectives

By the conclusion of the course of study, students should:

- explain religious, spiritual and ethical principles and practices
- examine religious, spiritual and ethical information
- apply religious, spiritual and ethical knowledge
- communicate responses
- evaluate projects.

Structure

The Religion and Ethics course contains six unit options from which the schools decided which 4 units they will deliver (must allocate the options below into Units 1 – 4).

Unit Option A	Unit Option B	Unit Option C	Unit Option D	Unit Option E	Unit Option F
Australian identity	Social justice	Meaning, purpose and expression	World religions and spiritualities	Peace	Sacred stories

Assessment

For Religion and Ethics, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments from whichever unit options are allocated to Units 3 & 4.

Unit Options A and C	Unit Options B and D	Unit Option E	Unit Option F
<p>Investigation Response requirements:</p> <ul style="list-style-type: none"> • One of the following: <ul style="list-style-type: none"> – Multimodal – Written (up to 1000 words) – Spoken (up to 7 mins) 	<p>Extended Response Response requirements:</p> <ul style="list-style-type: none"> • One of the following: <ul style="list-style-type: none"> – Multimodal – Written (up to 1000 words) – Spoken (up to 7 mins) 	<p>Extended Response Response requirements:</p> <ul style="list-style-type: none"> • One of the following: <ul style="list-style-type: none"> – Multimodal – Written (up to 1000 words) – Spoken (up to 7 mins) 	<p>Investigation Response requirements:</p> <ul style="list-style-type: none"> • One of the following: <ul style="list-style-type: none"> – Multimodal – Written (up to 1000 words) – Spoken (up to 7 mins)

Visual Arts in Practice

Visual Arts in Practice focuses on students engaging in art-making processes and making virtual or physical visual artworks. Visual artworks are created for a purpose and in response to individual, group or community needs.

Students explore and apply the materials, technologies and techniques used in art-making. They use information about design elements and principles to influence their own aesthetic and guide how they view others' works. They also investigate information about artists, art movements and theories, and use the lens of a context to examine influences on art-making.

Students reflect on both their own and others' art-making processes. They integrate skills to create artworks and evaluate aesthetic choices. Students decide on the best way to convey meaning through communications and artworks. They learn and apply safe visual art practices.

Pathways

A course of study in Visual Arts in Practice can establish a basis for further education and employment in a range of fields, including design, styling, decorating, illustrating, drafting, visual merchandising, make-up artistry, advertising, game design, photography, animation or ceramics.

[Overview - Visual Arts in Practice Syllabus](#)

Objectives

By the conclusion of the course of study, students should:

- recall terminology and explain art-making processes
- interpret information about concepts and ideas for a purpose
- demonstrate art-making processes required for visual artworks
- apply art-making processes, concepts and ideas
- analyse visual art-making processes for particular purposes
- use language conventions and features to achieve particular purposes
- generate plans and ideas and make decisions
- create communications that convey meaning to audiences
- evaluate art-making processes, concepts and ideas.

Structure

The Visual Arts in Practice course contains four units from which the schools decided which order to deliver (must allocate the options below into Units 1 – 4).

Unit Option A	Unit Option B	Unit Option C	Unit Option D
Looking inwards (self)	Looking outwards (others)	Clients	Transform & extend

Assessment

For Visual Arts in Practice, assessment from Units 3 and 4 is used to determine the student's exit result, and consists of four instruments from whichever unit options are allocated to Units 3 & 4.

VOCATIONAL EDUCATION PROGRAM

At San Sisto College, we have an integrated studies program which incorporates General subjects, Applied subjects, Vocational Education and Training Certificates, TAFE and external study, traineeships and apprenticeships. Students have many options when it comes to choosing the pathway that best suits them.

WHY STUDY A VOCATIONAL EDUCATION QUALIFICATION?

Vocational Education and Training (VET) helps Year 11 and Year 12 students in their transition from school to work. It is also an alternative pathway to university entrance. It contributes to young people's chances of obtaining employment upon leaving school and offers other benefits. Recognised Vocational Education and Training allows students to reinforce and consolidate general learning in more applied contexts. In this way, our Vocational Education and Training program at San Sisto College caters for a broader range of students' learning styles.

VET potentially opens up a range of post-school further education, training and employment possibilities. Many students are able to link their study in VET qualifications with a school-based traineeship/apprenticeship whilst completing Years 11 and 12. Students may also be eligible to enrol in the TAFE at School Program run by TAFE Brisbane where students can study a Certificate qualification on campus at TAFE one day a week.

SUBJECTS (These courses vary from year to year and students enrol on an individual basis)

All students at San Sisto College must include the following three subjects in their curriculum.

- An English subject
- A Mathematics subject
- A Religion subject

Students can choose the remainder of their subjects from the full list of General, Applied or Vocational Education Certificates. San Sisto College operates within the Australian Quality Training Framework, in the offering of its VET qualifications.

The Nationally Recognised VET qualifications are:

- Diploma of Business
- Certificate IV in School Based Education Support
- Certificate IV in Justice Studies
- Certificate III in Business
- Certificate III in Health Services Assistance/ Cert II in Health Support Services
- Certificate III in Fitness/Cert II in Sports Coaching
- Certificate II in Active Volunteering
- Certificate I in Employment Pathways

WORK PLACEMENT/WORK EXPERIENCE

Students completing some of the qualifications will undertake work placement, which complements their vocational studies and future career path. Please note that placement requirements are different across the suite of VET qualifications on offer. An outline of how many times students need to attend placement for each VET qualification is included in the individual course information following. Students are required to locate their own work placements. Once the student has found the workplace, the school will organise the insurance paperwork.

THE ROLE OF VET CERTIFICATES IN APPLYING FOR TERTIARY COURSES

Some Universities will accept VET qualifications (Cert III or higher) as a pathway into a range of University courses. Individual universities will publish which courses VET qualification can be used for entry. Please note that some universities won't accept a VET qualification for entry.

Students are reminded that VET qualifications of Certificate III and above can be utilised within an ATAR calculation under a "4 + 1" enrolment pattern.

RECOGNITION OF PRIOR LEARNING

RPL recognises your current skills and knowledge obtained through other subjects; previous training; things you have learned outside school; work experiences or your part time job. If you can show that you have the skills described in the units of competency of any VET qualification through activities undertaken at work, home or elsewhere, you may not have to do prove competence again. With the assistance of your teacher in this subject you can apply for recognition of your prior learning.

'*Recognition of Prior Learning*' application forms and checklists are available from the Program Leader – VET. Students may be asked to attend a meeting to discuss the details of their application. If a student thinks they may be eligible for RPL they can apply at any time during the course and have their current skills recognised.

From a QCE perspective, RPL should be viewed in light of the QCAA policy regarding duplication of learning: [2.3 Additional VET QCE credit rules | Queensland Curriculum and Assessment Authority \(qcaa.qld.edu.au\)](https://www.qcaa.qld.edu.au/resources/learning/2.3-Additional-VET-QCE-credit-rules)

POST SCHOOL PATHWAYS

For students who do not wish to go to University immediately upon leaving Year 12, VET courses can provide a wide range of attractive options.

- Entry-level employment.
- You may enrol in a Cert IV or Diploma course at TAFE which leads to further employment opportunities or University entry.
- You may enrol in a Dual Award course at TAFE which transitions you from a Diploma to a University Degree after 6 months to 1 year (depending on the course).
- You may consider furthering traineeship opportunities by converting your existing traineeship into full time employment.

OTHER NOTES

The VET qualifications on offer are designed to be completed during Year 11 and 12. Due to some circumstances i.e. enrolling late into the course, not completing course requirements etc, students are not guaranteed the completed qualification but may receive a Statement of Attainment for the units of competency they have completed. Gaining a VET Qualification will also not guarantee employment in the industry.

VOCATIONAL EDUCATION FEE SCHEDULE

All the school-based VET qualifications are run by external Registered Training Organisations (RTOs) and include an RTO fee. Please see the table below for a summary of the costs of each course.

Some Cert II courses are free under the Queensland Government VETiS funding scheme. To be eligible for VETiS funding, a student must meet the following criteria:

- Be an Australian Citizen, Permanent Resident or NZ Citizen
- Permanently reside in Queensland
- Be currently enrolled in Secondary School in Years 10, 11 or 12
- Have never previously completed a Cert II level qualification under VETiS funding (VETiS funding can only be accessed once).

Qualification	Cost with VETiS funding	Cost without VETiS funding	Method of payment
Diploma of Business		\$2500 (add \$100 extra if paying via monthly payment plan)	Invoiced directly by RTO Barrington College at the start of the course

BSBOPS504	Manage Business Risk
BSBPMG430	Undertake Project Work
BSBTWK503	Manage Meetings
BSBPEF502	Develop and Use Emotional Intelligence
BSBCMM411	Make Presentations
BSBMKG541	Identify and Evaluate Marketing Opportunities

Student Testimonials

Students who graduated with their Diploma of Business qualification from Barrington College Australia.

“My experience with Barrington College could not have been better. The classes were inclusive and interactive with both self-study and group work. The course was great in the fact that it did not impede on other school classes and most of the study was completed during class time. I had no idea what I was going to study at university, but I found such an interest in business through my diploma studies that I chose to enrol in a Bachelor of Business at university.”

Callum Moloney (Former student at Somerset College)

Course Duration

Up to 18 months with classes delivered at your school campus alongside self-paced study (5-6 terms).

Course Availability

The course is available to in-school students.

Why Study a Diploma of Business?

- A recognised leader in the delivery of in-school vocational programs.
- Established university pathways.
- Qualification provides students with ATAR equivalency and up to eight QCE points.
- Potential academic credit towards university undergraduate degrees.
- Achieve a nationally accredited qualification while still at high school.
- Personalised study experience and strong student support.
- Competency-based learning that prepares students for the workplace and entrepreneurial pursuits.
- CRICOS-registered college for international students.

“I commenced my Diploma of Business at the start of Year 11 and was able to complete it in 12 months without compromising on commitments to school work or curricular activities. For me, the course assisted with my future studies - it not only provided a place in university, it also provided credit towards my business degree. I highly recommend Barrington College’s Diploma of Business. It’s an excellent course.”

Sarah Ledingham (Former student at St Hilda’s Anglican School)

Barrington College Australia

Barrington College Australia is a boutique provider of vocational education that has proudly been delivering in-school programs to senior school students since 2014.

We currently partner with a range of private, independent and public schools throughout Brisbane and the Gold Coast.

In addition to our in-school programs, we have a business campus in Brisbane and a purpose-built hospitality and business campus on the Gold Coast where we offer a wide range of study options.

HLTAID012	Provide first aid in an education and care setting	Elective

DURATION

2 years

Due to the large amount of content and assessment required for this course, students have the option of studying this course over 2 lines (ie selecting 5 subjects only).

ENTRY REQUIREMENTS

Students must achieve the following minimum results in Year 10 to be eligible for this program:

- English: C+
- Math: C+

A working with children check (also known as a Blue Card in Qld) must be obtained prior to conducting your vocational placement – this will be arranged by the College.

STUDY MODE

The course consists of two key components – Theory and Practical.

Theory: The theory component is completed through **online Study**. Each student will receive a student portal that contains all course resources and assessments. Students will be allocated time in their timetable to complete the course with the support of a classroom teacher.

Practical: Students will complete 160 hours practical placement in a Primary School setting as part of their study. This time will be allocated one day a week during Terms 2 – 4 in Yr 11, during exam block (around scheduled exams), during the final week of school in Year 11 and at other negotiated times throughout the course. Students are also required to complete a First Aid course as part of the qualification.

PAYMENT

Cost of Course: \$990 (including a \$300 non-refundable enrolment fee)

Note: Fees will be invoiced directly from the RTO and are inclusive of all mandatory course resources

PARTNERING ARRANGEMENTS

This course is offered in partnership with ADAPT EDUCATION (RTO # 32452). Adapt Education provides course resources, manages quality and compliance and issues the Certificate. All training and assessment is conducted by San Sisto College.

RTO Queries to: Adapt Education 1300 380 335 info@adapteducation.com.au

OTHER INFORMATION

The units of competencies that are studied are from the Community Services Package. The Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework specific to the community services industry. Further information regarding this qualification can be found at <https://training.gov.au/Training/Details/CHC40221>

Certificate II in Health Support Services + Certificate III in Health Services Assistance

Additional Learning Option – Dual Qualification

Registered Training Organisation: Strategix Training

RTO Code: 31418

Qualification Code and Title: HLT23221: Certificate II in Health Support Services

HLT33115: Certificate III in Health Services Assistance

Course Overview:

Health and community services training is linked to the largest growth industry in Australia, estimated to grow by 20% over the next five years. These programs combine to provide students with entry-level skills necessary for a career in the health sector and provide a pathway to pursue further study. Skills acquired in this course include first aid, effective communication, workplace health and safety, infection control, understanding common medical terminology, conducting health checks, recognising healthy body systems and working with diverse people.

Refer to training.gov.au for specific information about the qualification.

Successful completion of the dual qualification contributes up to a **maximum of eight (8) credits** towards a student's **QCE**. Up to 4 points for the completion of Certificate II and up to a further 4 points for the completion of Certificate III.

Work Experience:

Students are highly encouraged to undertake work experience in a health or community service facility to strengthen their skills, knowledge and employability. This work experience is **not** a requirement to complete the course. Strategix Training considers industry experience to be very important for students to gain a deeper understanding of day-to-day operations in relevant roles.

Pathways:

Potential options may include:

- Various Certificate IV qualifications
- Diploma of Nursing
- Bachelor's Degrees (B.Nursing)
- Entry-level employment within the health industry

Cost: HLT23221 Certificate II in Health Support Services is fee free under VETiS funding by the Qld Government for eligible students. Additional to the VETiS funding, HLT33115 Certificate III in Health Services Assistance will be charged at a discounted rate of \$399 per student.

*** If the student has used their VETiS funding, the course fee will be \$1,500 for the Certificate II plus an additional \$399 for the Certificate III.

Duration: 7 Terms

HLT23221: Certificate II in Health Support Services

Course Code	Unit Description	Course Assessment

OTHER INFORMATION

The units of competencies that are studied are from the Sport, Fitness and Recreation Training Package. The Training Package is an integrated set of nationally endorsed competency standards, assessment guidelines and Australian Qualifications Framework specific to the sport, fitness and recreation industries. Further information regarding this qualification can be found at

Cert II Sports Coaching - <https://training.gov.au/Training/Details/SIS20321>

Cert III Fitness - <https://training.gov.au/Training/Details/SIS30321>

CHC24015 Certificate II in Active Volunteering

Qualification description

This certificate provides students and schools with the ability to engage with their local school and wider community. The program enables learning to be provided in an environment which reflects the working circumstances of volunteers in our community under direct supervision.

This program is perfect for students and schools that are looking to incorporate their existing community partnerships and further strengthen student links to the community. Students will explore the varied dimensions of volunteering, basic emergency life support-skills, communication and organisational skills to effectively equip themselves moving into the workforce post-secondary schooling.

To achieve this qualification, you must complete a minimum of 20 hours of volunteer work.

Refer to training.gov.au for specific information about the qualification.

Entry requirements

There are no entry requirements for this qualification. At enrolment students will need to provide their Unique Student Identifier (usi.gov.au) and complete an LLN test to determine suitability and any support needs.

Where volunteering works is undertaken with organisations external to the school, students may be required to undertake background checks.

Duration and location

This is a 1 year course delivered to senior school students on site with qualified school staff via a third party arrangement with IVET Institute.

Delivery modes

A range of delivery modes will be used during the teaching and learning of this qualification. These include:

- face-to-face instruction
- practicals and scenarios
- online training

Fees

The total Fee for Service cost is \$295.

Subject Type

VET Qualification

QCE Points

Maximum of 4 credits.

Course Units

Students must successfully complete all 7 units of competency (4 core units plus 3 elective* units) to attain this qualification.

Unit code	Title
HLTWH001	Participate in workplace health and safety
BSBCMM201	Communicate in the workplace
CHCDIV001	Work with diverse people
CHCVOL001	<i>Be an effective volunteer</i>
CHCCOM001	Provide first point of contact*
CHCCOM005	Communicate and work in health or community services*
FSKOCM07	Interact effectively with others at work*

Volunteer Placement

The CHCVOL001 unit requires students to complete 20 hours of volunteer work, which is incorporated into the assessment. This can be either within the school community or with approved external not for profit, charity, community, or organisation with a structured volunteer program.

Assessment

Assessment is competency based. Assessment techniques include but not limited to:

- observations
- folios of work
- questionnaires
- written and practical tasks

Pathways

Potential options may include:

- entry level employment
- Certificate III qualifications (Community Services, Individual Support)
- Certificate IV qualifications (Community Services, Ageing Support, Disability)

Obligation

Students will be provided with every opportunity to complete the qualification. Employment is not guaranteed upon completion. Students deemed competent in all units of competency will be awarded the qualification and a record of results by IVET Institute Pty Ltd. Students who achieve at least one unit of competency (but not the full qualification) will receive a Statement of Attainment.

22523VIC - Certificate I in Employment Pathways

Qualification description

This certificate is an excellent qualification that assists students to gain vital foundation skills and knowledge to succeed in the senior years.

This course allows students to experience vocational training for the first time and to access a nationally recognised qualification as well as gain invaluable insight into vocational training.

This course provides an excellent pathway to work placement, career development, subject selection, time management, organisational and study skills programs.

Refer to training.gov.au for specific information about the qualification.

Entry requirements

There are no entry requirements for this qualification. At enrolment students will need to provide their Unique Student Identifier (usi.gov.au) and complete an LLN test to determine suitability and any support needs.
